G/TBT/N/ISR/1255 20/06/2022	Israel	<p><i>Food grade salt (sodium chloride) (HS code(s): 2501); (ICS code(s): 67.220)</i></p> <p>SI 411 -Food grade salt (sodium chloride); Revision of the Mandatory Standard SI 411, dealing with food-grade salt. This draft revision adopts the Codex Alimentarius Standard Codex Stan 150-1985 (Adopted in 1985; Revised in 1997; 2012. Amended in 1999; 2001; 2006). The proposed standard includes a few national deviations appearing in the standard's Hebrew section, as follows:</p> <ul style="list-style-type: none"> • Adds a new section 1a. dealing with normative references; • Replaces section 2 dealing with description; • Adds a new requirement to the minimum NaCl content appearing in section 3.1; • Changes section 3.4 dealing with iodization of food-grade salt; • Adds a new section 3.5 dealing with salt enrichment with food nutrients other than iodine; • Changes section 4, food additives, and requires compliance with national regulations; • Changes section 5, contaminants, and requires compliance with an official document issued by Israel's MOH; • Changes section 6, food hygiene, and requires compliance with national laws; • Changes the labeling requirements detailed in section 7 and in its sub-sections; • Adds new packaging requirements to sub-section 8.1; • Deletes sub-section 8.2.; • Adds a clarification about the allowed test method to section 9. <p>The major differences between the old version and this new revised draft standard are as follow:</p> <ul style="list-style-type: none"> • Applies also to iodine-enriched salt; • Changes the minimum NaCl content; • Updates the test methods. <p>All sections</p> <p>of the proposed standard will be declared mandatory at the entry into force of this revision. Both the old and new standards will apply from entry into force of this revision for at least two years. During this time products may be tested according to the old or the new revised standard.</p>	19/08/2022
G/TBT/N/ISR/1256 20/06/2022	Israel	<p><i>Structural steel hollow sections (HS code(s): 7304; 7305; 7306); (ICS code(s): 77.140.75)</i></p> <p>SI 1458 part 1.2 -Structural steel hollow sections: Cold formed welded sections –Tolerances, dimensions and sectional properties; (5 page(s), in Hebrew), Revision of the Mandatory Standard SI 1458 part 1.2, dealing with cold-formed welded sections. This draft revision adopts the European Standard EN 10219-2: May 2019, with a few changes appearing in the standard's Hebrew section.</p>	19/08/2022

		<p>The main changes with respect to the previous edition are listed below:</p> <ul style="list-style-type: none"> • Adds new requirements for elliptical hollow sections; • Removes Annex A concerning the additional tolerances for piling tubes; • Adds sub-section 5.2; • Changes Table 3 dealing with the length tolerances for exact length; • Adds to section 7.1 a new paragraph. 	
G/TBT/N/ISR/1257 20/06/2022	Israel	<p><i>Structural steel hollow sections (HS code(s): 7304; 7305; 7306); (ICS code(s): 77.140.75)</i></p> <p>SI 1458 part 2.2 -Structural steel hollow sections: Hot finished sections –Tolerances, dimensions and sectional properties;</p> <p>Revision of the Mandatory Standard SI 1458 part 2.2, dealing with hot finished structural steel hollow sections. This draft revision adopts the European Standard EN 10219-2: May 2019, with a few changes appearing in the standard's Hebrew section.</p> <p>The main changes with respect to the previous edition are listed below:</p> <ul style="list-style-type: none"> · Adds new requirements for elliptical hollow sections; · Removes Annex A concerning the additional tolerances for piling tubes; · Adds sub-section 5.2; · Changes Table 3 dealing with the length tolerances for exact length; <p>Adds to section 7.1 a new paragraph.</p>	19/08/2022

Motor vehicles, trailers, two- and three-wheeled vehicles, quadricycles, agricultural and forestry vehicles, systems, components, technical units and engines for use in non-road mobile machinery.

