G/TBT/N/MEX/546 18/08/2025	Mexico	<i>Aplica en las zonas marinas que forman parte del territorio nacional y, en las zonas marinas donde la Nación ejerza su soberanía y jurisdicción siendo de observancia general y obligatoria para los Regulados que realicen actividades de Prospección Sísmica marina, como un método de Adquisición para el Reconocimiento y Exploración Superficial en el Sector Hidrocarburos.</i> Proyecto de Norma Oficial Mexicana PROY-NOM-021-ASEA-2025, Prospecciones Sísmicas marinas para el Reconocimiento y Exploración Superficial. El presente Proyecto de Norma Oficial Mexicana establece las especificaciones y requisitos técnicos en materia de Seguridad Industrial, Seguridad Operativa y protección al medio ambiente, que deben ser aplicados para la realización de las actividades de Prospección Sísmica marina como parte de las actividades de Reconocimiento y Exploración Superficial del Sector Hidrocarburos, el cual aplicará en las G/TBT/N/MEX/546- 2 -zonas marinas que forman parte del territorio nacional y, en las zonas marinas donde la Nación ejerza su soberanía y jurisdicción, excluyendo las actividades siguientes: I. Prospecciones Sísmicas marinas con objetivos de identificación de riesgo somero, y II. Perfiles Sísmicos Verticales (VSP).Dicho Proyecto considera los siguientes aspectos: a) Mitigar el impacto en la vida e integridad de mamíferos priorizando el orden Cetacea; así como, los órdenes Testudines, Lamniformes y Orectolobiformes listados en la NOM-059-SEMARNAT-2010. b) Especificaciones para la determinación de la Zona de Exclusión. c) Especificaciones para la implementación del método de inicio progresivo. d) Perfil de los Operadores de Especies Protegidas (PSO) y Operadores PAM. e) Especificaciones para la realización de las actividades en materia de SISOPA El cumplimiento de las especificaciones será revisado de forma documental para la obtención del dictamen de Evaluación de la Conformidad y la elaboración del informe integral, garantizando que dicha actividad se lleve a cabo conforme a las especificaciones planteadas.	17/10/2025
G/TBT/N/USA/2233 19/08/2025	United States of America	<i>Nail products containing triphenyl phosphate (TPhP) – including nail coatings and artificial nails; Quality (ICS code(s): 03.120); Environmental protection (ICS code(s): 13.020); Esters (ICS code(s): 71.080.70); Cosmetics. Toiletries (ICS code(s): 71.100.70)</i> isting Nail Products Containing Triphenyl Phosphate (TPhP) at Concentrations Greater Than 250 Parts per Million (ppm) as a Priority Product; Proposed rule - The Department of Toxic Substances Control (DTSC) proposes to amend the California Code of Regulations, title 22, division 4.5, chapter 55, article	22/09/2025

