G/TBT/N/BRA/1640 24/08/2026	Brazil	<i>Food technology (ICS code(s): 67)</i> Draft Resolution 1.415, 11 August 2026.; This draft resolution proposes amendments to Normative Instruction (IN) No. 211, of March 1, 2023, which establishes the technological functions, maximum limits, and conditions of use for food additives and processing aids authorized for use in foods.	23/10/2026
G/TBT/N/CZE/267 24/08/2026	Czech Republic	<i>Measure of a general nature laying down metrological and technical requirements for specified measuring instruments, including test methods for type approval, verification and re-testingMetrology and measurement. Physical phenomena (ICS code: 17)Measurement of volume, mass, density and viscosity (ICS code: 17.060)</i> Measure of a general nature number: 0111-OOP-C104-26 – metrological and technical requirements for specified measuring instruments, including test methods for type approval, verification and re-testing: 'laboratory oscillation-type density meters with sample temperature control or automatic temperature correction' The regulation lays down the metrological and technical requirements for these specified measuring instruments, including the test methods for type approval and verification of specified measuring instruments. Laboratory oscillation-type density meters with sample temperature control or automatic temperature correction may be placed on the market and put into service in the Czech Republic as specified measuring instruments pursuant to Act No 505/1990 on metrology, as amended. Pursuant to this Act, specified measuring instruments are instruments that are included in the list of the types of specified measuring instruments (Decree No 345/2002) and, at the same time, intended (by the manufacturer/importer) for measurements relevant to the protection of public interests in consumer protection, contractual relations, imposition of sanctions, fees, tariffs and taxes, health protection, environmental protection, occupational safety, or the protection of other public interests protected by special legislation. This is therefore a purpose similar to the one defining specified products – non-automatic measuring instruments and scales pursuant to Directives 2014/31/EU and 2014/32/EU. The requirements of this legislation do not apply to measuring instruments not placed on the market in the Czech Republic for the above purposes, defined by Act No 505/1990 on metrology, as amended. The purpose of this notified legislation is to lay down metrological and technical requirements for these specified measuring instruments. This legislation also stipulates tests for type approval and verification of specified measuring instruments of this type. This measure of a general nature has been drawn up with a view to achieving the specified objective, while taking into account, as far as	09/10/2026

possible, international standards and other generally accepted principles and norms.

It is envisaged in Act No 505/1990 on metrology that the technical and metrological requirements for the types of specified measuring instruments listed in the Annex to Decree No 345/2002 specifying measuring instruments for mandatory verification and measuring instruments subject to type approval, including tests for the purposes of type approval, verification and re-testing of specified measuring instruments, will be set out in detail in a measure of a general nature.

Given the intended purpose, the requirements laid down have been kept to a minimum. Moreover, from the manufacturer's perspective, they reflect the standard requirements set out in the relevant regulations for products. For manufacturers or users, the process of type approval or verification just means demonstrating that the relevant requirements have been met. In addition, the manufacturer is not necessarily required to carry out all the tests during type approval if they have already been carried out. A broad principle of recognition applies in cases of compatibility with the requirements.

G/TBT/N/AUS/201 25/08/2026	Australia	<i>Fittings, e.g. joints, elbows, flanges, of plastics, for tubes, pipes and hoses (HS code(s): 391740).</i> WaterMark Certification Scheme – WMTS-542:2026 Push-fit couplings for slab repair of vertical sanitary pipes.; This technical specification sets out the minimum requirements for pipe couplings (spigot x spigot) that provide an interference elastomeric seal on the internal surface of non-pressure soil, waste and vent pipe of similar or dissimilar pipe materials. The coupling is to be used in vertical installations only within all classes of buildings and installation to be undertaken via a Performance Solution. Operating temperature range: > 0°C to 40°C constant. Operating Pressure range: Up to 58kPa. Operating size range: DN 80 to DN 200. The Plumbing Code of Australia (PCA) requires that most products intended for use in plumbing and drainage installations in or around buildings to be evaluated and certified to WaterMark product specifications. WaterMark certification to an applicable product specification provides a process to evaluate and authorise products to enable their use in a plumbing and drainage installation. Thus ensuring that the plumbing and drainage products are fit for purpose for which they are intended. This WaterMark Technical Specification (WMTS) was prepared in accordance with the Manual for the WaterMark Certification Scheme, Appendix 4, Protocol for Developing Product Specifications. The objective of WaterMark Technical Specification is to enable product certification in accordance with the requirements of the Plumbing Code of Australia (PCA).

Chemicals; products and goods containing hazardous chemicals. Products of the chemical industry (ICS 71.100).

