G/TBT/N/TUR/227 13/10/2025	Türkiye	<i>Ecodesign requirements for fans driven by motors with an electric input power between 125 W and 500 kW.</i> Draft Communiqué (2024/1834/EU) (SGM-2025/..) On Ecodesign Requirements For Fans Driven By Motors With An Electric Input Power Between 125 W and 500 kW; This Communiqué covers fans driven by motors with electrical input power between 125 W and 500 kW, including those integrated with other energy-related products specified in the Regulation on Eco-Design of Energy-Related Products This Communiqué shall not apply to: (a) fan impellers mounted on the shaft of electric motors with the sole purpose of cooling the motor itself; (b) fans integrated into laundry and washer-dryers with maximum electric input power lower than or equal to 3 kW; (c) fans integrated into kitchen hoods with total maximum electric input power attributable to the fan(s) lower than 280 W; (d) fans with a best energy efficiency point at 8 000revolutions per minute or more;	12/12/2025

(e) jet fans with maximum electric input power lower than 750 W;

3. This Communiqué shall not apply to fans that are specified to operate exclusively as follows and are specifically designed and marketed as such:

(a) in potentially explosive atmospheres, as defined in the Regulation on Equipment and Protective Systems Used in Potentially Explosive Atmosphere (2014/34/EU) published in the Official Gazette dated 30/6/2016 and numbered 29758

(b) for emergency use only, with regard to fire safety requirements as set out in the Construction Materials Regulation (305/2011/EU) published in the Official Gazette dated 10/7/2013 and numbered 28703, capable of short-time duty operation of 1 hour or more at temperatures of 300 °C and above;

(c) in nuclear installations; as defined in Regulation on Safety of Nuclear Facilities and Nuclear Materials

(d) in military establishments (bunkers) and civil defence establishments (bomb shelters);

(e) where operating temperatures of the gas being moved can be higher than 100 °C, or lower than – 40 °C, or both;

(f) where operating ambient air temperatures for the motor driving the fan, if located outside the gas stream, can be higher than 60 °C, or lower than – 30 °C, or both;

(g) with a supply voltage higher than 1 000V AC or higher than 1 500V DC;

(h) for handling toxic, highly corrosive or flammable gases or vapours; as defined in Regulation on Classification, Labeling, and Packaging of Substances and Mixtures

(i) for material transport, characterised by handling substances with a solid particle concentration of more than 10 mg/ m³ and particles with an average size of at least 0,1 mm and a hardness of at least 2 on the Mohs scale, while having an average blade angle of 50° to 90°;

(j) for handling gases containing biohazardous substances;

(k) for handling gases containing carcinogens or mutagens; as defined in Regulation on Health and Safety Measures in Work with Carcinogenic or Mutagenic Substances

(l) for handling gases with a compressibility factor, rounded to the nearest second decimal, in the designated pressure and temperature range of the scope that is not equal to 1,00;

(m) in cordless or battery-powered equipment;

(n) in handheld equipment whose weight is supported by hand during operation;

(o) in hand-guided mobile equipment moved while in operation;

(p) air circulating fans.

Ecodesign requirements for local space heaters and separate related controls 12/12/2025

Draft Communiqué (2024/1103/AB) (SGM-2025/..) On Ecodesign Requirements for Local Space Heaters and Separate Related Controls

This Communiqué applies to the following related products:

(1) This Communiqué covers domestic local space heaters with a nominal thermal power of 50 kW or less and commercial local space heaters with a nominal thermal power of 300 kW or less of the product itself or a single pipe section and the related separate controls.

		(2) This Communiqué shall not cover: (a) local space heaters using a vapour compression cycle or sorption cycle for the generation of heat driven by electricity or fuel; (b) local space heaters designed, tested, marketed and declared exclusively for outdoor use; (c) local space heaters of which the direct heat output is less than 6 % of the combined direct heat output and indirect heat output at nominal heat output; (d) air heating products; (e) sauna stoves; (f) cooking appliances. (3) Manufacturers, importers or authorised representatives shall not consider a product to fall outside the scope of this Communiqué on the basis of paragraph 2, if the design, the technical characteristics, the intended use, the marketing claims or any other information provided by the manufacturer, importer or authorised representative accompanying that product do not sufficiently distinguish it from local space heaters covered by this Communiqué.