HS Chapter 40 -Rubber and articles thereof

HS Chapter 84 -Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof

HS Chapter 85 -Electrical machinery and equipment and parts thereof; sound recorders and reproducers, television image and sound recorders and reproducers, and parts and accessories of such articles

HS Chapter 87 -Vehicles other than railway or tramway rolling stock, and parts and accessories thereof

HS Chapter 94 -Furniture; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings; luminaires and lighting fittings, not elsewhere specified or included; illuminated signs, illuminated nameplates and the like; prefabricated buildings

The Road Vehicles and Non-Road Mobile Machinery (Type-Approval) (Amendment and Transitional Provisions) (EU Exit) Regulations 2022.;

Draft legislation making amendments to domestic legislation governing the type-approval of road vehicles, motorcycles, agricultural vehicles, and engines for non-road mobile machinery. The draft is fully developed but not final. Primarily it establishes a permanent type-approval scheme for passenger and goods vehicles and their trailers in Great Britain replacing the provisional scheme in place since 1st January 2021 and due to end on 31st December 2022. The legislation does not change the technical requirements vehicles will have to meet to obtain approval. The amendments are primarily to correct legal deficiencies, such as references to EU member states, the EU and its institutions which no longer apply in Great Britain, in EU legislation retained in domestic law at the end of 2020. In addition, those functions previously exercised by the EU Commission will be amended, bringing them under the control of the UK government where appropriate. The permanent scheme will be optional for manufacturers seeking approval when the legislation comes into force and will then become mandatory from 1st July 2023 for new vehicle types. It will also apply to those with approval issued under the existing provisional scheme as those approvals expire after 1st July 2023. In addition, there are a number of transitional provisions for the continued use of approvals issued to EU regulations. The legislation also extends existing provisional schemes for motorcycles and agricultural vehicles that are due to expire on 31st December 2022 and must be extended beyond that date to enable the continued supply of these products and enforcement action to address non-compliance. These schemes will continue to function as they do now, and no changes are proposed to the technical requirements applicable under them. In addition, provisional approval schemes for road vehicle trailers, components, and engines for non-road mobile machinery are proposed. These schemes will function in the same way as those for motorcycles and agricultural vehicles.

G/TBT/N/EU/903 22/06/2022	European Union	<p><i>Electronic components in general (ICS code(s): 31.020)</i></p> <p>Draft Commission Delegated Directive amending, for the purposes of adapting to scientific and technical progress, Annex III to Directive 2011/65/EU of the European Parliament and of the Council as regards an exemption for hexavalent chromium as an anticorrosion agent in gas absorption heat pumps;</p> <p>This draft Commission Delegated Directive concerns applications for a specific and temporary exemption from the RoHS 2 (Directive 2011/65/EU) substance restrictions. The criteria for a new exemption are met and it is proposed to grant an exemption in Annex III of that Directive.</p>	21/08/2022
G/TBT/N/EU/904 22/06/2022	European Union	<p><i>Biocidal products and treated articles treated with or incorporating biocidal products</i></p> <p>Draft Commission Implementing Regulation approving L-(+)-lactic acid as an existing active substance for use in biocidal products of product-type 6 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council;</p> <p>This draft Commission Implementing Regulation approves L(+) lactic acid as an active substance for use in biocidal products of product-type 6. It contains rules on the placing on the market of treated articles.</p>	21/08/2022
G/TBT/N/ISR/1260 22/06/2022	Israel	<p><i>Toilet soap (HS code(s): 34011); (ICS code(s): 71.100.70)</i></p> <p>SI 240 -Toilet soap;</p> <p>The requirements of the existing Mandatory Standard, SI 240, dealing with toilet soap, shall be declared voluntary. This declaration aims to remove unnecessary obstacles to trade and lower trade barriers.</p>	21/08/2022
G/TBT/N/ISR/1261 22/06/2022	Israel	<p><i>Preserved tomato products (HS code(s): 2002); (ICS code(s): 67.080.20)</i></p> <p>SI 730 -Preserved tomato products;</p> <p>Revision of the Mandatory Standard SI 730, dealing with preserved tomato products. This draft revision adopts the Codex Alimentarius Standard 13-1981 (Adopted in 1981. Revised in 2007. Amended in 2013, 2017), with a few changes appearing in the standard's Hebrew section. The major differences between the old version and this new revised draft standard are as follow:</p> <ul style="list-style-type: none"> • Adds a reference to The Codex general standard for fruit juices and nectars (CODEX STAN 247-2005); • Replace the reference to Israel Mandatory Standard SI 52 dealing with fruit juices and concentrated fruit; • Adds to section 3.2.2 dealing with size or wholeness, a remark relating to the calculation of product weight after filtering; • Adds to section 3.2.3 dealing with defects and allowances, a clarification relating to defects tolerance; • Changes the normative reference to apply Israel's laws and regulations; • Changes in section 7.1.4 dealing with the minimum drained weight, the requirement for the product's weight after drainage. 	21/08/2022
G/TBT/N/UGA/1606 22/06/2022	Uganda	<p><i>Wood-polymer composites</i></p> <p>DUS 2269:2022, Composites made from cellulose-based materials and thermoplastics (usually called wood-</p>	21/08/2022

