Regulations Amending the Energy Efficiency Regulations, 2016 (Amendment 18)

The Energy Efficiency Regulations, 2016(the Regulations) prescribe energy efficiency standards for residential, commercial and industrial energy-using products. They also prescribe labelling requirements for certain products to disclose and compare the energy use of a given product model relative to others in their category.

The Regulations are amended regularly to introduce or update energy efficiency and testing standards. This proposed Amendment would add or update energy efficiency and testing standards for several newly and currently regulated energy-using products to harmonize with the United States. Also, this Amendment would expand the use of ambulatory incorporation by reference (to U.S. standards or NRCAN technical standards documents), as well as position NRCAN to exercise Ministerial Regulations for more energy-using products to adjust quickly to changes and maintain harmonization in the future, where appropriate. Furthermore, the Amendment would include transitional provisions for specific products during which regulated parties would have the opportunity, on a voluntary basis, to comply more quickly with the new requirements (voluntary early compliance). Finally, the Amendment would introduce more stringent energy efficiency standards than in the United States for some products to assist with achieving net-zero by 2050.

Aliments emballés contenant des édulcorants et pouvant être consommés par les enfants. 25/08/2024

CONSULTA PÚBLICA PARA LA MODIFICACIÓN DEL REGLAMENTO SANITARIO DE LOS ALIMENTOS, DECRETO SUPREMO N° 977/96 DEL MINISTERIO DE SALUD INTRODUCE NUEVO ARTÍCULO 120TER(CONSULTATION PUBLIQUE SUR LA MODIFICATION DU RÈGLEMENT SANITAIRE SUR LES PRODUITS ALIMENTAIRES,DÉCRET SUPRÊME N° 977/96 DU MINISTÈRE DE LA SANTÉ, INTRODUISANT UN NOUVEL ARTICLE 120TER),

Compte tenu des éléments de preuve récemment présentés par l'Organisation mondiale de la santé (OMS) sur les effets négatifs de la consommation d'édulcorants ainsi que des données nationales démontrant la consommation élevée de ces produits par les enfants, le Ministère de la santé (MINSAL) estime qu'il est impératif que les parents et les personnes chargées de garder des enfants disposent des renseignements nécessaires pour prendre des décisions éclairées sur la consommation d'édulcorants. Le MINSAL a ainsi jugé nécessaire d'établir dans la réglementation

nationale qu'un message d'avertissement doit figurer sur l'étiquetage avant des aliments contenant de telles substances. Conformément au principe de précaution, l'affichage obligatoire d'un message sur l'étiquette des produits contenant des édulcorants est prévu, dont voici la teneur: "CONTIENT DES ÉDULCORANTS. ÉVITER LA CONSOMMATION PAR DES ENFANTS". Le Ministère de la santé invite le public à participer à la consultation publique notifiée, afin de recueillir des avis et des suggestions qui contribueront à l'amélioration de cette initiative réglementaire, dans le but de protéger la santé de la population chilienne, en particulier celle des enfants.

Key Amendments to the Mandatory Energy Labelling Scheme (MELS) and Minimum Energy Performance Standards (MEPS) Requirements under the Energy Conservation Act (ECA); 25/08/2024

Singapore's Mandatory Energy Labelling Scheme (MELS) and Minimum Energy Performance Standards (MEPS), implemented in 2008 and 2011 respectively, are policy measures to raise the average energy efficiency of regulated goods used in Singapore. In line

with this objective, MELS and MEPS will be extended to all water heaters and commercial storage refrigerators from 1 April 2025.

Improving energy efficiency of products to reduce energy consumption and contribute to Singapore's efforts to reduce greenhouse gas emissions arising from the use of such products. ; Protection of the environment

In particular, it defines in a clear and precise manner the permitted oenological practices including the methods for sweetening wines, the limits on the use of certain substances that may be used for wine-making and the conditions for using some of those substances for wine-making. It also aligns certain provisions with relevant international standards, namely the International Code of Oenological Practices and the International Oenological Codex of the International Organisation of Vine and Wine (OIV), as regards its Annex I Part A.The draft Commission Delegated Regulation amending Delegated Regulation (EU) 2019/934 introduces new oenological practices on the basis of resolutions adopted in 2022 and 2023 by the OIV. It also provides clarifications on, and improves consistency of, some of the existing provisions.Please note that only the provisions related to technical standards, definitions and labelling fall under the scope of the TBT Agreement. Elements pertaining to intellectual property rights, in particular to the application and/or implementation of Geographical Indications (GIs) are included in this notification as part of a legislative package but clearly falling outside the scope of the TBT agreement.</p>	26/08/2024

Draft Commission Regulation on the use of bisphenol A (BPA) and other bisphenols and bisphenol derivatives with harmonised classification for specific hazardous properties in certain materials and articles intended to come into contact with food, amending Regulation (EU) No 10/2011 and repealing Regulation (EU) 2018/213;

This Regulation prohibits the use of bisphenol A (BPA) in the manufacture of those food contact materials and articles of which it may be a component, including adhesives, rubbers, ion-exchange resins, plastics, printing inks, silicones and varnishes and coatings. Additionally, it

- allows the use of BPA in the manufacture of two specific food contact applications, by derogation and subject to a prohibition on the migration of BPA from the articles into food;
- prohibits the residual presence in food contact materials and articles that have been manufactured using bisphenols or bisphenol derivatives;
- prohibits the use of other bisphenols or bisphenol derivatives for which a harmonised classification of carcinogenic, mutagenic, reprotoxic category 1A or 1B or endocrine disrupting category 1, is listed in annex VI to Regulation (EC)M No 1272/2008 and applies, except where a derogation may be given;
- lays down rules concerning compliance and testing;
- sets out transitional periods for the application of the requirements.

27/08/2024

Draft Resolution of the Cabinet of Ministers of Ukraine "On Amendments to the Procedure for Issuing or Refusing to Issue, Re-issuing, Cancellation of Confirmation for Imports into Ukraine and Exports from Ukraine of Seeds and Planting Material Samples of Plant Varieties and Control over their Use";

The draft Resolution provides for: -regulation of administrative proceedings for business entities to obtain confirmation for import into Ukraine of samples of seeds and planting material of plant varieties not listed in the State Register of Plant Varieties for breeding, research and exposure, and for export from Ukraine of such samples. This includes ensuring the rights of these business entities to participate in administrative proceedings initiated by the State Service of Ukraine on Food Safety and Consumer Protection upon their request; -granting the Ministry of Agrarian Policy and Food the authority to determine the quantity of seed and planting material samples allowed for import for breeding, research, and exposure purposes.