		11, section 69511, and adopt section 69511.10. This proposed amendment pertains to the identification of a Priority Product under the Safer Consumer Products (SCP) Regulations, approved by the Office of Administrative Law (OAL) and filed with the Secretary of State on 28 August 2013 (effective date: 1 October 2013; OAL Regulatory Action Number: Z-2012-07170-04). DTSC proposes to add nail products containing triphenyl phosphate (TPhP) – including nail coatings and artificial nails – as a Priority Product to the Priority Products List. This listing would apply to any nail product containing TPhP as an added ingredient, a residual, or a contaminant.	
G/TBT/N/EU/1152 20/08/2025	European Union	<i>Low and medium power terrestrial wireless broadband systems</i> Draft Commission Implementing Decision on the harmonisation of the 3 800-4 200 MHz frequency band for the shared use by terrestrial wireless broadband systems capable of providing local-area network connectivity in the Union; This draft Commission Implementing Decision aims to designate and harmonise the technical conditions for the shared use of the 3 800 - 4 200 MHz frequency band by low and medium power terrestrial wireless broadband systems for local-area network connectivity in the Union, with a focus on industrial sectors. The technical conditions are laid down in the technical annex.	19/10/2025
G/TBT/N/TPKM/569 20/08/2025	Chinese Taipei	<i>Static converters (HS code(s): 850440)</i> Proposal for Legal Inspection Requirements for PV Inverters ; To achieve net-zero carbon emissions by 2050, it is expected that renewable energy power generation equipment and energy storage systems will gradually be installed not only at outdoor sites but also in indoor households and factories. Considering that the PV inverter is a critical component of energy storage systems, the BSMI proposes to include PV inverters not exceeding 100 kW in the mandatory inspection scope to ensure consumer safety. Two alternative conformity assessment procedures are made available for the choice of applicants, i.e., Registration of Product Certification (RPC) or Type-Approved Batch Inspection (TABI).	19/10/2025
G/TBT/N/THA/787 20/08/2025	Thailand	<i>arbon Steel Tubes for General Structure (ICS 77.140.75)</i> Draft Ministerial Regulation Prescribing Industrial Products for Carbon Steel Tubes for General Structure to Conform to the Standard B.E The draft Ministerial Regulation mandates carbon steel tubes for general structure to conform to the Thai Industrial Standard TIS 107-2566 (2023) Carbon Steel Tubes for General Structure. This standard covers carbon steel tubes with circular, square and rectangular cross-sections, used for engineering, architectural and general structural purposes.	19/09/2025
G/TBT/N/AUS/183 21/08/2025	Australia	☐ Homosalate ☐ Oxybenzone ☐ Benzophenone	05/10/2025

onsultation paper: Proposed amendments to the Poisons Standard in relation to homosalate, oxybenzone and benzophenone;

The Therapeutic Goods Administration (TGA) has initiated a public consultation on proposed amendments to the Poisons Standard, aimed at enhancing the regulation of certain sunscreen ingredients and related substances. These proposals have been developed to ensure the safe use of chemicals in therapeutic and cosmetic sunscreens, while maintaining consistency across Australian jurisdictions. The consultation focuses on three substances:

- ☐ Homosalate
- ☐ Oxybenzone
- ☐ Benzophenone (as an impurity/degradant)

These substances are being considered for rescheduling based on emerging scientific evidence and international regulatory trends. The proposed amendments include options for:

- ☐ restrictions on the maximum concentration of these substances in sunscreens
- ☐ restrictions based on application to parts of the body
- ☐ restrictions based on age of the consumer

The proposed amendments have been referred to the Joint Advisory Committee on Medicines Scheduling (ACMS) and the Advisory Committee on Chemicals Scheduling (ACCS) at a meeting to be held on 17 September 2025. Following the public consultation and subsequent recommendations and advice from the Joint ACMS-ACCS, the delegate of the Secretary of the Department of Health, Disability and Ageing will make an interim decision. The Interim Decision that may incorporate one or more of the options (with modification) for each substance. Neither the TGA nor the Delegate have formed a view at this time as to which options should be implemented or are preferred. The consultation was open to public comment until 12 August 2025, and all submissions will inform the delegate's interim decision.

REACTIVOS DE DIAGNÓSTICO IN VITRO PARA CALIFICACIÓN MICROBIOLÓGICA DE DONACIONES EN SERVICIOS DE SANGRE, QUE SE INDICAN. 20/10/2025

ROYECTO REGULATORIO, INCORPORA A LOS REACTIVOS DE DIAGNÓSTICO IN VITRO PARA CALIFICACIÓN MICROBIOLÓGICA DE DONACIONES EN SERVICIOS DE SANGRE QUE SE INDICAN, AL RÉGIMEN DE CONTROL SANITARIO ESTABLECIDO EN EL ARTÍCULO 111 DEL CÓDIGO SANITARIO

Somete a control sanitario a los REACTIVOS DE DIAGNÓSTICO IN VITRO PARA CALIFICACIÓN MICROBIOLÓGICA DE DONACIONES EN SERVICIOS DE SANGRE asociados a Chagas, Sífilis, Hepatitis B/Hepatitis C; HTLV I/II.

