13/11/2026

Draft Order of the Ministry of Agrarian Policy and Food of Ukraine "On Amendments to the Order of the Ministry of Agrarian Policy and Food of Ukraine No. 118 of 12 March 2019" (concerning the Requirements for the Safety and Quality of Milk and Dairy Products)

The draft Order proposes amendments to Order of the Ministry of Agrarian Policy and Food of Ukraine of 12 March 2019 No. 118 "On Approval of the Requirements for Safety and Quality of Milk and Dairy Products", in particular with regard to: updating the requirements for materials and articles intended to come into contact with milk and dairy products at all stages of their production and placing on the market; clarifying the requirements for the application of the identification mark on the packaging of milk and dairy products; establishing requirements for providing the information contained in the identification mark in accompanying documents where products are placed in transport containers or large packages and intended for further processing, primary packaging or packaging at another establishment, as well as for liquid or powdered products transported in bulk or in tanks; allowing the same identification mark to be used for food products subject to the Requirements and food products not subject to the Requirements when they are produced at the same establishment. The Order is also notified under the SPS Agreement.

(common wheat) or <i>Triticum compactum</i> Host, (club wheat) or mixtures thereof, and includes “self-rising flour”, which is prepackaged for sale.	29/11/2026
G/TBT/N/EU/1238 30/09/2026	European Union	<i>Biocidal products</i> Draft Commission Implementing Regulation (EU) approving reaction products of ammonium bromide and sodium hypochlorite, generated in-situ (BAC) as an active substance for use in biocidal products of product-type 12 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council This draft Commission Implementing Regulation approves reaction products of ammonium bromide and sodium hypochlorite, generated in-situ (BAC) as an active substance for use in biocidal products of product-type 12	29/11/2026
G/TBT/N/EU/1239 30/09/2026	European Union	<i>Biocidal products</i> Draft Commission Implementing Regulation (EU) approving peanut butter as an active substance for use in biocidal products of product-type 19 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council This draft Commission Implementing Regulation approves peanut butter as an active substance for use in biocidal products of product-type 19	29/11/2026
G/TBT/N/EU/1240 30/09/2026	European Union	<i>Biocidal products</i> Draft Commission Implementing Regulation (EU) renewing the approval of magnesium phosphide releasing phosphine for use in biocidal products of product-type 18 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council This draft Commission Implementing Regulation renews the approval of magnesium phosphide releasing phosphine as an active substance for use in biocidal products of product-type 18, subject to compliance with certain conditions. The opinion of the European Chemicals Agency can be found on its website (Biocidal Products Committee opinions on active substance approval - ECHA (europa.eu))	29/11/2026
G/TBT/N/EU/1241 30/09/2026	European Union	<i>Biocidal products</i> Draft Commission Implementing Decision (EU) repealing Implementing Decision (EU) 2025/2284 postponing the expiry date of the approval of magnesium phosphide releasing phosphine for use in biocidal products of product-type 18 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council This draft Commission Implementing Decision repeals the latest postponement of the expiry date of the approval of	29/11/2026

magnesium phosphide releasing phosphine as an active substance for use in biocidal products of product-type (PT) 18. On 28 July 2020, an application was submitted in accordance with Article 13(1) of the Regulation (EU) No 528/2012 of the European Parliament and of the Council (BPR) for the renewal of the approval of magnesium phosphide releasing phosphine for PT 18. Commission Implementing Decision (EU) 2021/1285 postponed the expiry date of approval of magnesium phosphide releasing phosphine for PT 18 to 31 July 2024, and Commission Implementing Decision (EU) 2024/787 postponed further the expiry date to 31 January 2026. Finally, the expiry date was again extended, to 31 July 2027, by Commission Implementing Decision (EU) 2025/2284. On 27 May 2026 the Agency adopted its opinion on magnesium phosphide releasing phosphine for PT 18, having regard to the conclusions of the evaluating competent authority. Given the opinion of the Agency, it is appropriate to renew the approval of magnesium phosphide releasing phosphine for PT 18. Consequently, a draft Implementing Regulation is being prepared to renew the approval of magnesium phosphide releasing phosphine for PT 18 (examination procedure under Regulation (EU) No 182/2011). Further to that Implementing Regulation, it is necessary to repeal the latest postponement of the expiry date of the approval of magnesium phosphide releasing phosphine. The present draft Decision therefore intends to repeal Decision (EU) 2025/2284 postponing the expiry date of the approval of magnesium phosphide releasing phosphine for PT 18.

Israel

Table salt (HS code(s): 2501); (ICS code(s): 67.040)

29/11/2026

Public Health Protection (Food) (Iodized table salt enrichment), 5786 – 2026

Israeli research indicates a significant iodine deficiency among the Israeli population: approximately 60% of the child population suffers from iodine deficiency, and approximately 85% of pregnant women suffer from iodine deficiency, which may impair the normal development of the fetus. These data require structured, systematic state intervention to prevent and correct iodine deficiency through salt iodization, which is an effective, safe, and agreed-upon method implemented in over 120 countries worldwide. These new regulations prohibit the production or sale of table salt unless an iodine compound has been added, so the iodine content must be between 25 mg and 45 mg per kilogram of salt. It also defines terms, sets labeling requirements, and establishes a mechanism for monitoring implementation. The regulations will enter into force 12 months after publication in Israel's Official Gazette. This period is intended to allow the Israeli salt industry and importers to prepare for implementing the new requirements.

Japan

Guanidinoacetic acid as a feed additive.

Proposed revision of Ministerial Ordinance on the Specifications and Standards of Feeds and Feed Additives.

