<a href="#">G/TBT/N/USA/1875</a> 14/06/2022	United States of America	<i>Renewable fuel standard compliance; Environmental protection (ICS code(s): 13.020); Fuels (ICS code(s): 75.160)</i> <b>Renewable Fuel Standard (RFS) Program: Alternative RIN Retirement Schedule for Small Refineries;</b> Proposed rule -The Environmental Protection Agency (EPA) is proposing an alternative renewable identification number (RIN) retirement schedule for small refineries under the Renewable Fuel Standard (RFS) program for the 2020 compliance year. To provide small refineries with more time to comply with their 2020 RFS obligations (including any RIN deficits from 2019 carried forward into the 2020 compliance year), EPA is proposing a quarterly RIN retirement schedule by which a small refinery must comply with certain percentages of its 2020 RFS obligations. EPA is proposing this action because small refineries need more time to plan for compliance with their RFS obligations given EPA's delay in deciding small refinery exemption (SRE) petitions and setting the associated compliance deadlines.	28/07/2022
<a href="#">G/TBT/N/USA/1876</a> 14/06/2022	United States of America	<i>Wine; Alcoholic beverages (ICS code(s): 67.160.10)</i> <b>Proposal Regarding Labeling Wines Containing Added Distilled Spirits;</b> Notice of proposed rulemaking -The Alcohol and Tobacco Tax and Trade Bureau (TTB) proposes to amend its wine labeling and advertising regulations to remove an existing	12/08/2022

regulatory prohibition against statements which indicate that a wine contains distilled spirits. This proposed deregulatory action will allow wine makers and importers to provide additional information to consumers about their wines, while still providing consumers with adequate and non-misleading information as to the identity and quality of the products they purchase

<a href="#">G/TBT/N/USA/1877</a> 14/06/2022	United States of America	<p><i>Consumer refrigeration and miscellaneous refrigeration products; Environmental protection (ICS code(s): 13.020); Domestic refrigerating appliances (ICS code(s): 97.040.30)</i></p> <p><b>Energy Conservation Program: Consumer Refrigeration and Miscellaneous Refrigeration Products</b></p> <p>Notice of proposed rulemaking and request for comment -On 18 July 2016, the U.S. Department of Energy published a final rule (notified as G/TBT/N/USA/942/Add.1 and G/TBT/N/USA/661/Add.6) that amended the test procedure for refrigerators and refrigerator-freezers and established both coverage and procedures for testing miscellaneous refrigeration products ("MREFs"). That final rule also established provisions within DOE's certification requirements to provide instructions regarding product category determinations, which were intended to be consistent with the definitions established for MREFs and refrigerators, refrigerator-freezers, and freezers. This document proposes to correct certain inconsistencies between the instructions for determining product categories and the corresponding product definitions to avoid confusion regarding the application of those definitions. DOE is seeking comment from interested parties on the proposal.</p>	13/07/2022

<a href="#">G/TBT/N/CAN/674</a> 15/06/2022	Canada	<p><i>Carriages and strollers, Baby carriages and parts thereof (HS Code 8715.00.0000), Equipment for children (ICS Code 97.190).</i></p>	20/08/2022

### **Carriages and Strollers Regulations**

The requirements of the Carriages and Strollers Regulations (Regulations) have not changed substantively since they were introduced in 1985, while carriage and stroller design has evolved considerably. Current designs of carriages and strollers may present hazards that are not addressed by the Regulations. In addition, some terminology could be clarified and updated to keep pace with current designs. Health Canada has also identified requirements that are not aligned with the requirements in other jurisdictions, and the limited time provided to transition from one standard or regulation to a new version, to be issues warranting amendment.

This regulatory proposal covers five types of requirements related to carriages and strollers:

1. Mechanical
  2. Surface coating materials
  3. Toxicological
  4. Phthalates
  5. Information and warnings
- The proposed repeal and replacement of the Carriages and Strollers Regulations would:
- (a) align mechanical requirements with those in other jurisdictions through ambulatory incorporation by reference of international standards, including a period when a new version of a standard incorporated by reference is published that would allow 180 days to manufacture or import and 365 days to advertise or sell products that meet either the new or the previous version of the standard;
  - (b) align surface coating materials requirements with the proposed amendments to the Surface Coating Materials Regulation that were pre-published in Canada Gazette, Part I on April 24, 2021 (<https://www.gazette.gc.ca/rp-pr/p1/2021/2021-04-24/html/reg1-eng.html>), notified to the WTO as G/TBT/N/CAN/640;
  - (c) align toxicological requirements with the Toys Regulations;
  - (d) align phthalates requirements with the Phthalates Regulations;
  - (e) increase alignment of information and warning requirements with other jurisdictions, and maintain the official languages requirement for all information and warnings to be written in both English and French.