G/TBT/N/CHN/2100 21/08/2025	China	<i>Ducted air conditioners, roof-mounted air conditioning units, direct evaporative fresh air handling unit (HS code(s): 8418); (ICS code(s): 27.010)</i> National Standard of the P.R.C., Minimum allowable values of the energy efficiency and energy efficiency grades for ducted air conditioners; This document specifies the minimum allowable values of energy efficiency, energy efficiency grades, test methods and implementation requirements for ducted air conditioners. This document applies to ducted air conditioners, roof-mounted air conditioning units and direct evaporative fresh air handling unit that are driven by electric motors and have a static pressure in the indoor unit greater than 0Pa (gauge pressure).	20/10/2025
G/TBT/N/CHN/2101 21/08/2025	China	<i>Firefighter's emergency call (HS code(s): 854390); (ICS code(s): 13.220.10)</i> National Standard of the P.R.C., Firefighter's emergency call; The document specifies the terms and definitions of firefighter's emergency calls, provides classification and model designations, stipulates the performance requirements, inspection rules and marking requirements, and describes the corresponding test methods. The document applies to the firefighter's emergency call carried by fire rescue personnel during fire fighting and rescue.	20/10/2025
G/TBT/N/CHN/2102 21/08/2025	China	<i>LED products for indoor lighting (HS code(s): 853951; 940542); (ICS code(s): 27.010)</i> National Standards of the P.R.C., Minimum allowable values of energy efficiency and energy efficiency grades of LED products for indoor lighting; This document specifies the energy efficiency grades, minimum allowable values of energy efficiency, and test methods for LED products for general indoor lighting, including LED downlights, directional integrated LED lamps, non-directional self-ballasted LED lamps, LED high bay luminaires, and double-capped LED lamps designed to retrofit liner fluorescent lamps. This document applies to LED downlights, directional integrated LED lamps, non-directional self-ballasted LED lamps (including LED filament lamps), LED high bay luminaires, and double-capped LED lamps designed to retrofit liner fluorescent lamps, with a rated supply voltage not exceeding AC 250 V and a frequency of 50/60 Hz. This document does not apply to non-directional self-ballasted LED lamps with additional optical lens designs, LED downlights and LED high bay luminaires using self-ballasted LED lamps, the LED products for indoor lighting with additional non-lighting related power-consuming functions or LED lighting products that are non-white or colour-tunable.	20/10/2025
G/TBT/N/KGZ/58 21/08/2025	Kyrgyz Republic	<i>Cotton wool, gauze, bandages and similar articles (for example, bandages, Band-Aids, poultices), impregnated or coated with pharmaceutical substances or packaged in forms or packages for retail sale, intended for use in medicine, surgery, dentistry or veterinary medicine (HS 3005); Devices and instruments used in medicine, surgery, dentistry or veterinary medicine, including scintigraphic equipment, other electro-medical equipment</i>	03/10/2025

and vision testers (HS 9018); Equipment based on the use of X-ray, alpha, beta or gamma radiation, intended or not intended for medical, surgical, dental or veterinary use, including X-ray or radiotherapy equipment, X-ray tubes and other X - ray generators, high-voltage generators, shields and control panels, screens, tables, chairs and similar products for examination or treatment (HS 9022); Medical, surgical, dental or veterinary furniture (for example, operating tables, examination tables, hospital beds with mechanical devices, dental chairs); barber chairs and similar chairs with devices for rotating and simultaneously for tilting and lifting; parts of the above-mentioned products (HS Code 9402).

Draft amendments to the Requirements for the implementation, maintenance and evaluation of the quality management system of medical devices, depending on the potential risk of their use

The draft amendments to the Requirements for the implementation, maintenance and evaluation of the quality management system of medical devices, depending on the potential risk of their use, apply to medical devices put into circulation in the territory of the Eurasian Economic Union and provide for the following: the possibility, in certain situations, of confirming the compliance of the production conditions of the sterilization site with the established requirements without the inspection organization visiting the sterilization site, which will avoid repeating individual procedures when evaluating the quality management system in order to rationalize the resources of manufacturers of medical devices and inspecting organizations.