25/10/2026

Draft Decree amending and supplementing a number of articles of Decree No. 26/2026/ND-CP dated 17 January 2026 of the Government detailing and guiding the implementation of a number of articles of the Law on Chemicals regarding the management of chemical activities and hazardous chemicals in products and goods.;

The Draft Decree consists of 27 Articles amending and supplementing a number of provisions of Decree No. 26/2026/ND-CP on the management of chemical activities and hazardous chemicals in products and goods.

The main amendments and supplements include:

- Clarifying the scope of application and specifying products that are not subject to Chapter II of Decree No. 26/2026/ND-CP, including certain pharmaceuticals, biocidal products, food, cosmetics, chemicals in medical devices, animal feed, veterinary drugs, plant protection products, certain fertilizers, radioactive substances, household products, petroleum products, batteries, fire-fighting equipment, construction materials, paints, printing inks, and certain finished products intended for end users;
- Clarifying responsibilities for state management of chemical activities among the Ministry of Industry and Trade, other ministries and ministerial-level agencies, and provincial-level People's Committees;

- Amending requirements applicable to facilities, warehouses and the storage of chemicals, including requirements for compliance with applicable national technical standards and technical regulations;
- Simplifying and amending conditions, application dossiers, competence, procedures and time limits for the issuance, re-issuance and adjustment of Certificates of eligibility for the production and trading of conditional chemicals;
- Providing for decentralization of authority to provincial-level People's Committees for the appraisal and issuance of Certificates of eligibility for the production and trading of conditional chemicals and certain Certificates of eligibility for chemical storage services;
- Amending licensing requirements and procedures applicable to chemicals subject to special control, including export and import licences, and providing specific rules for the return export of chemicals to foreign organizations;
- Amending conditions and licensing procedures applicable to prohibited chemicals used for permitted special purposes, including analysis, testing, scientific research, medical and pharmaceutical purposes, criminal investigation, national defence and security;
- Providing exemptions from certain Certificates and Licences for specified mixtures, internal filling or formulation activities, certain chemical storage services, small quantities of chemicals used in laboratories, on-the-spot export and import activities, and transactions between enterprises in export processing zones and domestic enterprises;
- Amending requirements for the provision, updating, sharing and synchronization of chemical management information through the specialized chemicals database;
- Amending information disclosure requirements for products and goods containing hazardous chemicals, and introducing requirements applicable to laboratories determining hazardous chemical content in products and goods; and
- Amending transitional provisions relating to licences issued before the entry into force of the Draft Decree.

Equipment and auxiliaries used for storing and dispensing ethanol blended gasoline – gasohol E10 at filling stations, including underground storage tanks, process piping systems, fuel dispensers and related auxiliary equipment.

25/10/2026

Draft National technical regulation of equipments, auxiliaries for storing and dispensing ethanol blended gasoline - gasohol E10 at filling stations;

This draft technical regulation stipulates the limit of technical specifications concerning equipments, auxiliaries for storing and dispensing ethanol blended gasoline

- gasohol E10 at filling stations.
- gasohol E10 Tanks.
- gasohol E10 technology pipes.
- gasohol E10 meter.

This draft technical regulation applies to the enterprises, organizations and individuals involved in storing and dispensing ethanol blended gasoline - gasohol E10 in Vietnam, as well as to organizations and individuals

manufacturing, importing or distributing such equipment and auxiliaries. The draft also provides for conformity declaration of the covered products in accordance with Circular No. 14/2026/TT-BKHCN, and for state inspection of such equipment and auxiliaries by competent authorities. This draft Circular will replace Circular No. 48/2014/TT-BCT dated 5 December 2014 promulgating QCVN 02:2014/BCT.

25/10/2026

Draft Decree amending and supplementing the Government's Decree No. 24/2026/ND-CP dated January 17, 2026, prescribing lists of chemicals subject to the scope of regulation of the Law on Chemicals.;

The Draft Decree consists of 3 Articles amending and supplementing the Government's Decree No. 24/2026/ND-CP dated January 17, 2026, prescribing lists of chemicals subject to the scope of regulation of the Law on Chemicals.

The main amendments and supplements include:

- Amend Appendix I (List of basic chemicals in the key chemical industry sector) to strictly adhere to the criteria stipulated in Clause 2, Article 6 of the Law on Chemicals, avoid indiscriminate incentives, and ensure alignment with the economy's general development orientation and resource availability at any given time.
- Amend Appendix II (List of chemicals subject to conditional production and trading) and Appendix III (List of chemicals subject to special control) by reviewing and reclassifying certain chemicals within these lists to reduce administrative procedures; remove chemicals posing lower risks regarding toxicity to human health and the environment from the management lists; and distinguish between goods containing hazardous chemicals and chemical mixtures regulated by Decree No. 24/2026/ND-CP; Simultaneously, consider transferring certain chemicals from the List of chemicals subject to special control to the List of chemicals subject to conditional production and trading to simplify administrative procedures; and reclassify chemicals from "Group 1 chemicals subject to special control" to "Group 2 chemicals subject to special control" in furtherance of the policy on decentralization and the simplification of administrative procedures.