polymer composites (WPC) or natural fibre composites (NFC)) Specifications for decking profiles and tiles, First edition;

This Draft Standard specifies the characteristics of decking profiles and tiles made from cellulose-based materials and thermoplastics, usually called wood-polymer composites (WPC) or natural fibre composites (NFC), for external use.

This standard is applicable to extruded profiles but also to tiles manufactured by other plastics processing techniques, e.g. injection moulding.

It is not applicable to kits (i.e. support rail profiles, cover strip profiles and hardware) which are out of the scope of this standard.

NOTE: For editorial reasons, the abbreviation "WPC" is used for "composites made from cellulose-based materials and thermoplastics".

This standard on Preserved eggs-in-shell aims to facilitate economic exchanges between countries and will contribute to the availability of quality products for the African population. It will contribute to the protection of consumers' health.	22/08/2022
G/TBT/N/UGA/1615 23/06/2022	Uganda	- <i>Other : (HS code(s): 04089); Poultry and eggs (ICS code(s): 67.120.20), Hen eggs products</i> DUS DARS 1203:2022, Hens egg products— Specification, First Edition; This Draft Uganda Standard specifies quality and safety requirements, sampling and test methods for products made from eggs obtained from hens of the species Gallus gallus intended for use in the manufacture of food for human consumption.	22/08/2022
G/TBT/N/GBR/49 23/06/2022	United Kingdom	<i>Products in scope can range from machinery goods and electronics devices to recreational craft, lifts, pressure equipment, and personal protective equipment among other product types covered by the European conformity marking (CE mark in most cases but also reversed epsilon). Such products are included within, but are not limited to, the following HS codes: 36, 39, 42, 63, 64, 65, 70, 73, 76, 84, 85, 86, 87, 88, 89, 90, 91, 94, 95, 96. More detail on product coverage can be found in the relevant legislation outlined in annex A of the document accompanying this notification.</i> The Product Safety (Amendment) Regulations 2022.; This measure will allow completed conformity assessment activities for CE marking undertaken before the end of 2022	22/08/2022

to be valid for manufacturers to use as a basis for UKCA, for the duration of the certificate issued or until 31 December 2027 (whichever is shorter). It will also allow ongoing activities related to that completed conformity assessment activity (e.g. annual inspections) to continue for the duration of the certificate issued or until 31 December 2027 (whichever is shorter).

The measure will also extend current legislation allowing importer information and the Great Britain conformity marking (generally UKCA) to be added to products using a label or accompanying document, rather than being physically marked on the product itself, until 31 December 2025.

