This document applies to hot-rolled steel sheet and strip with thicknesses ranging from 2.0 mm to 14.0 mm, and cold-rolled steel sheet and strip with thicknesses ranging from 1.5 mm to 4.0 mm, intended for use in welded gas cylinders.	06/11/2026
G/TBT/N/IDN/195 07/09/2026	Indonesia	<i>Consumer goods, particularly goods derived from or containing animal-derived materials</i> Consumer goods, particularly goods derived from or containing animal-derived materials.; The guideline establishes requirements for the implementation of the Halal Product Assurance System (SJPH) and halal certification for consumer goods, particularly goods derived from or containing animal-derived materials. It covers general goods primarily made from animal-derived materials, including leather, fur, hair, horns, and bones, as well as goods made from non-animal or synthetic materials that use animal-derived substances as additives or processing aids during production. The guideline aims to ensure that such goods meet applicable halal requirements and maintain their halal status throughout the production process in accordance with the SJPH criteria and relevant MUI Fatwas.	06/11/2026

1,2-Dichloropropane Draft Risk Evaluation Under the Toxic Substances Control Act (TSCA); Notice of Availability and Request for Comment;

Notice of availability and request for comment - The Environmental Protection Agency (EPA or Agency) is announcing the availability of and seeking public comment on a draft risk evaluation under the Toxic Substances Control Act (TSCA) for 1,2- dichloropropane. The purpose of risk evaluations under TSCA is to determine whether a chemical substance presents an unreasonable risk of injury to health or the environment under the conditions of use (COUs), including unreasonable risk to potentially exposed or susceptible subpopulations identified as relevant to the risk evaluation by EPA, and without consideration of costs or non-risk factors. EPA is seeking comment on the draft risk evaluation for 1,2- dichloropropane.

The draft Order of the Ministry of Health of Ukraine "On Approval of the Requirements for the Composition of Food for Special Medical Purposes";

The draft Order establishes mandatory requirements for the composition and characteristics of food for special medical purposes in line with relevant European Union legislation, including Regulation (EU) No 609/2013 and Commission Delegated Regulation (EU) 2016/128. The draft Requirements classify food for special medical purposes into three categories: nutritionally complete food with a standard nutrient formulation; nutritionally complete food with a nutrient-adapted formulation specific to a disease, disorder or medical condition; and nutritionally incomplete food with a standard or nutrient-adapted formulation, which is not suitable for use as the sole source of nourishment.

The draft Requirements specify the substances that may be used in the manufacture of food for special medical purposes and establish minimum and maximum levels of vitamins and minerals for products intended for infants and for products intended for population groups other than infants. They also establish requirements concerning food information, labelling, presentation and advertising. The draft Order is also being notified under the SPS Agreement.

Food for total diet replacement for weight control

30/09/2026

Draft Order of the Ministry of Health of Ukraine "On approval of the Requirements for the composition of food for total diet replacement for weight control";

The draft Order provides for the approval of mandatory requirements for the composition of food for total diet replacement for weight control. The draft Requirements stipulate that food for total diet replacement for weight control is intended to replace the entire daily diet. The draft Requirements specify the substances that may be used in food for total diet replacement for weight control and establish their minimum levels. They also set out requirements concerning the energy value and nutritional content of such products, as well as requirements for food information, labelling, presentation and advertising. The draft Order is also being notified under the SPS Agreement.

Unleashing Unlicensed Spectrum for Direct-to-Device;

Proposed rule - The Federal Communications Commission (Commission or FCC) issues a Notice of Proposed Rulemaking (NPRM) proposes to expand opportunities for direct-to-device (D2D) communications by permitting certain unlicensed devices to communicate with satellites on a non-interference basis. Building on recent market growth and new industry investment in D2D technologies, the NPRM explores adding satellite allocations in specific unlicensed bands, clarifying that equipment may operate within spacecraft, and establishing a flexible regulatory framework that preserves incumbent operations while enabling continued innovation. The Commission seeks comment on technical, licensing, and policy considerations to support expanded D2D connectivity and ensure coexistence with existing services.
