TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES; PRODUCTS, WHETHER OR NOT CONTAINING NICOTINE, INTENDED FOR INHALATION WITHOUT COMBUSTION; OTHER NICOTINE CONTAINING PRODUCTS INTENDED FOR THE INTAKE OF NICOTINE INTO THE HUMAN BODY (HS code(s): 24)

•Public Health (Tobacco and Other Products) Bill 2023
•Public Health (Tobacco and Other Products) Regulations 2023

The proposed legislation will consolidate eight existing tobacco related laws, regulations, instruments and court decisions into a single streamlined Act of Parliament and associated regulations. The Bill contains 7 chapters that thematically present the proposed provisions:

Chapter 1 sets out the preliminary matters including commencement dates, objects of the Act, definitions and key concepts.

Chapter 2 provides for the regulation of tobacco and e-cigarette advertising and sponsorships. The provisions are a consolidation of the Tobacco Advertising Prohibition Act 1992 and are expanded to also apply to the advertising and promotion of e-cigarettes. The chapter includes offence and civil penalty provisions.

Chapter 3 creates the regime that mandates the requirements relating to plain packaging of tobacco products. The provisions include requirements from the Tobacco Plain Packaging Act 2011 as well as proposed new requirements relating to regulation of: ingredients and product design features of tobacco products; number of units, weight or volume, and pricing of tobacco products; prohibition of terms that may imply that certain products are less harmful; and inclusion of health promotion inserts. It permits the making of regulations prescribing plain packaging requirements and conditions for the appearance, content and standards of tobacco products, including dissuasive measures that may be required to appear on tobacco products. The chapter includes a range of offences and civil penalty provisions in relation to conduct dealing with non-compliant packaging.

Chapter 4 provides for permanent bans on certain regulated tobacco items. The chapter facilitates the Minister imposing a permanent ban on chewing tobacco and snuffs intended for oral use consistent with the existing ban in the Trade Practices Act 1974-Consumer Protection Notice No.10 of 1991-Permanent Ban on Goods. The chapter includes offence and civil penalty provisions.

Chapter 5 provides for new reporting requirements. Reporting entities, as defined, would be required to submit reports containing information about tobacco products sold, supplied, or offered for sale or supply in Australia as well as to report on advertising, promotion and sponsorship activities and expenditure. Manufacturers will also be required to report on research and development activities.

Chapter 6 contains compliance and enforcement provisions. It provides for the appointment of authorised officers and supporting monitoring and investigation powers, along with civil penalty provisions, and provision for the issuing of infringement notices, enforceable undertakings and injunctions.

Chapter 7 includes miscellaneous provisions, including those in relation to delegations and the constitutional provisions. The proposed legislation and details of each chapter are further described in the Consultation Paper (health.gov.au)

G/TBT/N/EU/985 06/06/2023	European Union	<p><i>Biocidal products</i></p> <p>Draft Commission Implementing Regulation approving sulfur dioxide generated from sulfur by combustion as an active substance for use in biocidal products of product-type 4 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council;</p> <p>This draft Commission Implementing Regulation approves sulfur dioxide generated from sulfur by combustion as an active substance for use in biocidal products of product-type 4.</p>	05/08/2023

Plywood and Wooden flush door shutters (Quality Control) Order, 2023;

Plywood and Wooden flush door shutters (Quality Control) Order, 2023

•A Plywood and wooden flush door have a wooden frame over which plywood, MDF or natural wood is fixed on both the sides. The hollow parts are filled with cardboard material. The Wooden flush door is usually imparted a laminate, veneer or paint finishing in various designs and colours.

•A Plywood is usually made from hardwood, which makes the board very heavy. So, plywood doors are much heavier than Wooden flush doors (they have softwood blocks inside). Heavy doors can be very difficult to carry, install, and operate in everyday use.

Water Meters and Accessories (Quality Control) Order, 2023;

Water Meters and Accessories (Quality Control) Order, 2023

•A Water Meter is an instrument for recording the quantity of water passing through a particular outlet. Water meters measure the volume of water used by residential and commercial building units that are supplied with water by a public water supply system.

•A ferrule is a plumbing fitting that attaches two pipes together. It is a type of cap widely used in pipe and fixture joints to create a tight compression fitting.

