G/TBT/N/CHL/796 01/06/2026	Chile	<i>Dispositivos médicos</i> Documento Guía del trámite "Autorización de Uso Provisional de Dispositivo Médico en Investigación Clínica en Seres Humanos La presente guía técnica establece el marco procedimental y los requisitos que deben cumplir los investigadores y patrocinadores para solicitar la Autorización de Uso Provisional de Dispositivos Médicos destinados a la Investigación Clínica en Seres Humanos en Chile. El documento, elaborado por el Departamento Agencia Nacional de Dispositivos Médicos (ANDIM) del Instituto de Salud Pública (ISP), busca estandarizar el proceso de evaluación cualitativa ex-ante para aquellos productos médicos que aún no cuentan con registro sanitario ni comercialización regular en el país. A través de un desglose que abarca desde las definiciones operacionales básicas hasta los fundamentos para una eventual denegación de la solicitud, la guía funciona como la normativa administrativa que garantiza que todo dispositivo utilizado en un ensayo clínico en el territorio nacional cumpla con rigurosos estándares de seguridad y calidad. En su núcleo operativo, el texto detalla minuciosamente el expediente único y los antecedentes técnicos que deben acompañar a cada solicitud, tales como el Plan de Investigación Clínica, el Manual del Investigador y el cumplimiento de las Buenas Prácticas Clínicas basadas en estándares internacionales vigentes (como las normas ISO 14.155 e ICH E6-R3). Asimismo, regula aspectos clave como las condiciones de rotulado específico para dispositivos en fase de investigación, los mecanismos de trazabilidad y la gestión de informes de seguridad y eventos adversos.	31/07/2026
G/TBT/N/CHN/2257 01/06/2026	China	<i>Lithium-ion traction batteries for underground mines (HS code(s): 850760); (ICS code(s): 29.220.10; 73.100.99)</i> National Standard of the P.R.C., Technical conditions of lithium-ion traction batteries for underground mines; This document specifies the technical requirements, inspection rules, transportation and storage requirements for lithium-ion traction batteries applied in underground mines, and describes the corresponding test methods. This document applies to the design, manufacture, and inspection of lithium-ion traction batteries applied in underground mines.	31/07/2026
G/TBT/N/EU/1214 01/06/2026	European Union	<i>49 Aircraft and Space Vehicles Engineering</i> Draft legislative proposal for a Regulation of the European Parliament and of the Council on the safety, resilience and sustainability of space activities in the Union (COM/2025/335 final) (hereinafter, the 'EU Space Act') including the Explanatory Memorandum, the Main Legal Text, the Legislative Financial and Digital Statement EUR-Lex - 52025PC0335 - EN - EUR-	30/08/2026

Lex and Annexes 2257596a-0485-465a-8031-a5d43eb5190f_en;

The legislative proposal for the EU Space Act aims to establish the foundation of the EU internal market for space activities by harmonising key requirements concerning the safety, resilience, and environmental sustainability of space activities when providing space services and data in the Union, while at the same time promoting the competitiveness of the European space industry. The legislative proposal will bring about regulatory simplification and legal clarity by creating a stable, clear and predictable business environment for all space operators in the European Union, thus creating a level playing field for Union and third country space operators and space-based data providers. In addition, the proposal addresses the following main issues: first, the existing fragmented regulatory landscape in the internal market which hinders cross-border space activities; second, the risks to the safety, resilience and long-term environmental sustainability of space activities that are being carried out by commercial and governmental actors across the European Union; third, lack of clarity and consistency among existing space activities environmental impacts measurements.

- *Ammonium nitrate for producing emulsion explosives;*
- *Explosive precursors used for production of industrial explosives.*

27/06/2026

- **Draft Circular promulgating amendments to National Technical Regulations on:**
• **Ammonium nitrate for producing ANFO explosives;**
• **Ammonium nitrate for producing emulsion explosives;**
• **Quality of explosive precursors used for production of industrial explosives.**
- **Draft Amendment 1:2026 QCVN 03:2012/BCT – National technical regulation on Ammonium nitrate for producing ANFO explosives;**
- **Draft Amendment 1:2026 QCVN 05:2015/BCT – National technical regulation on Ammonium nitrate for producing emulsion explosives;**
- **Draft Amendment 1:2026 QCVN 04A:2020/BCT – National technical regulation on quality of explosive precursors used for production of industrial explosives.**
- **Number of pages: To be determined.**
- **Language: Vietnamese**

Description of content: The draft Circular promulgates amendments to national technical regulations concerning ammonium nitrate and explosive precursors used for production of industrial explosives.