Producto eléctrico Orilladora.

23/08/2022

Proyecto de Protocolo de Análisis y/o Ensayos de Seguridad de Orilladoras.;

El presente protocolo establece el procedimiento de certificación de Seguridad para el producto eléctrico Orilladora, diseñada principalmente para su uso en la casa o para fines similares, de alimentación eléctrica monofásica, utilizada por un operador de pie para cortar el césped, cuya tensión nominal no sea superior a 250 V para c.a. o 50 V para c.c. de acuerdo con el alcance y campo de aplicación de la IEC62841-4-4:2014.

No aplica a:

- Maquinas tipo tijeras o recortadoras de césped y recortadores de borde de césped con medios de corte distinto de los descritos anteriormente.
- Recortadoras de césped o recortadores de borde de césped autopropulsadas.
- Recortadoras de césped o recortadores de borde de césped que no tengan una distancia mínima de 600mm entre el control de los medios de corte y el cabezal de corte.
- Recortadoras equipadas con baterías que tienen que ser removidas para cargar. Sin embargo, para las Recortadoras con baterías integradas, aplica el Anexo B.

Transformadores y fuentes de alimentación para juguetes.

23/08/2022

Proyecto de Protocolo de Análisis y/o Ensayos de Seguridad de Transformadores y fuentes de alimentación para juguetes.;

El presente protocolo establece el procedimiento de certificación de Seguridad para los transformadores y fuentes de alimentación para juguetes, de uso interior y exterior, de acuerdo con el siguiente alcance: Transformadores estacionarios y portátiles, monofásicos, enfriados por aire (natural o forzado), para juguetes y fuentes de alimentación que incorporen transformadores para juguetes, que tengan un voltaje de suministro nominal que no exceda los 250 V CA, un suministro nominal y frecuencia de operación interna que no exceda los 500 Hz, una salida nominal que no exceda los 200 VA y una corriente nominal de salida que no exceda los 10 A.

All products and commodities subject to Mandatory Standards 23/08/2022

Import and Export Decree (Import Groups), 5782-2022;

The Minister of Economy and Industry had signed the Israel Import and Export Decree (Import Groups). This Decree replaces a previous publication as notified in G/TBT/N/ISR/1184, updates Israel's Import Groups Regime, and eases the conformity assessment requirements for imported products subject to Israel Mandatory Standards.

There are currently about 500 Mandatory Standards in Israel (excluding food) subject to this regulatory import regime. These standards are divided into four import groups according to the products' potential risk:

- Group 1 - Highest risk level: Requires type and shipment approvals;
- Group 2 - Intermediate risk level: Requires compliance with two conditions: Type approval and Importer's declaration of conformity for each shipment;
- Group 3 - Low level of danger: Requires only an importer's declaration of conformity for each shipment;
- Group 4 - Goods intended solely for industrial use: Requires prior exemption according to section (2)C(2) of the Free Import Decree.

The Decree was published and entered into force on 1 June 2022.

The commissioner of Standardization will publish an updated list of Mandatory Standards once a year, divided into the four Imports Groups.

Commodities subject to Mandatory Standards

23/08/2022

• **Standards Decree (Replacement of the third Annex to the Standards Law) 5782-2022;**

• **Director Order to the list of Mandatory Standards applicable to commodities under the Standards Law.**

Following the new import regime notified in G/TBT/N/ISR/1216 and G/TBT/N/ISR/1219 on 26 August 2021, the standards law and related legislation were amended by the following:

• Standards Decree (Replacement of the third Annex to the Standards Law) 5782-2022;

• Director Order to the list of Mandatory Standards applicable to commodities under the Standards Law.

