G/TBT/N/AUS/161 11/09/2023	Australia	<p><i>Imported and domestically produced food making 'no added sugar(s)' or 'unsweetened' voluntary nutrition content claims.</i></p> <p>Proposal P1062 Defining added sugars for claims – Call for Submissions document (70 pages, in English).</p> <p>The proposal considers amending the Australia New Zealand Food Standards Code (the Code) to define and clarify added sugars for the purposes of making voluntary nutrition content claims about added sugars. Food Standards Australia New Zealand (FSANZ) has undertaken an assessment and developed a proposed draft variation to the Code. Standards affected are: (a) Schedule 4 Nutrition, health and related claims, table to section S4—3. The proposed draft variation amends the required conditions for making permitted 'no added sugar(s)' and 'unsweetened' nutrition content claims by defining added sugar and clarifying what ingredients disqualify a food from making such claims when added. Upon adoption, a two year transition period is proposed.</p>	10/11/2023

G/TBT/N/THA/712 11/09/2023	Thailand	<i>Electric Unicycle</i> Draft Notification of the Committee on Labels, entitled The electric unicycle is a label-controlled product	10/11/2023

The draft notification prescribes the electric unicycle as label-controlled products. This draft notification applies to an electric unicycle, a set of devices for making the body move by the user or the driver must maintain balance and control the speed to move forward and backward or twist to go sideways. The main component is only one spinning wheel and consumes the energy from electrical energy accumulators such as batteries and capacitors. In this regard, it shall include the unicycle electric bike or any other vehicle with an electric single wheel as a component. The label of this label-controlled product shall indicate the text, pictures, artificial designs or image as appropriate, and shall not cause misunderstanding about the essence of the product. The label also shall be in Thai language or a foreign language with Thai for explanation. The label of this label-controlled product does not apply to the label of products manufactured for export and not for sale in Thailand.

Pipeline Safety Initiatives

Notice of proposed rulemaking - PHMSA proposes revisions to the pipeline safety regulations to require operators of gas distribution pipelines to update their distribution integrity management programs (DIMP), emergency response plans, operations and maintenance manuals, and other safety practices. These proposals implement provisions of the Leonel Rondon Pipeline Safety Act--part of the Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2020--and a National Transportation Safety Board (NTSB) recommendation directed toward preventing catastrophic incidents resulting from overpressurization of low-pressure gas distribution systems similar to that which occurred on a gas distribution pipeline system in Merrimack Valley on 13 September 2018. PHMSA also proposes to codify use of its State Inspection Calculation Tool, which is used to help states determine the base-level amount of time needed for inspections to maintain an adequate pipeline safety program. Further, PHMSA proposes other pipeline safety initiatives for all part 192-regulated pipelines, including gas transmission and gathering pipelines, such as updating emergency response plans and inspection requirements. Finally, PHMSA proposes to apply annual reporting requirements to small, liquefied petroleum gas (LPG) operators in lieu of DIMP requirements.

Food Act 2022 (English; 42 pages]Draft Food Regulations 2023 [English; 93 pages]

The Draft Food Regulations 2023 are intended to replace the Food Regulations of 1999, with the overarching aim of fortifying food control framework in Mauritius to align with international food standards. These regulations specify the requirements for the following:

- Food composition and labelling, including labelling requirements for pre-packed food;
- Packages for food, including standards for food grade material, which can be used for packaging;
- Pre-approval permit for any novel food, food produced using gene technology and irradiated food;
- Examination and sampling of food for clearance at border level as well as surveillance at domestic level;
- Food hygiene pertaining to building and facilities, food handling practices and personal hygiene of food handlers;
- Contaminants levels to protect the market from the sale of unsafe food;
- Chilled and frozen food to enable the transport, storage, display and sale of perishable food safely;
- Food additives, which can be used in specific food and at which level;
- Salt, which is allowed for sale;
- Cereal and cereal product for the sale of fortified flour;
- Egg and egg product to ensure their safe consumption;
- Special purpose food for the health protection of infants and children;
- Edible oil or fat concerning saturated fat and trans-fat;
- Mayonnaise and sauce for its their production;
- Milk and milk product to ensure their safety and nutritional quality;
- Meat and meat product processing and sale;
- Fish and fish product, which are safe for human consumption;
- Packaged water and natural mineral water for its their production and sale;
- Food safety management system requirement for food establishments involved in specific types of food, mayonnaise, fish and fish product, meat and meat product, and packaged water and natural mineral water; and food prohibited for sale in educational institutions, such pre-primary, primary and secondary school.

New
Zealand

Imported and domestically produced food making 'no added sugar(s)' or 'unsweetened' voluntary nutrition content claims.

Proposal P1062 Defining added sugars for claims – Call for submissions

The proposal considers amending the Australia New Zealand Food Standards Code (the Code) to define and clarify added sugars for the purposes of making voluntary nutrition content claims about added sugars. Food Standards Australia New Zealand (FSANZ) has undertaken an assessment and developed a proposed draft variation to the Code. Standards affected are: (a) Schedule 4 Nutrition, health and related claims, table to section S4—3. The proposed draft variation amends the required conditions for making permitted 'no added sugar(s)' and 'unsweetened' nutrition content claims by defining added sugar and clarifying what ingredients disqualify a food from making such claims when added. Upon adoption, a two year transition period is proposed.