Selected equipment (in the field of peaceful uses of nuclear energy), packaging for transport, storage or disposal of radioactive or fissile substances (ICS: 27.120) Energy and heat transfer engineering (ICS code(s): 27)

19/12/2025

Draft Decree amending Decree No 358/2016 on requirements for quality assurance and technical safety and assessment and verification of conformity of selected equipment;

The amendment to Decree No 358/2016 is prompted by the need to adapt current practice to the expected deployment of new nuclear sources. Proposed amendments:

- Formally and materially, there is a distinction between the processes of 'repair' and 'maintenance', which, especially in the operation of selected equipment, has not always been sharply and clearly delineated in practice.
- Implementation of the concept of 'part of selected equipment' introduced by the amendment to Act No 83/2025.
- Addition of measures to prevent so-called counterfeit or fraudulent items. This is equipment for which compliance with technical requirements was not adequately assessed, inadequate tests were carried out with varying degrees of planning or intent, inadequate documents were produced, and this equipment was subsequently delivered and deployed in the operation of the nuclear installation as fully-fledged and fully legally compliant selected equipment.
- Changes in conformity assessment procedures (e.g. the operator of the nuclear installation, and thus of selected equipment, is accepted as a conformity assessment body for its own needs. This concept was introduced by the aforementioned amendment to the Atomic Act and is further developed in the Decree).
- Newly established framework requirements for persons carrying out conformity assessments.

- Amendments to the annexes to the Decree, namely in specific areas of technical requirements, where individual requirements are clarified, as well as in specific conformity assessment procedures, where new conformity assessment procedures are introduced in part, e.g. for assessing the conformity of parts of selected equipment by the operator. At the same time, certain changes are being made to existing conformity assessment procedures as required by practice.

The mutual recognition clause is set out in the Atomic Act (Act No 263/2016).

G/TBT/N/EGY/556 15/10/2025	Egypt	<i>Building accessories (ICS code(s): 91.190)</i> The draft of the Egyptian Standard ES 1003 "building hardware - single-axis hinges- requirements and test methods".; The draft of the Egyptian standard ES 1003 specifies requirements for single-axis hinges, of lift-off or fixed pin type, for use on access windows and doors. Such windows and doors may or may not be fitted also with door closing devices. It includes tests for static loads, shear strength and allowable wear during durability cycling for the following hinges: a)mounted on the edge of the door leaf or window sash and opening in one direction only; b)whose axis of rotation is within 30 mm of an edge of the movable element for a door leaf mass of up to 160 kg; c)whose axis of rotation is within 30 mm of the edge for a window sash with a mass up to 60 kg. Worth mentioning is that this draft standard is technically identical with EN 1935:2002 /AC:2003.	14/12/2025
G/TBT/N/EGY/557 15/10/2025	Egypt	<i>Protective clothing (ICS code(s): 13.340.10)</i> The draft of the Egyptian standard ES 5648 " protective clothing — general requirements"; The draft of the Egyptian standard ES 5648 specifies general performance requirements for ergonomics, innocuousness, size designation, ageing, compatibility and marking of protective clothing and the information to be supplied by the manufacturer with the protective clothing.It is only intended to be used in combination with other standards containing requirements for specific protective performance and not on a stand-alone basis. Worth mentioning is that this draft standard is technically identical with ISO 13688:2013/AMD1:2021	14/12/2025
G/TBT/N/EGY/558 15/10/2025	Egypt	<i>Textiles in general (ICS code(s): 59.080.01)</i> The draft of the Egyptian standard ES 9069-3 " textiles — Determination of index ingredient from coloured textile - Part 3: Myrobalan "; The draft of the Egyptian standard ES 9069-3specifies a test method for the determination of the index ingredient of chemicals in coloured fabric with myrobalan. Worth mentioning is that this draft standard is technically identical with ISO 22195-3:2023.	14/12/2025
G/TBT/N/EGY/559 15/10/2025	Egypt	<i>Textiles in general (ICS code(s): 59.080.01)</i> The draft of the Egyptian Standard ES for " textiles — determination of fabric propensity to surface pilling, fuzzing or matting - part 1: pilling box method".;	14/12/2025

The draft of the Egyptian standard specifies a method for the determination of the resistance to pilling, fuzzing and matting of textile fabrics using a rotating pilling box apparatus. Worth mentioning is that this draft standard is technically identical with ISO 12945-1/2020.