The new import regime allows the import of commodities complying with International/Foreign Standards, which were adopted as Israeli standards, to be based on an importer's declaration of conformity. According to the reform, the importer may choose to either issue a DoC to the applicable Israeli Mandatory Standards or to issue a DoC to relevant international/foreign standards, with an attachment of documents proving compliance with those standards. For additional information relating to the reform please see:

<https://www.gov.il/he/departments/topics/standardization-import-reform/govil-landing-page>

The Standards Decree (Replacement of the third Annex to the Standards Law) 5782-2022 details the list of all Israel Mandatory Standards that are not approved for import according to compliance with International/Foreign Standards, whether in full or with special conditions applied to some of the products under each standard's scope (i.e. the 'Negative List').

The Director Order to the list of Mandatory Standards applicable to commodities under the Standards Law includes the list of all Israel Mandatory Standards that are approved for import according to compliance with International/Foreign Standards (i.e. the 'Positive List').

Birds' eggs, in shell, fresh, preserved or cooked. (HS code(s): 0407); Poultry and eggs (ICS code(s): 67.120.20)
DUS DARS 1199: 2022, Edible eggs-in-shell — Specification and grading, First Edition;

23/08/2022

1.1 This Draft Uganda Standard specifies safety and quality requirements method of sampling and test methods for edible hen eggs in shell intended for human consumption.

1.2 This standard applies to hen eggs-in-shell fit for direct human consumption and for use in the food and/or non-food industries.

1.3 All eggs must originate from laying hens or laying hens of breeding stock kept on farms regularly operated under the applicable regulations pertaining to food safety and inspection.

1.4 Interior egg quality specifications for these standards are based on the apparent condition of the interior contents of the egg as it is twirled before the candling light. Any type or make of candling light may be used that will enable the particular grader to make consistently accurate determination of the interior quality of shell eggs. It is desirable to break out an occasional egg and by determining the Haugh unit value of the broken-out egg, compare the

		broken-out and candled appearance, thereby aiding in correlating candled and broken-out appearance.

Greenhouse Gas Reporting Rule; Environmental protection (ICS code(s): 13.020); Air quality (ICS code(s): 13.040)

22/08/2022

Revisions and Confidentiality Determinations for Data Elements Under the Greenhouse Gas Reporting Rule; 1.1

Proposed rule -The Environmental Protection Agency (EPA) is proposing to amend specific provisions in the Greenhouse Gas Reporting Rule to improve the quality and consistency of the data collected under the rule, streamline and improve implementation, and clarify or propose minor updates to certain provisions that have been the subject of questions from reporting entities. These proposed changes include revisions to improve the existing calculation, recordkeeping, and reporting requirements by incorporating updates to existing emissions estimation methodologies and providing for collection of additional data to understand new source categories or new emission sources for specific sectors. The proposed changes would improve understanding of the sector-specific processes or other factors that influence greenhouse gas emissions rates, improve verification of collected data, and com

plement or inform other EPA programs. The EPA is also proposing revisions that would improve implementation of the Greenhouse Gas Reporting Rule such as updates to applicability estimation methodologies, providing flexibility for or simplifying calculation and monitoring methodologies, streamlining recordkeeping and reporting, and other minor technical corrections or clarifications. This action also proposes to establish and amend confidentiality determinations for the reporting of certain data elements to be added or substantially revised in these proposed amendments. Further, this action includes a request for comment to solicit information that may aid in potential future revisions to the Greenhouse Gas Reporting Rule (GHGRP).

22/08/2022

Event Data Recorders;

Notice of proposed rulemaking -NHTSA is proposing to amend its regulations regarding Event Data Recorders (EDRs) to extend the EDR recording period for timed data metrics from 5 seconds of pre-crash data at a frequency of 2 Hz to 20 seconds of pre-crash data at a frequency of 10 Hz (i.e., increase from 2 samples per second to 10 samples per second). This NPRM begins the process of fulfilling the mandate of the Fixing America's Surface Transportation Act (FAST Act) to establish the appropriate recording period in NHTSA's EDR regulation.