The NRC's goal is to establish effective and efficient licensing of applications using fuels enriched to greater than 5.0 and less than 20.0 weight percent uranium-235. The NRC will hold a public meeting to promote a full understanding of the planned rulemaking and facilitate public comment on the regulatory basis.</p>	22/11/2023
G/TBT/N/IND/297 13/09/2023	India	<p><i>Anhydrous Ammonia (HS CODE – 28141000)</i></p> <p>Anhydrous Ammonia (Quality Control) Order, 2023</p>	12/11/2023

Anhydrous ammonia (NH₃) is an efficient and widely used source of nitrogen fertilizer. It is relatively easy to apply and is readily available to producers. Anhydrous means “without water”. When used as an agricultural fertilizer, NH₃ is compressed into a liquid. So, for protection of human health and environment, the BIS standard of Anhydrous ammonia needs to be made mandatory.

The locally manufactured or imported Anhydrous ammonia shall conform to the Indian Standard IS 662 : 2020 and shall bear the standard mark under license from the Bureau of Indian Standards (BIS) as per Scheme-II of Schedule-II of the Bureau of Indian Standards (Conformity Assessment) Regulations, 2018. The use of standard mark is governed by the provisions of Bureau of Indian Standards Act, 2016 and the Rules and Regulations made thereunder. Bureau of Indian Standards shall be the certifying and enforcing authority.

Ethylene Oxide (HS CODE – 29101000)

12/11/2023

Ethylene Oxide (Quality Control) Order, 2023

Ethylene oxide is used in organic synthesis, especially in the production of ethylene glycol. It forms starting material for the manufacture of acrylonitrile and non-ionic surfactants. It is also used as a fumigant for foodstuffs and in textiles and pharmaceutical industry. So, for protection of human health and environment, the BIS standard of Ethylene oxide needs to be made mandatory.

The locally manufactured or imported Ethylene Oxide shall conform to the Indian Standard (IS 5573: 1984) and shall bear the standard mark under license from the Bureau of Indian Standards (BIS) as per Scheme-II of Schedule-II of the Bureau of Indian Standards (Conformity Assessment) Regulations, 2018. The use of standard mark is governed by the provisions of Bureau of Indian Standards Act, 2016 and the Rules and Regulations made thereunder. Bureau of Indian Standards shall be the certifying and enforcing authority.

Captafol (HS CODE – 29308000)

12/11/2023

Captafol (Quality Control) Order, 2023

Captafol is a fungicide. It is used to control almost all fungal diseases of plants except powdery mildews. It is also used to control certain seed- and soil-borne organisms. So, for protection of human health and environment, the BIS standard of Captafol needs to be made mandatory.

The locally manufactured or imported Captafol shall conform to the Indian Standard (IS 10300: 2023) and shall bear the standard mark under license from the Bureau of Indian Standards (BIS) as per Scheme-II of Schedule-II of the Bureau of Indian Standards (Conformity Assessment) Regulations, 2018. The use of standard mark is governed by the provisions of Bureau of Indian Standards Act, 2016 and the Rules and Regulations made thereunder. Bureau of Indian Standards shall be the certifying and enforcing authority.

rules governing the European Medicines Agency, amending Regulation

This Regulation lays down Union procedures for the authorisation, supervision and pharmacovigilance of medicinal products for human use at Union level, establishes rules and procedures at Union and at Member State level relating to the security of supply of medicinal products and lays down the governance provisions of the European Medicines Agency established by Regulation (EC) No 726/2004 which shall carry out the tasks relating to medicinal products for human use that are laid down in this Regulation, Regulation (EU) No 2019/6 and other relevant Union legal acts. It revises and replaces Regulation (EC) 726/2004 (general), Regulation (EC) 141/2000 (rare disease medicines) and Regulation (EC) 1901/2006 (paediatric medicines). The Regulation contains both technical regulations and conformity assessment procedures. 1. Technical regulations: The Regulation establishes certain conditions for the marketing authorisation of medicinal products for human use at central (EU) level. The Regulation also establishes rules at Union and at Member State level relating to the security of supply of medicinal products including the monitoring and management of shortages and critical shortages. 2. Conformity assessment procedures: The Regulation establishes the procedures for the authorisation of medicinal products for human use at central (EU) level. It also establishes procedures at Union and at Member State level relating to the security of supply of medicinal products including the monitoring and management of shortages and critical shortages.

G/TBT/N/KEN/1502 15/09/2023	Kenya	<i>Sugar and sugar products (ICS code(s): 67.180.10)</i> KEBS Public notice to stakeholders on all sugar being imported during the duty-free window. Pursuant to paragraphs 7(2) and 9(2) of Legal Notice 78 of 2020 read together with Paragraph 3(3) of Legal Notice 212 of 2020, KEBS wishes to inform all stakeholders and the general public that all sugar being imported during the duty-free window established under Gazette No.10358 dated 9th August 2023 will be handled	

as follows: All imported sugar accompanied with Certificates of Conformity (CoCs) will be reinspected and tested at the Ports of Entry free of charge. The sampling will take place in the presence of the importer or appointed agent and will be subjected to tests to verify compliance with the relevant requirements of the standards. ALL imported sugar consignments shipped from countries where KEBS has appointed inspection companies and are not accompanied by Certificates of Conformity (CoCs) will be inspected upon arrival at a fee equivalent to five percent (5%) of the approved customs values. All sugar imports originating from countries where no inspection agent has been contracted by KEBS, will continue being subjected to destination inspection upon payment of an inspection fee equivalent to zero-point six percent (0.6%) of the approved customs value and testing fee (where applicable).
