-Electric instantaneous or storage water heaters and immersion heaters (HS code(s): 851610)

Proposal for Amendments to the Legal Inspection Requirements for Water Dispensers and 2 Other Household Electrical Appliances;

The BSMI received reports that dichloromethane exceeding the limit value of "Drinking Water Quality Standards" was found in the drinking water processed by energy water machines, a kind of water filter, posing risk to human health. With a view to protecting consumers from relevant hazards, the BSMI proposes to add "Technical specification for water quality testing of drinking water from water filters (purifiers) commodities" as an additional inspection standard for water dispensers, drinking water suppliers and electric storage tank boiling water heaters. In addition, the scope is proposed to be expanded to cover hydrogen water machine with heating function.

Foods and food ingredients treated with ionising radiation
Draft Order of the Ministry of Health of Ukraine "On Approval of the Requirements for Foods and Food Ingredients Treated with Ionising Radiation";

14/10/2022

The draft Order provides for the approval of the Requirements for foods and food ingredients treated with ionising radiation. Certain provisions of these Requirements also deal with the specifics of the labelling of foods treated with ionising radiation. The adoption of the draft Order will bring the legislation of Ukraine concerning the food safety and quality in line with EU legislation and will facilitate the implementation of Directive 1999/2/EC of the European Parliament and of the Council of 22 February 1999 on the approximation of the laws of the Member States concerning foods and food ingredients treated with ionising radiation and Directive 1999/3/EC of the European Parliament and of the Council of 22 February 1999 on the establishment of a Community list of foods and food ingredients treated with ionising radiation.

Disinfectants

14/10/2022

Draft Law of Ukraine "On Amendments to the Law of Ukraine "On Protection of Population against Infectious Diseases" Regarding the Issue of State Registration of Disinfectants";

The draft Law is aimed at regulating the issues of state registration of disinfectants, improving the procedure for state registration of disinfectants through confirmation of their effectiveness (specific activities) and expert examination of dossiers for disinfectants during their state registration. The draft Law also determines the list of documents to be submitted for state registration and expert examination, the main requirements for the expert report on the results of the examination, the content of the decision on state registration of disinfectants, the grounds for refusal in state registration of a disinfectant. After the draft Law is adopted, Procedure for the state registration of disinfectants will be developed and approved. The Procedure will determine the order of the state registration and re-registration of disinfectants, in particular, requirements to the application for the state registration of disinfection agent, registration dossier and other documents submitted for the

purposes of the state registration of the disinfection agent, research (tests) required for the state registration of disinfection agents, short characteristic of a disinfection agent, leaflet (instruction for use), marking (label), expert conclusion, change of conditions, termination, cancellation of the state registration of disinfection agents, form and procedure for maintaining the State Register of disinfectants.

Electric mains-operated refrigerating appliances with a total volume of more than 10 litres and less than or equal to 1 500 litres

14/10/2022

Draft Resolution of the Cabinet of Ministers of Ukraine "On approval of the Technical Regulation on ecodesign requirements for refrigerating appliances";

Draft of Technical Regulation establishes ecodesign requirements for electric mains-operated refrigerating appliances with a total volume of more than 10 litres and less than or equal to 1 500 litres. The draft of Technical Regulation is developed to ensure compliance with the requirements for ecodesign under the updated EU legislation and fulfilment of Ukraine's obligations on implementation of the EU legislation. The draft is based on Commission Regulation (EU) 2019/2019 of 1 October 2019 laying down ecodesign requirements for refrigerating appliances pursuant to Directive 2009/125/EC of the European Parliament and of the Council and repealing Commission Regulation (EC) No 643/2009. Upon entry into force, Resolution of the Cabinet of Ministers of Ukraine No. 158 of 27 February 2019 "On approval of the Technical Regulation on ecodesign requirements for household refrigerating appliances" (notified as documents G/TBT/N/UKR/137, G/TBT/N/UKR/137/Add.1) will be repealed.

Draft Ministerial Regulation on Room air conditioner : energy efficiency (TIS 2134 –25XX);

The draft ministerial regulation mandates room air conditioner to conform with the standard for Room air conditioner: energy efficiency (TIS 2134 –25XX).

