| G/TBT/N/IND/290 07/08/2023 | India | <i>Sports Goods - Rings used in gymnastics, Putting shots, Soft balls, Steeplechase Hurdles, Barbell set, Shuttlecocks, Throwing Hammers.</i> Sports Goods (Quality Control) Order, 2023 Sports Goods (Quality Control) Order, 2023As per IS 2463:2022, title of Indian Standard "Rings used in gymnastics" consist of Swing rope- Flexible Steel Wire rope of 6 mm diameter, Tension Rope- steel wire rope of 6 to 7 mm diameter; Uprights and Crossbar of Frame- Heavy grade galvanized mild steel tubing of 40 mm nominal diameter.As per IS 415:2022 title of Indian Standard "Shuttlecocks" is a lightweight conical object with a rounded often rubber-covered nose that is used in badminton. It is classified into two Grades: Grade 1/ Grade 2.As per IS 4386:2022 title of Indian Standard "Putting shots" are classified into following types based on requirements of different age group: WU18, WU20/SW, BU18, BU20, SM.As per IS 5460:2022 title of Indian Standard "Soft balls" are classified as based on material of core: Very Soft PU, Soft PU, Cushioned cookwood, Compressed cookwood and COR 47; Based on usage: Type 1, Type 2, Type 3.As per IS 12425:2022 title of Indian Standard "Steeplechase Hurdles" are classified into following varieties based on requirements of different height: Steeplechase Hurdles for Women and Steeplechase Hurdles for Men.As per IS 4630:2022 title of Indian Standard "Barbell Set" is a bar with adjustable weighted disks attached to each end that is used for exercise and in weight lifting.As per IS 4385:2022 title of Indian Standard "Throwing Hammers" are classified into following types based on requirements of different age group: WU18, WU20/SW, BU18, BU20, SM. | 06/10/2023 |
| G/TBT/N/IND/291 07/08/2023 | India | <i>Legal Metrology- Material Measures for length – Woven metallic and glass fibre tape measures and steel tape measures.</i> Legal Metrology – Material measures of length (Quality Control) Order, 2023 Legal Metrology – Material Measures for length (Quality Control) Order, 2023A measuring tape is a device used to measure length or distance. It consists of a ribbon of cloth, plastic, fibre glass, or metal strip with linear measurement markings. It is a common | |

measuring tool. Its design allows for a measure of great length to be easily carried in pocket or toolkit and permits one to measure around curves or corners. Measuring tapes are available in different lengths and can be made of different materials such as linen, woven metallic, fiber glass and steel etc. The metallic woven tape is an improved version of linen tape. Brass or copper made wires are used as reinforcement for the linen material. Hence, it is more durable than normal linen tape. A brass ring is provided at the end of the tape which is included in the length of the tape. In Glass fiber tapes, fiberglass, which is a material of high strength and flexibility, is used as the base raw material for the tape. These tapes are suitable for taking measurements in all conditions. A steel tape is made of steel or stainless steel. It consists of a steel strip of 6mm to 16mm wide. Meters, decimeters, and centimeters are graduated in the steel strip. Steel tapes are housed in metal case with automatic winding device.

| G/TBT/N/RWA/914 08/08/2023 | Rwanda | (HS code(s): 2713) DRS 395-1: 2023, Bitumen and bituminous binders — Part 1: Terminology This Draft Rwanda Standard defines terms for paving or industrial bitumen of various types and binders derived from bitumen. It does not extend to non-petroleum “hydrocarbon” binders such as coal tar and its derivatives or to natural asphalts. However, some definitions are given for some excluded materials and related terms. The corresponding terms were introduced only when they appeared in a definition of a product or process and when their definition was found necessary for understanding or for avoiding any ambiguity. NOTE The types covered by this Standard are shown in Annex A. The figure also shows a clear distinction between materials inside and outside the scope of this standard. paragraph. | 07/10/2023 |

This technical regulation covers general principles, responsibilities of Turkish Ministry of Environment, Urbanization and Climate Change, responsibilities of Turkish Environment Agency, responsibilities of General Directorate of Minting and Printing (Operator of Deposit Information Management | 07/10/2023 |

System (DBYS)), responsibilities of Deposit Field Management System Operator. Additionally, this regulation includes the obligations of all stakeholders in the process from the placing on the market to the recycling of the packages within the scope of the mandatory deposit management system. This technical regulation covers beverage containers and product groups included in the system, and these are listed below.