Canada

*Tobacco, tobacco products and related equipment (ICS: 25/08/2022 65.160).*

### **Proposed Regulations Amending the Tobacco Products Regulations (Plain and Standardized Appearance) (93 pages, available in English and in French) and proposed Order Amending Schedule 1 to the Tobacco and Vaping Products Act (2 pages, available in English and in French)**

The proposed Regulations Amending the Tobacco Products Regulations (Plain and Standardized Appearance) would set out enhanced labelling requirements for all tobacco product packages to better inform tobacco users of the health hazards associated with tobacco use. It would allow requirements for tobacco products currently not regulated, including packages of tubes, water pipe tobacco, blunt wraps, and products intended for use with devices, devices and their parts. This proposal would also streamline all tobacco packaging and labelling requirements in a single

set of regulations; the Tobacco Products Information Regulations and the Tobacco Products Labelling Regulations (Cigarettes and Little Cigars) would be repealed.

The proposed Regulations would: standardize the size of the health warnings to 75% of the display area to all tobacco product packages; require the display of text health warnings on individual cigarettes, little cigars that have a filter, and tubes; require a new placement for health information messages on cigarette packages; and, introduce an ambulatory incorporation by reference of the source document. All health-related messages would follow a pre-determined rotation scheme through which a series of messages would be replaced periodically.

The proposed Order Amending Schedule 1 to the Tobacco and Vaping Products Act would permit the use of colouring agents to whiten the tipping paper used on cigarettes, little cigars that have a filter, and tubes, where needed to create a white background where the health warnings need to be displayed.

*Biocidal products*

14/08/2022

**Draft Commission Implementing Decision not approving methylene dithiocyanate as an existing active substance for use in biocidal products of product-type 12 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council; (3 page(s), in English)**

This draft Commission Implementing Decision does not approve methylene dithiocyanate as an active substance for use in biocidal products of product-type 12.

According to the opinion of the Agency, biocidal products of product-type 12 containing methylene dithiocyanate cannot be expected to meet the criteria laid down in Article 5(1), points (b) (iii) and (iv), and (c), read in conjunction with Article 10(1) of Directive 98/8/EC. The applicant did not submit data of sufficient quality to meet the data requirements set out in point 2.7 (specification of purity of the active substance in g/kg or g/l, as appropriate), point 2.8 (identity of impurities and additives together with the structural formula and the possible range expressed as g/kg or g/l, as appropriate), and point 4.1 (analytical methods for the determination of pure active substance and, where appropriate, for relevant degradation products, isomers and impurities of the active substance and additives) of Title II of Annex IIA to Directive 98/8/EC. As a result, it was impossible to confirm the minimum purity of the active substance and to set a reference specification for methylene dithiocyanate. Moreover, it was not possible to confirm that the material used to conduct (eco)toxicological studies cover the presented specifications and to conclude on the relevance of the impurities due to the lack of (eco)toxicological data. Lastly, the environmental risk assessment identified unacceptable risks, and no suitable risk mitigation measure could be identified. The opinion of the European Chemicals Agency can be found on its website (<http://echa.europa.eu/regulations/biocidal-products-regulation/approval-of-active-substances/bpc-opinions-on-active-substance-approval>).

<a href="#">G/TBT/N/ESP/47</a> 17/06/2022	Spain	<i>ENVASES DE PLÁSTICO. No se facilitan códigos arancelarios concretos al existir varias posibilidades en función de las características y composición de los envases.</i> <b>Proyecto de Orden Ministerial por la que se establecen los criterios para determinar cuándo los residuos plásticos sometidos a tratamientos mecánicos y destinados a la fabricación de productos plásticos dejan de ser residuo con arreglo a la Ley 7/2022, de 8 de abril, de residuos y suelos contaminados para una economía circular;</b> Establece los criterios de fin de la condición de residuo para ciertos residuos plásticos que son tratados mecánicamente. Su cumplimiento implica la consideración de estos residuos plásticos tratados como un producto y no como un residuo. Los criterios de carácter técnico están basados en el documento encargado por la Comisión Europea al Joint Research Center, publicado en 2014. La Norma define cuáles son los residuos plásticos admisibles, los tratamientos mecánicos necesarios, los criterios de	16/08/2022

calidad que debe cumplir el material resultante tras la operación de valorización y el procedimiento de verificación del cumplimiento de los criterios a través de los sistemas de gestión.

Únicamente se contemplan en esta norma los tratamientos de carácter mecánico y no otros, como los tratamientos químicos que se pueden llevar a cabo sobre este mismo flujo de residuos.