This standard covers the following:

-Room air conditioners with net total cooling capacity not exceeding 18000 W with rated voltage of 250 V for single

phase air conditioners and rated voltage 600 V for multiphase air conditioners, including ducted air conditioners with net total cooling capacity less than 8000 W, intended to operate at external static pressure less than 25 Pa.

-Condensing unit and fan coil unit

This standard does not cover:

-Ducted air conditioners except for the above mentioned.

-Multiple split system air conditioners

-Portable air conditioners

-Air curtains

-Vehicle air conditioners

-Water cooled condenser air conditioners

The Environmental Protection (Single-use Plastic Products) (Wales) Bill;

The introduction of The Environmental Protection (Single-use Plastic Products) (Wales) Bill will make it an offence for a person to supply or offer to supply (including for free), the following commonly littered and unnecessary disposable single-use plastic (SUP) products to a consumer in Wales:

- plates
- cutlery
- drinks stirrers· drinking straws (including attached straws)
- cups made of polystyrene
- takeaway food containers made of polystyrene
- cup and takeaway food container lids made of polystyrene
- plastic-stemmed cotton buds· sticks for balloons· oxo-degradable products
- plastic single-use carrier bags (SUCBs)

Initially proposed in 2020, the scope of the proposals have been expanded to tackle the negative impacts of plastic pollution on our environment, and engagement is on-going to develop the legislation.

G/TBT/N/KEN/1279 18/08/2022	Kenya	<i>Gas supply systems (ICS code(s): 91.140.40)</i> KS 2968-2022 Meter for dispensing liquefied petroleum gas (LPG) from cylinder –Specification; This draft Kenya Standard specifies functional and safety requirements for meter used for dispensing metered amounts of LPG from gas cylinders.	17/10/2022
G/TBT/N/NZL/114 18/08/2022	New Zealand	<i>46 inhibitor substances (as listed in the interim Order in Council).</i> Agricultural Compounds and Veterinary Medicines (Inhibitor Substances) Order 2022. Four pages in English.Agricultural Compounds and Veterinary Medicines (Exemptions and Prohibited Substances) Amendment Regulations 2022. This is an interim Order in Council that declares 46 inhibitor substances as 'agricultural compounds' and enables these substances to be registered under the Agricultural Compounds and Veterinary Medicines Act 1997 (ACVM Act). The Order in Council also provides a definition for what an inhibitor is. In early 2022, the 46 listed inhibitor substances were identified with help from agrichemical companies as being used under this definition.The ACVM Act does not currently provide a pathway for inhibitors to be registered under the Act, because they are considered 'out of scope'. This interim measure responds to requests by agrichemical companies that inhibitors are able to be registered underthe ACVM Act. Consultation with farming groups indicate broad support for inhibitors to be registered under the AVCM Act to increase certainty regarding the use of the substances for inhibiting purposes. Proposed legislation to amend the scope of the ACVMAct to include inhibitors is expected to be introduced to Parliament in late 2022. New Zealand will issue a further TBT notification at that time with an opportunity to comment on the regulatory changes. Any comments received on the interim measure will also be considered as part of this process.Inhibitors that are not listed on the interim Order in Council can continue to be sold and used in New Zealand (subject to them meeting other relevant regulatory requirements such as under the Hazardous Substancesand New Organisms Act 1996).Both the interim Order in Council and Regulations came into force on 18 July 2022. The Regulations provide a transition period of 2 years for the 46 inhibitor substances on the Order in Council.	17/10/2022
G/TBT/N/GBR/52 18/08/2022	United Kingdom	<i>Remote static pulse collar systems where the collar delivers an electric shock to the dog or cat wearing the collar which is triggered remotely by the owner or handler through the use of a handheld remote-control.The HS Code that applies is Electrical machines and apparatus, having individual functions not specified or included elsewhere in this chapter (8543.7090.99).</i> The Animal Welfare (Electronic Collars) (England) Regulations 2022	17/10/2022

These regulations will make provision for preventing the attachment and use of electronic collars on dogs and cats in England. Once the regulations come into force, a person commits an offence if, at any time when the person is responsible for a dog or cat—

- (a) the dog or cat is wearing an electronic collar; and
- (b) the person is in possession of a remote-control device which is designed or adapted for activating the electronic collar remotely.