The draft amendments mainly include:

- Supplementation of provisions on electronic labels, digital product passports and product traceability;
- Requirements for QR codes connected to the National Quality Data System;
- Amendments to conformity declaration and conformity assessment procedures in accordance with the Law on Product and Goods Quality and relevant implementing regulations;
- Additional obligations regarding electronic reporting and digital data updating by enterprises;
- Application of risk-based inspection mechanisms and reduction of inspection procedures for compliant enterprises;
- Provisions on data sharing among competent authorities regarding compliance information and quality risk warnings;
- Amendments and updates to technical requirements on packaging, labeling, storage, transportation and quality management.

The draft technical regulations apply to organizations and individuals engaged in manufacturing, importing, trading, storage and other related activities concerning ammonium nitrate and explosive precursors used for production of industrial explosives.

- **Title: Draft Circular on Amendments to National Technical Regulations on the Quality of Industrial Sodium Hydroxide, Poly Aluminium Chloride (PAC),**

and Ammonia include: + Draft Amendment 1:2026 QCVN 03A:2020/BCT - National technical regulation on quality of industrial sodium hydroxide. (2 Pages); + Draft Amendment 1:2026 QCVN 06A[PN1] :2020/BCT – National technical regulation on quality of Poly Aluminium Chloride (PAC) (2 pages); + Draft Amendment 1:2026 QCVN 07A:2020[PN2] /BCT - – National technical regulation on quality of industrial ammonia. (3 Pages) • Language: Vietnamese

Description of content: The draft Circular introduces Amendment 1:2026 to three existing national technical regulations: QCVN 03A:2020/BCT (Industrial sodium hydroxide) , QCVN 06A:2020/BCT (PAC) , and QCVN 07A:2020/BCT (Industrial ammonia). The draft amendments mainly include:

- Amendments and updates to requirements on labeling and transportation based on new Decree.
- Updating conformity declaration and assessment procedures based on amended Law on Product and Goods Quality (78/2025/QH15)

These draft amendments apply to:

1. Organizations and individuals manufacturing, importing, trading in, and using industrial sodium hydroxide, PAC, and industrial ammonia;
2. Conformity assessment organizations conducting conformity assessment activities for these products;
3. State management agencies and other relevant organizations and individuals

Draft Decree of the Head of the Halal Product Assurance Organizing Agency Number ... of 2026 Concerning Guidelines for the Implementation of the Halal Assurance System for Cosmetics;

This draft regulation establishes Guidelines for the Implementation of the Halal Assurance System (HAS) for cosmetic products. The guidelines are intended to assist business operators, halal supervisors, halal auditors, halal product assurance inspectors, and other stakeholders in implementing the Halal Assurance System in accordance with Indonesia's Halal Product Assurance Law and Government Regulation No. 42 of 2024. The regulation provides guidance on the criteria for the Halal Assurance System applicable to cosmetic products and identifies critical halal control points throughout the production process to ensure the continuity of halal compliance. The guidelines aim to facilitate consistent implementation of halal requirements, support compliance with applicable regulations and standards, and ensure that cosmetic products meet halal requirements in accordance with Islamic principles.

02/07/2026

Draft Regulatory Guide: Application and Testing of Onsite Emergency Alternating Current Power Sources in Production and Utilization Facilities

Draft guide; request for comment - The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG-1477, "Application and Testing of Onsite Emergency Alternating Current Power Sources in Production and Utilization Facilities." This DG is proposed Revision 5 of Regulatory Guide (RG) 1.9 with a new title. The proposed revision to the RG provides guidance that the staff of the NRC considers acceptable to comply with the NRC regulations for onsite emergency alternating current (AC) power sources in production and utilization facilities. These power sources include emergency diesel generators (EDGs), combustion turbine generators (CTGs) and other types of onsite emergency AC power sources.