G/TBT/N/EGY/560 15/10/2025	Egypt	<i>Textiles in general (ICS code(s): 59.080.01)</i> The draft of the Egyptian Standard ES for " Textiles — determination of fabric propensity to surface pilling, fuzzing or matting - part 2: Modified Martindale method".; The draft of the Egyptian standard specifies a method for the determination of the resistance to pilling, fuzzing and matting of textile fabrics using a modified Martindale method. Worth mentioning is that this draft standard is technically identical with ISO 12945-2/2020.	14/12/2025
G/TBT/N/EGY/561 15/10/2025	Egypt	<i>Textile machinery in general (ICS code(s): 59.120.01)</i> The draft of the Egyptian Standard ES for "Safety requirements for wetlaid-nonwoven machinery".; The draft of the Egyptian standard specifies safety requirements and means of verification for wetlaid-nonwoven machinery. It applies to wetlaid-nonwoven machines, including approach flow system, headbox, wire section and jet head, hydroentangling unit, dryer, finishing, quality control system (QCS), winder, drives and control system. Annex C illustrates general wetlaid-nonwoven machinery and their components. It deals with all significant hazards, hazardous situations and hazard events relevant to wetlaid-nonwoven machines, when used as intended and under the conditions foreseeable by the manufacturer. It does not deal with pressure hazards in steam-heated drying cylinders and does not apply to equipment under pressure. It does not apply to machines which are intended for use in explosive atmospheres. Worth mentioning is that this draft standard is technically identical with ISO 22291/2022.	14/12/2025
G/TBT/N/MYS/129 15/10/2025	Malaysia	<i>All food (ICS:67), Food preparations for use by infants or young children (HS Code: 2106.90.73 00).</i> Amendments to the Table I of Fifth A Schedule, Table III of Fifth A Schedule, Table IV of Fifth A Schedule, Table II of Sixteenth AA Schedule, Table IA of Twenty-First Schedule and Table III of Twenty-First A Schedule of the Food Regulations 1985 [P.U.(A) 437/1985].; The proposed amendments to the Schedules of the Food Regulations 1985 [P.U.(A) 437/1985] are as follows: 1. Table I of Fifth A Schedule is to insert new conditions for nutrient contents for use of nutrition claims by inserting a lactose content claim for 'low' and 'free' and its conditions; 2. Table III of Fifth A Schedule is to insert new nutrient function claim for vitamin C by inserting the phrase "(iii) Vitamin C contributes to the normal function of the immune system"; 3. Table IV of Fifth A Schedule is to insert new conditions for other function claims by inserting Lactobacillus rhamnosus (LGG) function claim and its minimum amount required; 4. Table II of Sixteenth AA Schedule is to insert new optional ingredients in formulated milk powder for	14/12/2025

children by inserting 3'-Sialyllactose (3'SL), 6'-Sialyllactose (6'-SL), Lacto-N-tetraose (LNT), and a mixture of 2'-Fucosyllactose (2'-FL) and DiFucosyllactose (DFL), with its specified maximum nutrient levels;

5. Table IA of Twenty-First Schedule is to insert new optional ingredients in infant formula by inserting 3'-Sialyllactose (3'SL), 6'-Sialyllactose (6'-SL), Lacto-N-tetraose (LNT), and a mixture of 2'-Fucosyllactose (2'-FL) and DiFucosyllactose (DFL), with its specified maximum nutrient levels; and

6. Table III of Twenty-First A Schedule is to insert new optional ingredients in follow-up formula by inserting 3'-Sialyllactose (3'SL), 6'-Sialyllactose (6'-SL), Lacto-N-tetraose (LNT), and a mixture of 2'-Fucosyllactose (2'-FL) and DiFucosyllactose (DFL), with its specified maximum nutrient levels.

16/01/2026

Draft amendments No. 2 to the Technical regulation of the Customs Union «On the safety of meat and meat products» (TR CU 034/2013);

Draft Amendment No. 2 proposes:

- Clarification of certain definitions within TR CU 034/2013, taking into account practical application, including the use of offal as components in the production of specific meat products;

- Addition of the term "animal-derived processing aid" to TR CU 034/2013, along with requirements for permissible levels and labeling information regarding such aids;

- Clarification of labeling requirements for meat products, including the indication of the main or predominant meat ingredients in the product name;

- Technical corrections to individual provisions of TR CU 034/2013.

HS 8418.61.00: Heat pumps other than air conditioning machines of heading 84.15

HS 8415.81.00: Air Conditioning Machines Others, Incorporating A Refrigerating Unit And Valve For Reversal Of The Cooling/Heat Cycle (reversible Heat Pumps)
HS 8418.99: Parts Of Refrigeration Or Freezing Equipment And Heat Pumps, Others

Regulation Impact Statement for Consultation: Energy Efficiency Policy Options for Heat Pump Water Heaters HPWH

The notified consultation document presents the following policy options:

1. Business as Usual option involves no change to the current situation i.e. no specification of minimum energy performance standards or the implementation of any requirement for voluntary or mandatory provision of information on the operation and performance of HPWHs.
2. Develop minimum energy performance standards (MEPS) to be set at the equivalent of the current minimum requirements for Small-scale Technology Certificates in Australia (equivalent to 60% energy savings in Zone 3) and a voluntary information provision.
3. MEPS (as per option 2) and mandatory information provision requiring heat pump water heaters (HPWH) suppliers to provide information on the performance of their products displayed either via a mandatory product label and the use of mandatory requirements to include performance information in all product marketing provided by the supplier for the unit.

In addition to the policy options, the Regulation Impact Statement for Consultation (CRIS) examines technical considerations such as test methods, standards, and the information that could be required to be displayed that impact the options. New Zealand's preferred option at this stage is Option 3, which combines minimum energy performance standards with mandatory information provision to ensure consumer confidence and support emissions reduction goals.