Add chemicals to the Lists as proposed by the Ministry of Public Security and the Ministry of Agriculture and Environment, in accordance with Clause 2, Article 5 of Decree No. 24/2026/ND-CP.

- Amend the information in Appendix IV (List of chemicals requiring the development of a chemical incident prevention and response plan) to align with risk management and the entities at risk requiring management.

The Draft Decree also provides transitional arrangements, including: continued validity of licences and certificates already issued under Decree No. 26/2026/ND-CP prior to the effective date; exemption from compliance requirements for chemicals removed from the conditional production and trading list; a specific transitional rule allowing organizations already certified for all three xylene isomers (o-, m- and p-xylene) to continue trading in xylene (CAS 1330-20-7) until their existing certificates expire; and

a compliance deadline of 31 December 2027 for chemicals newly added to the list of chemicals subject to special control.

Vehículos motorizados livianos

26/09/2026

Informe técnico para el establecimiento del estándar de eficiencia energética de vehículos motorizados livianos;

El presente informe contiene la revisión técnica del estándar de eficiencia energética para vehículos livianos, la cual responde a la necesidad de evaluar los efectos de la entrada en vigor de la norma de emisiones Euro 6c y de la transición desde el ciclo de homologación NEDC al ciclo WLTC. Considerando que, desde octubre de 2025, la homologación obligatoria de vehículos nuevos se realiza mediante el procedimiento WLTC, cuyas condiciones de ensayo representan de mejor manera el uso real de los vehículos, resulta necesario revisar el estándar de eficiencia energética vigente, establecido mediante la Resolución Exenta N° 5 de 2022, con el fin de asegurar que mantenga una evaluación adecuada, consistente y representativa del desempeño energético de los vehículos livianos. Asimismo, es importante mencionar que los estándares de eficiencia energética se encuentran vigentes desde el año 2024. La información enviada tiene por objeto comunicar a la industria que el cambio en la norma de emisiones, establecido por el Ministerio del Medio Ambiente (MMA) y que entró en vigencia el 1 de

octubre de 2025, no modifica ni afecta los estándares de eficiencia energética actualmente vigentes.

Waste Minimisation (Agrichemicals and Farm Plastics) Regulations 2026,

The Ministry for Cities, Environment, Regions and Transport, in New Zealand, has introduced regulations: Waste Minimisation (Agrichemicals and Farm Plastics) Regulations 2026.

The regulations provide the legal mechanism to fund and deliver the Rural Recycling Scheme. The draft regulations operationalise the proposed regulated product stewardship scheme for agrichemicals and farm plastics by:

- Making scheme participation mandatory for producers of regulated products.
- Establishing regulated product stewardship fees to fund a national take-back and recycling services. The regulations apply to:
- Agrichemicals sold in plastic containers or drums of 1,000 litres or less (including household pest and weed products).
- Plastic bale wrap and silage sheets.
- Agricultural products sold in:

- o Plastic bags weighing 16–40 kg, and
 - o Woven polypropylene bags weighing over 40 kg.
- Agrichemical means a liquid or solid substance used to—
- (i) manage plants or livestock; or
 - (ii) control pests; or
 - (iii) regulate plant or livestock health; and
- (b) excludes—
- (i) products supplied in aerosol form; and
 - (ii) detergents and sanitisers; and
 - (iii) vertebrate toxic agents; and
 - (iv) products intended for domestic use (except for products used in controlling pests or weeds in a home or garden)
- Agricultural product means—
- (a) seeds used for sowing, including pasture, arable, horticultural, and specialised crop seeds;
 - (b) livestock feeds, including grain-based rations and specialised feeds;
 - (c) fertilisers, including conventional and speciality fertilisers, used to enhance horticultural production or crop and pasture growth;
 - (d) soil and crop inputs used to improve soil structure, fertility, or productivity (excluding home garden products);
 - (e) supplements provided in addition to livestock feed and used to support livestock health, performance, and nutrition.

trans-1,2-Dichloroethylene Draft Risk Evaluation Under the Toxic Substances Control Act (TSCA); Notice of Availability and Request for Comment;

Notice - The Environmental Protection Agency (EPA or Agency) is announcing the availability of and seeking public comment on the draft risk evaluation under the Toxic Substances Control Act (TSCA) for trans-1,2-dichloroethylene. The purpose of risk evaluations under TSCA is to determine whether a chemical substance presents an unreasonable risk of injury to health or the environment under the conditions of use (COUs), including unreasonable risk to potentially exposed or susceptible subpopulations identified as relevant to the risk evaluation by EPA, and without consideration of costs or non-risk factors. EPA is seeking comment on the draft risk evaluation for trans- 1,2-dichloroethylene.