Precision Roller and Bush Chains, attachments and associated chain sprockets (Quality Control) Order, 2023;

Precision Roller and Bush Chains, attachments and associated chain sprockets (Quality Control) Order, 2023 Roller chain or bush roller chain is the type of chain drive most commonly used for transmission of mechanical power on many kinds of domestic, industrial and agricultural machinery, including conveyors, wire-and tube-drawing machines, printing press, automobiles and bicycles. It consists of a series of short cylindrical rollers held together by side links. It is driven by a toothed wheel called a sprocket. It is a simple, reliable, and efficient means of power transmission.

Aluminium and Aluminium Alloy Products.

07/08/2023

Aluminium and Aluminium Alloy Products (Quality Control) Order, 2023;

Aluminium and Aluminium Alloy Products (Quality Control) Order, 2023 •Aluminium is an important strategic metal for India's economy. After the iron and steel industry, aluminium is the second most important industry. It can be cast, melted, formed, machined, and extruded, allowing it to be formed into a variety of shapes and then fabricated to suit a wide range of applications. Aluminium is used in the

production and distribution of electricity being a good conductor of electricity, household utensils and electric appliances, aircraft manufacturing, rail coaches, nuclear and defence accessories, and so on. The downstream sector of Aluminium involves the transformation of aluminium into semi-finished products such as rods, bars, castings, forgings, and so on. Wrought aluminum is alloy of aluminum that has been subjected to mechanical working by processes such as rolling, extrusion or forging. Aluminium alloy tube is a type of round, hollow pipe made of Aluminium alloy, and is available in a variety of diameters and thicknesses. Aluminium tube has a huge range of uses from irrigation, automobile and other construction applications etc. Aluminum foils are produced by continuously casting and cold rolling aluminum sheets. Aluminum foil sheets are rapidly used in the manufacturing of various kinds of containers as per packaging requirements.

G/TBT/N/NZL/125 09/06/2023	New Zealand	<p><i>Commercial ice makers and ice making machinery including those under HS 84.18</i></p> <p>Regulation Impact Statement for Consultation: MEPS and other measures for Commercial Ice Makers (May 2023, 80 pages) available for download at: Commercial ice makers EECA The notified consultation document presents policy options to introduce Minimum Energy Performance Standards (MEPS) for commercial ice-makers offered for sale in New Zealand and Australia. The scope of the proposal applied to commercial ice makers with: <ul style="list-style-type: none"> •Plumbed water supply and drainage connection and •A capacity up to 1,000kg per 24 hours, when tested to AS/NZS 4865 or equivalent (ambient temperature 32 degrees, water temperature 21 degrees). Four MEPS levels are considered in the consultation document. The recommended option is for the MEPS level to be introduced at HE levels in AS/NZS 4865:2008 Part 3, which is then increased to match US DOE MEPS after a minimum of 2 years (except where AS/NZS 4865:2008 Part 3 levels are higher). Test method for MEPSThe proposed test method to ensure compliance with MEPS is the joint Australia and New Zealand standard: AS/NZS 4865:2008. Consideration is also being given to using international test standards for</p>	08/08/2023

product registration purposes to reduce the potential compliance burden of introducing MEPS for commercial ice makers. International standards being considered include The US ASHRAE 29-2009 (or 2015) test or the ISO test (if published by then), provided the tests are undertaken at 230V/50Hz and at the at 32/21-degree temperature rating point.

Draft Ministerial Regulation on Heavy motor vehicle equipped with positive ignition engines : safety requirements; emission from engine, level 4 (TIS 3044–2563);

The draft Ministerial Regulation mandates engine vehicles to conform with the standard for Heavy motor vehicle equipped with positive ignition engines: safety requirements; emission from engine, level 4 (TIS 3044–2563). This standard shall apply to motor vehicles of categories M1 M2 N1 and N2 with positive ignition engines and a reference mass exceeding 2,610 kg and to all motor vehicles of categories M3 and N3. This standard specifies safety requirements for pollutants, durability of pollution control devices and on-board diagnostic (OBD) system. The type approval of a completed vehicle given under this standard shall be extended to its incomplete vehicle with a reference mass below 2,610 kg. Type approvals shall be extended if the manufacturer can demonstrate that all bodywork combinations expected to be built onto the incomplete vehicle increase the reference mass of the vehicle to above 2,610 kg. The type approval of a vehicle granted under this standard shall be extended to its variants and versions with a reference mass above 2,380 kg provided that it also meets the requirements relating to the measurement of greenhouse gas emissions and fuel consumption in accordance with paragraph 4.2 of UN Regulation No. 49 Revision 6.
