G/TBT/N/CHL/660 02/10/2023	Chile	<p><i>Antena receptora de televisión digital terrestre.</i></p> <p>MODIFICA RESOLUCIÓN EXENTA N° 7219, DE 2009, DE LA SUBSECRETARÍA DE TELECOMUNICACIONES, QUE ESTABLECE LAS ESPECIFICACIONES TÉCNICAS MÍNIMAS QUE DEBERÁN CUMPLIR LOS RECEPTORES DE TELEVISIÓN DIGITAL TERRESTRE; La normativa notificada busca modificar la Resolución Exenta N° 7.219, de 2009, modificada a su vez por la Resolución Exenta N° 7.316, de 2010, ambas de la Subsecretaría de Telecomunicaciones, que establece las especificaciones técnicas mínimas que deberán cumplir los receptores de televisión digital terrestre, considerando que ésta no incluyó un elemento fundamental para su correcto funcionamiento, como es la Antena. En este sentido, se modifica la definición de Antena receptora, señalando que corresponde a un "dispositivo físico que permite transformar el campo eléctrico de la señal propagada en el aire en corriente y voltaje útil para que los elementos electrónicos del receptor funcionen correctamente y puedan decodificarse las señales digitales. En términos generales, para su adaptación se requerirá que tenga una impedancia 75 ohms."incluyendo además la necesidad de incorporarla para su correcto funcionamiento, por lo que su inclusión desde su entrada en vigencia se considerará como requisito mínimo en la venta de un receptor de televisión.</p>	01/12/2023
G/TBT/N/KEN/1505 02/10/2023	Kenya	<p><i>Mattresses: (HS code(s): 94042); Furniture (ICS code(s): 97.140)</i></p> <p>DEAS 1115-3:2023, Mattresses -Specification –Part 3: Reconstituted flexible polyurethane foam, First Edition; This Draft East African Standard specifies requirements, sampling and test methods for reconstituted flexible polyurethane foam mattresses. G/TBT/N/NZL/129 02/10/2023	New Zealand	<p><i>Medicinal cannabis, including products under HS Chapter 12 and 29.</i></p> <p>DEAS 1115-3:2023, Mattresses -Specification –Part 3: Reconstituted flexible polyurethane foam, First Edition;</p> <p>Medicinal cannabis products supplied in New Zealand are required to meet the labelling requirements outlined in regulation 19 of the Misuse of Drugs (Medicinal Cannabis) Regulations 2019. The Ministry of Health is proposing a technical amendment to regulation 19 to add a reference to the requirement for medicinal cannabis products to display a controlled drug classification statement on the label to align with the labelling of all other controlled drugs supplied as medicines in New Zealand. This requirement is already in place and enforced under the Misuse of Drugs Regulations 1977. The proposed change is a clarifying amendment and not a substantive change in regulation. The technical amendment will reflect the existing guidance issued in Section 3.2.2. of the 'Guideline on the regulation of medicinal cannabis in New Zealand: Part 3' and the 'Guideline on the Regulation of Therapeutic Products in New Zealand Part 5' Section 2.2 and Figure A.</p>	01/12/2023

G/TBT/N/UKR/268 02/10/2023	Ukraine	<p><i>Materials and articles intended to come into contact with foodstuffs</i> 01/12/2023</p> <p>Draft Order of the Ministry of Agrarian Policy and Food of Ukraine "On approval of the Requirements for a written declaration of the conformity of materials and articles intended to come into contact with food and a list of documents confirming the informationspecified in the declaration"; the draft Order is developed in order to confirm by the market operator of materials and articles intended for contact with food compliance with the requirements for the relevant material or article, as well as to implement the provisions of the EU food legislation.Approval of the Requirements is provided for by the Law of Ukraine of 03 November 2022 No 2718-IX "On Materials and Articles Intended to Come into Contact with Food", notified in document G/TBT/N/UKR/165/Rev.1.Materials and articles intended to come into contact with foodstuffs, as well as products of intermediate stages of their processing, and their components and/or substances, should be accompanied by a written declaration, which confirms the fulfillment of the requirements for the relevant material or article at all stages of its circulation, except at the points of sale to end consumers.The purpose of the declaration of conformity is to demonstrate that materials and articles meet the requirements of the law and are safe for use.The draft Order suggests approving the Requirements to the declaration of conformity in terms of:</p> <ul style="list-style-type: none"> -general provisions; -requirements to the information to be contained in the declaration of conformity; -list of supporting documents.The Requirements cover the following materials and articles: active materials and articles, intellectual materials and articles, glues, ceramics, cork, rubber, glass, ion exchange resins, metals and alloys,