MAFF will amend the standard for method of manufacture of feeds in general stipulated in "Ministerial Ordinance on the Specifications and Standards of Feeds and Feed Additives" (Ordinance No. 35 of 24 July 1976 of the

		Ministry of Agriculture and Forestry). With this amendment, Guanidinoacetic acid imported into Japan as a feed additive will be permitted for use at a maximum inclusion level of 0.12% in feed for pigs and all chickens except hens, thereby increasing the maximum permitted level and expanding the scope of authorized animal species.

Cosmetics 01/11/2026
Draft Decree on the Management of Cosmetics
1. This Decree provides for the management of the production, notification, import, export and circulation of cosmetic products, including:
a) Production and quality control of cosmetic products in Vietnam;
b) Notification of cosmetic products;
c) Management of imported cosmetic products; issuance of Certificates of Free Sale for cosmetic products manufactured in Vietnam;
d) Product Information Files, labeling and advertising of cosmetic products;
đ) Quality management, safety of cosmetic products and cosmetovigilance;
e) Inspection, examination, supervision and post-market surveillance of cosmetic products;
g) Recall of cosmetic products, withdrawal of Management Numbers, and management measures applicable to establishments included in the Key Control List.
2. This draft Decree applies to domestic and foreign organizations and individuals engaged in the production, notification, import, export, circulation and trading of cosmetic products in the territory of Vietnam. The Draft Decree consists of 10 Chapters and 60 Articles,
Specifically:
1. Chapter I – General Provisions consists of 06 Articles providing for:
Scope of regulation and subjects of application; interpretation of terms; technical requirements for cosmetic products; risk classification of cosmetic products; implementation of administrative procedures and data management in the electronic environment; and management of the status of Management Numbers.
2. Chapter II – Manufacturing, Raw Materials and Quality Control at Manufacturing Establishments consists of 09 Articles providing for:
- Requirements for cosmetic manufacturing in accordance with Cosmetic Good Manufacturing Practices (CGMP), including requirements for professional personnel;

- Competence, dossiers, processes and procedures for issuance, re-issuance, amendment, temporary suspension, suspension and revocation of Certificates of Eligibility for Cosmetic Manufacturing;
- Decentralization to provincial-level People's Committees or delegated specialized authorities for the management of Certificates of Eligibility for Cosmetic Manufacturing;
- Inspection of continued compliance with cosmetic manufacturing requirements based on risk groups and risk levels, combining periodic and extraordinary inspections with on-site, remote or data-based assessments;
- Control of the origin, source, quality and legality of raw materials and bulk products used in cosmetic manufacturing.

3. Chapter III – Cosmetic Product Notification consists of 08 Articles providing for:

- Cosmetic products must be notified to the competent state authority before being placed on the market;
- Provisions on dossiers and procedures for cosmetic product notification and post-notification amendments;
- Following notification and disclosure of cosmetic product information, competent state authorities shall conduct post-notification dossier reviews and inspection and surveillance of cosmetic products circulating on the Vietnamese market.

4. Chapter IV – Management of Imported Cosmetic Products and Issuance of Certificates of Free Sale consists of 02 Articles providing for:

Imported cosmetic products must be notified prior to customs clearance, except for cases exempted from notification, such as imports for research or testing purposes, imports by diplomatic missions, or personal gifts not intended for commercial purposes; and provisions on the issuance of Certificates of Free Sale (CFS) for domestically manufactured cosmetic products intended for export.

5. Chapter V – Product Information File (PIF), Labeling and Advertising of Cosmetic Products consists of 05 Articles providing for:

- Cosmetic products placed on the market must have a Product Information File (PIF) in accordance with ASEAN guidelines;
- Requirements for Safety Assessment Reports included in the PIF in accordance with ASEAN guidelines;
- Labeling of cosmetic products shall comply with the laws on goods labeling, while mandatory labeling contents for cosmetic products shall comply with the ASEAN Cosmetic Directive;
- Provisions on electronic labeling, Digital Product Passports and product traceability;
- Advertising of cosmetic products shall comply with the laws on advertising

6. Chapter VI – State Management of Cosmetic Product Quality consists of 04 Articles providing for:

- Management of the quality and safety of cosmetic products;
- Conditions for circulation of cosmetic products, exemptions from cosmetic product notification procedures, and post-notification management of cosmetic products;
- Quality standards, testing laboratories and validity of test results;
- Cosmetic safety monitoring and cosmetovigilance.

7. Chapter VII – Inspection, Surveillance and Post-Market Control of Cosmetic Products consists of 09 Articles providing for:

- Risk classification and determination of principles, plans and competence for inspection and surveillance of cosmetic products;
- Post-notification dossier review, including review of notification dossiers and documents extracted from the Product Information File (PIF);
- Specialized inspections at cosmetic product notification, manufacturing, importing and trading establishments;
- Sampling, testing and handling of cosmetic products failing to meet quality or safety requirements, and other violations;
- Inspection and surveillance of cosmetic products in the online environment;
- Use of third-party conformity assessment results in inspection activities;
- Costs of sampling and testing, and prices of testing services.

8. Chapter VIII – Recall of Cosmetic Products, Withdrawal of Management Numbers and Risk Management Measures consists of 07 Articles providing for:

- Forms and scope of recall of cosmetic products; procedures for recall; and measures for handling recalled products (remediation, re-export or destruction);
- Cases, forms and procedures for withdrawal of Management Numbers;
- Risk management measures for establishments on the Key Control List. These establishments are subject to testing before products are placed on the market and to increased inspection. Their issued Management Numbers remain valid, and new notification dossiers continue to be accepted..

9. Chapter IX – Organization of Implementation consists of 06 Articles providing for:

Responsibilities of ministries, sectors, organizations and individuals involved in the manufacture and trading of cosmetic products.

10. Chapter X – Implementation Provisions consists of 04 Articles providing for:

Implementation roadmap, transitional provisions, effective date, and responsibilities for implementation.