Annex 1: Beverage Containers (Volume included: 0,10-3,01 L)

| | | | | | |
|------------------------|----------------------|---------------------------------------|----------------------------------|---------------------------------------|-----------------------------------|
| Class 1: Glass Bottles | Class 2: PET Bottles | Class 3: Aluminium Bottles/Containers | Class 4: HDPE Bottles/Containers | Class 5: Composite Bottles/Containers | Class 6: Other Bottles/Containers |
|------------------------|----------------------|---------------------------------------|----------------------------------|---------------------------------------|-----------------------------------|

Annex 2: Product Groups (Beverages/Foods)

Class 1:-Soft drinks (coke, flavored and/or fruity drinks, flavored and/or fruity natural mineral drinks, flavored water, tonic, other beverages, etc.)-Drinking and mineral waters-Natural mineral waters-Alcoholic and non-alcoholic beers, including aromatized-Malt drinks-Energy drinks-Sports drinks

Class 2:-Fruit juices/nectars with a fruit ratio of 50% or less

Class 3:-Juices/nectars with a fruit ratio above 50%

Class 4:-Milk and drinkable dairy products

Class 5:-Wines, distilled alcoholic beverages-Other/unspecified beverages-Other/unspecified liquid foods

By those who put on the market the products defined as 1st class to be placed on the market with packages defined as 1st, 2nd and 3rd class in Annex-1 and Annex-2 of the The Procedures and Principles Regarding Mandatory Deposit Management System Applications; It is obligatory to start the registration process through DBYS as of 1/1/2023 and to start placing their registered packaged products on the market as of 1/8/2023. It is forbidden to put on the market the packages that have not been registered via DBYS as of 1/1/2024. Transition dates for registration procedures and placing on the market with a deposit for products defined as 2nd, 3rd and 4th class in Annex-2, which will be placed on the market in packages included in Annex-1 of The Procedures and Principles Regarding Mandatory Deposit Management System Applications, shall be separately regulated and published by the Turkish Environment Agency. This technical regulation is also covers labelling and marking standards of included products, principles regarding the use of Deposit Management System (DYS) logo and barcode, principles regarding the physical requirements of packaging. This technical regulation covers registration procedure of Packaging and Packaging/Label Manufacturers, registration procedure and minimum criterias of return points, principles and registration procedures for machinery and equipment to be used within the scope of the system, principles and registration procedures regarding verification facilities. It also includes considerations regarding the Deposit Field Implementation Plan and financial matters of the system. With this technical regulation, there will be international standardization in the use of barcode and logo for the product groups within the scope. Thus,

These technical corrections correct or clarify specific provisions in the existing hazardous waste regulations that were promulgated in the Hazardous Waste Generator Improvements rule, the Hazardous Waste Pharmaceuticals rule, and the Definition of Solid Waste rule. This rule also makes other minor corrections that fall within the same sections of the hazardous waste regulations but are independent of these three rules. Examples of the types of corrections being made in this rule include, but are not limited to, correcting typographical errors, correcting incorrect or outdated citations, making minor clarifications, and updating addresses. In the "Rules and Regulations" section of this Federal Register, we are making these technical corrections as a direct final rule without a prior proposed rule because we view this as a noncontroversial action and anticipate no adverse comment. In the preamble to the direct final rule, we have explained our reasons for taking this action without a prior proposed rule. If we receive no adverse comment, we will not take further action on this proposed rule.</p> | <p>10/10/2023</p> |