paper and cardboard, plastic, printing inks, regenerated cellulose, silicon, textile, varnishes and coatings, wax, wood. The draft Order also stipulates that materials and articles intended to come into contact with foodstuffs produced before the entry into force of this Order may be in circulation until the expiry date. The draft Order is also notified under the SPS Agreement.

Fans driven by motors with an electric input power between 125 W and 500 kW 03/12/2023

Draft Commission Regulation implementing Directive 2009/125/EC of the European Parliament and of the Council with regard to ecodesign requirements for fans driven by motors with an electric input power between 125 W and 500 kW and repealing Commission Regulation (EU) No 327/2011;

This draft Commission Regulation covers machines driven by motors with an electric input power between 125 W and 500 kW, and designed to maintain a continuous flow of air or other gas passing through it by means of one or more impellers, to be placed on the EU market. The draft regulation lays down minimum energy performance requirements of fans; appropriate requirements contributing to circular economy objectives in particular, requirements on resource efficiency including availability of necessary spare parts and maximum delivery time thereof, access to repair and maintenance information, requirements for disassembly for the purpose of repair and for material recovery and recycling, and information requirements, including information about fan performance at part load. In accordance with the Ecodesign Directive 2009/125/EC, fans not meeting these requirements will not be allowed to be placed on the EU market. The draft Regulation is based on the findings of technical, environmental and economic studies and takes into account the opinions of the different stakeholders.

Amendments to the "Regulation for Pharmaceutical Approvals, Notifications and Reviews";

The Ministry of Food and Drug Safety (MFDS) is proposing to amend the "Regulation for Pharmaceutical Approvals, Notifications and Reviews" as follows:

A. It will be allowed to use food raw materials in enteric nutritional supplements (Article 3 of the Draft)

B. Expansion of the scope of minor changes that do not require approval (Article 3-2 of the Draft)

C. Clarification of exemption from submission requirement of Certificate of Pharmaceutical Product (CPP), deletion of CPP for Common Technical Documents submission requirements (Articles 4, 6, and Annex 3 of the Draft)

D. Clarification of approval review data requirements for synthetic peptide drug products (synthetic peptide) that refers to a previously approved peptide drug product of recombinant deoxyribonucleic acid (rDNA) origin (peptide of rDNA origin) (Articles 7, 27, and Appendix 1 of the Draft)

E. Exemption from submission of genotoxicity test data if there is no change in the manufacturing process as a drug product already used in Korea (Article 7 of the Draft)

F. Acceptance of non-clinical data which utilized appropriate non-clinical data and alternative method instead of animal test as a result of on-site inspection for OECD member countries (Article 7 of the Draft)

G. Expansion of the scope of Science Citation Index (SCI) into Science Citation Index Expanded (SCIE) (Articles 7 and 14 of the Draft)

- H. Establishment of submission standards details for 'Overview of Risk Management Plan' (newly established in Article 7-2 of the Draft and Annex 6-3)
- I. Expansion of the scope of recognition of multiple specifications for active pharmaceutical ingredients (API) of pharmaceuticals (Article 12 of the Draft)
- J. Embodying description method of pharmaceuticals (Article 13 of the Draft)
- K. Application to MedDRA to specify precautionary information (Article 17 of the Draft)
- L. Update of safety and efficacy review standards for injections, ophthalmic solutions, and otic solutions (Articles 25 and 27 of the Draft)
- M. If a bioequivalence test is not possible or meaningless, it can be replaced with a scientifically valid test (Article 27 of the Draft)
- N. Update of standards for conducting bioequivalence tests for oral anticancer drugs, etc. (Article 27 of the Draft)
- O. Exemption from stability data in case of contract manufacture of entire process using the same manufacturing method (Article 28 of the Draft)
- P. Clarification of documents to be submitted for preliminary review (Newly established in Article 55 of the Draft and Annex 20)
- Q. Addition of National Essential Medicine (NEM) to expedited review categories (Article 58 of the Draft)