Breakout tank inspection; Quality (ICS code(s): 03.120); Accident and disaster control (ICS code(s): 13.200); Fluid storage devices (ICS code(s): 23.020)

03/08/2026

Pipeline Safety: Breakout Tank Inspection Rule;

Notice of proposed rulemaking - Breakout tanks are used to "relieve surges in a hazardous liquid pipeline system" or to "receive and store hazardous liquid transported by a pipeline for reinjection and continued transportation by pipeline." American Petroleum Institute Standard 653 (API Std 653)

sets industry standards for the inspection, repair, alteration, and reconstruction of aboveground storage tanks. The Pipeline and Hazardous Materials Safety Administration (PHMSA) currently incorporates the 3rd edition of API Std 653 (issued December 2001) by reference into its regulations for breakout tanks. In this rulemaking, PHMSA is proposing to update its regulations for breakout tanks to incorporate the 5th edition of API Std 653 (issued November 2014) by reference. As a key part of this, PHMSA is proposing to authorize the use of risk-based inspection (RBI) procedures for establishing the inspection intervals of in-service breakout tanks.

04/07/2026

Draft Resolution of the Cabinet of Ministers of Ukraine "Certain Issues Related to the Importation and Quality Control of Medicines";

The draft Resolution has been developed to regulate the procedures for imports of medicines (except active pharmaceutical ingredients) into the territory of Ukraine, the state quality control of medicines imported into Ukraine, quality control testing of medicines in a state laboratory or a laboratory authorised by a state control authority and the official batch release of certain biological medicines (immunological medicinal products and medicinal products derived from human blood or plasma). The draft Resolution proposes to amend the Resolution of the Cabinet of Ministers of Ukraine No. 287 of 14 March 2025 "On Approval of the Procedure for Importation of Medicines into the Territory of Ukraine" in order to establish a unified procedure for the importation of medicines and the state quality control of medicines imported into the territory of Ukraine. The draft Resolution also provides for the approval of the Procedure for State Quality Control of Medicines Conducted in a State Laboratory or a Laboratory Authorized by the State Control Authority; the Procedure for Official Batch Release of Certain Biological Medicines (Immunological Medicinal Products and Medicinal Products Derived from Human Blood or Human Plasma); the Criteria for Establishing the Annual Programme (Plan) for Sampling of Medicines and repeal certain resolutions of the Cabinet of Ministers of Ukraine, including Resolution No. 902 of 14 September 2005 "On Approval of the Procedure for State Quality Control of Medicinal Products Imported into Ukraine" and Resolution No. 260 of 3 February 2010 "Certain Issues of State Quality Control of Medicinal Products".

Food products and feeds

03/08/2026

Draft Resolution of the Cabinet of Ministers of Ukraine "On Repealing Certain Resolutions of the Cabinet of Ministers of Ukraine"

The draft Resolution provides for the repeal of Resolution of the Cabinet of Ministers of Ukraine No. 186 of 3 March 2022 "Certain Issues of Food Labelling under Martial Law" and Resolution of the Cabinet of Ministers of Ukraine No. 234 of 9 March 2022 "On Measures to Ensure the Uninterrupted Supply of Imported Foodstuffs and Feed under Martial Law". These Resolutions were adopted as temporary measures to ensure food security under martial law and introduced simplified food labelling requirements in cases of shortages of raw materials and the need for prompt changes to product formulations, as well as provisions allowing the placing on the market of imported food products and feed labelled in a language other than the state language. The draft Resolution establishes that food products and feed whose labelling information is provided in accordance with the provisions of Resolution No. 186 of 3 March 2022 and Resolution No. 234 of 9 March 2022 may be placed on the market within the territory of Ukraine:

food products – until the expiry of the minimum durability date or the "use by" date;

feed – until the expiry of the minimum storage period.

The adoption of the draft Resolution will ensure the full application of general labelling requirements in accordance with Law of Ukraine "On Information for Consumers regarding Food Products" and the Law of Ukraine "On Safety and Hygiene of Feed".
