Commercial medium- and heavy-duty (MDHD) on-highway vehicles, work trucks, heavy-duty pickup trucks and vans, vocational vehicles, semi-trailers/tractors, and heavy-duty engines; Spark-ignition reciprocating piston engine, of a kind used for vehicles of chapter 87, of a cylinder capacity > 1.000 cm³ (HS code(s): 840734); Compression-ignition internal combustion piston engine "diesel or semi-diesel engine", for the propulsion of vehicles of chapter 87 (HS code(s): 840820); - Road tractors for semi-trailers : (HS code(s): 87012); Motor vehicles for the transport of >= 10 persons, incl. driver (HS code(s): 8702); Motor vehicles for the transport of goods, incl. chassis with engine and cab (HS code(s): 8704); Special purpose motor vehicles (other than those principally designed for the transport of persons or goods), e.g. breakdown lorries, crane lorries, fire fighting vehicles, concrete-mixer lorries, road sweeper lorries, spraying lorries, mobile workshops and mobile radiological units (HS code(s): 8705); Internal combustion engines for road vehicles in general (ICS code(s): 43.060.01); Commercial vehicles in general (ICS code(s): 43.080.01); Trucks and trailers (ICS code(s): 43.080.10); Electric road vehicles (ICS code(s): 43.120)

Resetting NHTSA's Fuel Economy Program: Commercial Medium- and Heavy-Duty On-Highway Vehicles and Work Trucks

Interpretive rule - The National Highway Traffic Safety Administration (NHTSA) is issuing this interpretive rule regarding the scope of its authority to set fuel economy standards for commercial medium- and heavy-duty on-highway vehicles and work trucks. This rule describes NHTSA's authority to set vehicle standards, which does not include the authority to set separate standards for engines. NHTSA will review its existing standards applicable to commercial medium- and heavy-duty on-highway vehicles and work trucks for consistency with this interpretation in a separate rulemaking. Pending the rulemaking process, NHTSA will exercise its enforcement authority with regard to affected standards in accordance with the interpretation set forth in this rule.

El proyecto de real decreto consta de un preámbulo, un artículo único que aprueba el Reglamento, seis disposiciones adicionales, siete disposiciones transitorias, una disposición	02/11/2026

derogatoria y siete disposiciones finales. La estructura normativa del Reglamento comprende treinta artículos con disposiciones de carácter general y trece instrucciones técnicas complementarias, que establecen las exigencias técnicas específicas. Con este real decreto se pretende realizar una actualización de la reglamentación técnica que se adapte mejor a las necesidades, posibilidades y soluciones técnicas existentes en la actualidad para las instalaciones de combustibles gaseosos, en base a la evolución de la técnica y la experiencia que se ha ido acumulando con la aplicación del reglamento actual. El proyecto de real decreto consta de: Artículo único. Aprobación del Reglamento. Disposición adicional primera. Guía técnica. Disposición adicional segunda. Cobertura de seguro u otra garantía equivalente suscrito en otro Estado. Disposición adicional tercera. Aceptación de documentos de otros Estados miembros a efectos de acreditación del cumplimiento de requisitos. Disposición adicional cuarta. Equivalencia de requisitos. Disposición adicional quinta. Modelo de declaración responsable. Disposición adicional sexta. Obligaciones en materia de información y de reclamaciones. Disposición transitoria primera. Organismos de control habilitados con anterioridad a la entrada en vigor de este real decreto. Disposición transitoria segunda. Regularización administrativa de instalaciones. Disposición transitoria tercera. Revisiones e inspecciones periódicas de las instalaciones existentes. Disposición transitoria cuarta. Instalaciones en ejecución en la fecha de entrada en vigor del reglamento. Disposición transitoria quinta. Empresas instaladoras de gas previamente habilitadas. Disposición transitoria sexta. Aparatos a gas. Disposición transitoria séptima. Instalaciones afectadas por la disposición final cuarta que se encuentren en proceso de ejecución a la entrada en vigor de este real decreto. Disposición derogatoria única. Derogación normativa. Disposición final primera. Modificación del Real Decreto 552/2019, de 27 de septiembre, por el que se aprueban el Reglamento de seguridad para instalaciones frigoríficas y sus instrucciones técnicas complementarias. Disposición final segunda. Modificación del Reglamento de equipos a presión y de su instrucción técnica complementaria ITC EP-6 «Recipientes a presión transportables», aprobados por el Real Decreto 809/2021, de 21 de septiembre. Disposición final tercera. Modificación del Real Decreto 337/2014, de 9 de mayo, por el que se aprueban el Reglamento sobre condiciones técnicas y garantías de seguridad en instalaciones eléctricas de alta tensión y sus Instrucciones Técnicas Complementarias ITC-RAT 01 a 23. Disposición final cuarta. Modificación del Real Decreto 656/2017, de 23 de junio, por el que se aprueba el Reglamento de almacenamiento de productos químicos y sus Instrucciones Técnicas Complementarias MIE APQ 0 a 10. Disposición final quinta. Título competencial. Disposición final sexta. Actualización técnica. Disposición final séptima. Entrada en vigor.

Draft Unsafe Goods (Consumer Sand Products) Notice 2026 (6 pages, in English), <https://www.mbie.govt.nz/have-your-say/consultation-on-draft-unsafe-goods-consumer-sand-products-notice-2026> The draft notice would be made under the Fair Trading Act 1986 and w

The proposed Unsafe Goods (Consumer Sand Products Containing Asbestos) Notice 2026 would prohibit the supply of specified consumer sand products unless suppliers hold evidence demonstrating that the products do not contain asbestos. The notice would apply to: goods that are a toy that is, include, or contain sand; and goods that are a decorative, craft or artistic good that are sand or that include or contain accessible sand. The notice would not apply to sand produced

by natural geological processes that is intended to fill sand pits, playgrounds, or other recreational areas. To demonstrate compliance, suppliers would be required to obtain negative asbestos test results for at least three samples of a product, which includes obtaining testing using Scanning Electron Microscopy with Energy Dispersive X-ray Spectroscopy (SEM-EDX) or Transmission Electron Microscopy (TEM) using the applicable procedures specified in ISO 22262-2:2026; ensuring testing is conducted by a laboratory accredited to ISO/IEC 17025:2017 by an accreditation body that is a signatory to the International Laboratory Accreditation Cooperation Mutual Recognition Arrangement (ILAC MRA); ensure those samples were tested within the 12 months preceding importation (for imported goods) or manufacture (for domestically manufactured goods); and have a test certificate, test report, test result, or other document recording the results of the testing and meets specified requirements (such as indicating that no asbestos was detected in the samples tested). The measure is intended as an interim requirement pending development of longer-term product safety regulation addressing asbestos contamination in consumer sand products.