04/12/2023

Medical Devices; Laboratory Developed Tests;

Proposed rule -The Food and Drug Administration (FDA, the Agency, or we) is proposing to amend its regulations to make explicit that in vitro diagnostic products (IVDs) are devices under the Federal Food, Drug, and Cosmetic Act (FD&C Act) including when the manufacturer of the IVD is a laboratory. In conjunction with this amendment, FDA is proposing a policy under which FDA intends to phase out its general enforcement discretion approach for laboratory developed tests (LDTs) so that IVDs manufactured by a

laboratory would generally fall under the same enforcement approach as other IVDs. FDA is proposing this phaseout to better protect the public health by helping to assure the safety and effectiveness of LDTs. If finalized, this phaseout may also foster the manufacturing of innovative IVDs for which FDA has determined there is a reasonable assurance of safety and effectiveness.

G/TBT/N/EU/1019 05/10/2023	European Union	<p><i>The draft certification scheme primarily covers specialised IT and ICT equipment, such as integrated circuits, smart cards and related products (cryptographic elements, microcontrollers, dedicated software), network devices and systems (routers, switches, access points) and products for digital signatures (cryptographic modules, hardware security modules, secure servers). The draft certification scheme is not aimed at general purpose or consumer products</i> Draft Commission Implementing Regulation laying down rules for the application of Regulation (EU) 2019/881 of the European Parliament and of the Council as regards the adoption of the European Common Criteria-based cybersecurity certification scheme (EUCC); This draft Commission Implementing Regulation introduces the European Union Common Criteria-based certification scheme (EUCC) as the first scheme under the CSA certification framework. The European cybersecurity certification framework aims at increasing the trustworthiness of ICT products, ICT services and ICT processes by means of European cybersecurity certification schemes, as certification demonstrates that the scheme's cybersecurity requirements have been met. The framework also aims at avoiding the overlap of cybersecurity certification schemes across the Member States, reducing costs for undertakings operating in the digital single market as well as making available, transparent and comparable assurance statements to customers by means of certificates including marks and labels. The scheme builds on international standards (see point 8). The requirements and conformity assessment procedures are based on international standards.</p>	04/12/2023

waste incineration facilities and combined waste incineration facilities 05/12/2023

draft Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Technical Requirements for the Operation of Waste Incineration Facilities and Combined Cycle Waste Incineration Facilities";

the draft Resolutions proposes to approve the Technical Requirements for the operation of waste Incineration facilities and combined waste incineration facilities. These Technical Requirements define the key conditions for operators of stationary and mobile waste incineration facilities or waste combined cycle incineration facilities while operating them to prevent their negative impact on human health and the environment. The Requirements are mandatory for all operators of the facilities, except for the facilities defined in parts three and four of Article 38 of the Law of Ukraine "On Waste Management" (notified as G/TBT/N/UKR/251), according to which the provisions of Articles 38 and 39 of the mentioned Law do not apply to gasification or the pyrolysis facilities if the substances (gases) resulting from such thermal treatment of waste are purified to such an extent that they cease to be waste before they are incinerated and may cause emissions not exceeding those resulting from the incineration of natural gas. Moreover, the requirements of Articles 38 and 39 of the Law do not also apply to facilities that treat the following types of waste:

-plant waste from agriculture and forestry; plant waste from the food processing industry, if the heat generated is recovered; fibrous plant waste from the production of cellulose produced from primary raw materials and paper produced from cellulose raw materials, if they are jointly incinerated at the place of production and the generated heat is recovered; bark waste; wood waste (except those that may contain halogenated organic compounds or heavy metals as a result of treatment with preservatives or wood coating), including those generated from construction and demolition waste;

-waste generated as a result of field exploration and operation of oil and gas wells at offshore facilities located at sea, which is incinerated on board such facilities
