G/TBT/N/CAN/700 03/07/2023	Canada	<p><i>Motor vehicles (ICS: 43.020, 43.080); Motor vehicle tires; Motor Vehicle Restraint Systems and Booster Seats.</i></p> <p>Regulations Amending Certain Regulations Made Under the Motor Vehicle Safety Act (Recall Information);</p> <p>The proposed regulatory amendments would require companies that issue a safety recall to also publish safety recall-related information on their website, in a timely manner, with the goal of increasing recall awareness and completion. The proposed amendments would standardize the availability and the type of information, provide a timeline by which such information must be made available, and facilitate Canadians' ability to find recall information —especially in cases where information about the current vehicle or vehicle equipment owner is missing, erroneous, or incomplete. The proposed amendments would also require vehicle companies designated by the Minister of Transport (the Minister) to include an online search tool that would provide safety recall information that is specific to one vehicle, using the unique 17-character vehicle identification number (VIN). In other words, the proposed amendments would require that certain companies provide a VIN lookup tool on their websites.</p>	31/08/2023

Updated Guidelines on the Application for License to Operate of Health Product Establishments with the Food and Drug Administration;

The regulation aims to introduce technical procedures on inspection and updated list of documentary requirements for the issuance of License to Operate aligned with international standards and automation of FDA licensing application systems. It also intends to repeal Administrative Order No. 2020-0017 (Revised Guidelines on the Unified Licensing Requirements and Procedures of the Food and Drug Administration Repealing AO No. 2016-0003).The regulation provides the list of updated documentary requirements for LTO applications, in addition to other technical requirements that shall be presented during inspection of the FDA-covered establishments.Further, the FDA's intention to comply with international standards in terms of health shall be institutionalized in the agency's regulatory process. Hence, compliance with the World Health Organization –Global Benchmarking Tool (WHO-GBT) is necessary.

<p>G/TBT/N/AUS/157 07/07/2023</p>	<p>Australia</p>	<p><i>Bivalve molluscs sold in Australia (both imported and domestically produced)</i></p> <p>Assessment for Application A1243—harmonisation of marine biotoxin standards for bivalve shellfish;</p> <p>To align with international standards and to protect public health and safety, FSANZ has drafted an amendment to the Australia New Zealand Food Standards Code to amend the maximum levels (MLs) for diarrhetic shellfish toxins (DST) and paralytic shellfish toxins (PST) with the equivalent MLs set by the Codex Alimentarius Commission (Codex) and with those set in New Zealand. MLs for marine biotoxins are necessary in order to protect public health and safety, as marine biotoxins cause serious and sometimes long term toxicity in humans. The proposed changes are: Lower the ML for DST, expressed as okadaic acid equivalent, from 0.20 to 0.16 mg/kg in bivalve molluscs. Define PST in mg saxitoxin dihydrochloride equivalents/kg rather than mg saxitoxine equivalents/kg. The net effect of this change to a</p>	<p>05/09/2023</p>

more specific reporting unit is to lower the ML for PST from 0.8 to approximately 0.6 mg/kg.

G/TBT/N/USA/2015 07/07/2023	United States of America	<p><i>Automatic emergency braking systems for vehicles with a gross vehicle weight rating greater than 4,536 kilograms (10,000 pounds); Quality (ICS code(s): 03.120); Braking systems (ICS code(s): 43.040.40); Commercial vehicles (ICS code(s): 43.080)</i></p> <p>Heavy Vehicle Automatic Emergency Braking; AEB Test Devices;</p>	05/09/2023

Notice of proposed rulemaking -This NPRM proposes to adopt a new Federal Motor Vehicle Safety Standard (FMVSS) to require automatic emergency braking (AEB) systems on heavy vehicles, i.e., vehicles with a gross vehicle weight rating greater than 4,536 kilograms (10,000 pounds). This notice also proposes to amend FMVSS No. 136 to require nearly all heavy vehicles to have an electronic stability control system that meets the equipment requirements, general system operational capability requirements, and malfunction detection requirements of FMVSS No. 136. An AEB system uses multiple sensor technologies and sub-systems that work together to sense when the vehicle is in a crash imminent situation and automatically applies the vehicle brakes if the driver has not done so or automatically applies more braking force to supplement the driver's applied braking. This NPRM follows NHTSA's 2015 grant of a petition for rulemaking from the Truck Safety Coalition, the Center for Auto Safety, Advocates for Highway and Auto Safety and Road Safe America, requesting that NHTSA establish a safety standard to require AEB on certain heavy vehicles. This NPRM also responds to a mandate under the Bipartisan Infrastructure Law, as enacted as the Infrastructure Investment and Jobs Act, directing the Department to prescribe an FMVSS that requires heavy commercial vehicles with FMVSS-required electronic stability control systems to be equipped with an AEB system, and also promotes DOT's January 2022 National Roadway Safety Strategy to initiate a rulemaking to require AEB on heavy trucks. This NPRM also proposes Federal Motor Carrier Safety Regulations requiring the electronic stability control and AEB systems to be on during vehicle operation.
