The content and methods provided in the proposed regulation are deemed “clear and reasonable” by the lead agency for purposes of the Act. The proposed warning content is also intended to provide balanced and understandable information to individuals who may be exposed to glyphosate. This proposed rulemaking would add Sections 25607.48 and 25607.49 to the Title 27, Article 6 Clear and Reasonable Warning regulations. The proposed regulations would provide safe harbor guidance for businesses that cause consumer product exposures to glyphosate that require a warning. The new regulation would further the “right-to-know” purposes of the Act and provide warning language tailored for these exposures. Businesses who choose to provide the safe harbor warning language for such exposures would comply with the Act, because the content and methods provided in the regulation are deemed “clear and reasonable” by the lead agency for purposes of the Act. The warning content is intended to provide balanced and understandable information to individuals who may be exposed to glyphosate at levels requiring warning.</p>	07/09/21

The SRTT is used in those standards and regulations as a baseline tire to rate tire treadwear, define snow tires based on traction performance, and evaluate pavement surface friction. This proposed rule is necessary because the only manufacturer of the currently referenced SRTT ceased production of the tire. Referencing a new SRTT ensures the availability of a test tire for testing purposes.</p>	07/09/21
