G/TBT/N/TPKM/508 24/10/2022	Chinese Taipei	<i>Electric instantaneous or storage water heaters and immersion heaters (HS code(s): 851610)</i> Proposal for amendments to the legal inspection requirements for electric storage tank water heaters; The "Requirements on Minimum Energy Performance Standard and Energy Efficiency Rating Labelling and Inspection for Electric Storage Tank Water Heaters (Amendment Draft)," proposed by the Bureau of Energy (BOE), Ministry of Economic Affairs, was notified on 2 September 2022 as per G/TBT/N/TPKM/407/Rev.1. As the requirements on the capacity of inner tank are included in the notified amendment draft, the BSMI proposes to remove the requirement of Section 8.11 "Capacity of inner tank" of CNS 11010:2013 from BSMI's testing items to avoid overlapping jurisdiction with the BOE. The conformity assessment procedures for products subject to this notified measure remain the same, i.e. Registration of Products Certification (RPC) or Type-Approved Batch Inspection (TABI).	23/12/2022

Draft Decree of Minister of Industry on Mandatory Implementation of Indonesian National Standard for Plastics Raw Material;

This draft of decree states that of Plastics raw Material produced within the country or imported, distributed and marketed in the country shall fulfil the SNI requirements. The producers which produced these products therefore shall comply with those requirements proven by having Product Certificate for Using SNI Mark. The product certificate on SNI marking shall be issued by a Product Certification Body which has been accredited by KAN and appointed by the Minister of Industry through testing of the conformity of the products quality against SNI requirements. Directorate of Industrial Upstream Chemistry is the institution that is responsible for the implementation of this decree and shall provide a technical guidance of the decree, which cover procedure of Product Certification and SNI Marking. Products which are distributed in domestic market that originated domestically and imported shall meet the requirements consisted in:

•SNI 8887:2020, SNI 7593:2020, SNI 7808:2018, SNI 0594:2011, SNI 8432:2017, SNI 59:2017 which specifies term and definition, quality requirements, sampling, testing method, testing acceptance, marking requirement and packaging (this standard is available in Indonesian).

G/TBT/N/AUS/146 27/10/2022	Australia	<p><i>Bicycle helmets are products which are designed to offer protection to the cyclist's head during impact. It features a shell, liner, and retention strap fitted along the lower jaw area. The mandatory standard prescribes requirements for the design, construction, performance, and safety marking of bicycle helmets.</i></p> <p>Review of the mandatory standard for bicycle helmets - consultation email;</p> <p>The mandatory safety standard bicycle helmets references certain requirements in the 2008 edition of the voluntary Australian standard. The voluntary Australian standard was updated in 2020. The ACCC is proposing to make a new mandatory safety standard for bicycle helmets to allow suppliers to comply with the most recent edition of the voluntary Australian standard which is the following: Australian/New Zealand Standard (AS/NZS 2063:2020, Helmets for use on bicycles and wheeled recreational devices) In addition, the ACCC proposes to allow suppliers to comply with any of the following four widely adopted overseas voluntary standards: International Standard (Snell B-95, 1995 Bicycle Helmet Standard, 1998 revision Standard for Protective Headgear for Use in Bicycling) European Standard (EN 1078:2012+A1:2012, Helmets for pedal cyclists and for users of skateboards and roller skates) American Standard (ASTM F1447:2018, Standard Specification for Helmets Used in Recreational Bicycling or Roller Skating) American Standard (U.S. Consumer Product Safety Commission (16 C.F.R. Part 1203), Safety Standard for Bicycle Helmets) The new safety standard would not impose any requirements other than those contained in these voluntary standards. Allowing compliance with these standards would permit supply of helmets without the need to additionally test to the Australian standard. It is also intended to reduce regulatory complexity and duplication for suppliers, thereby further facilitating</p>	26/12/2022

trade. The attached consultation email outlines the ACCC's proposed steps.

G/TBT/N/EU/932 27/10/2022	European Union	<p><i>Biocidal products and treated articles treated with or incorporating biocidal products</i></p> <p>Draft Commission Implementing Decision on the non-approval of certain active substances for use in biocidal products in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council; This draft Commission Implementing Decision does not approve certain active substances in biocidal products pursuant to Regulation (EU) No 528/2012 of the European Parliament and of the Council. For these active substance/product-type combinations included in the review programme of existing active substances listed in Annex II to Regulation (EU) No 1062/2014, all the participants have withdrawn or are considered to have withdrawn their support, and no notification has been submitted for those to the European Chemicals Agency. Therefore, these active substance/product-type combinations should not be approved for use in biocidal products.</p>	26/12/2022
G/TBT/N/EU/933 27/10/2022	European Union	<p><i>Biocidal products and treated articles treated with or incorporating biocidal products</i></p> <p>Draft Commission Implementing Decision not approving d-Allethrin as an existing active substance for use in biocidal products of product-type 18 in accordance with Regulation (EU) No 528/2012 of the European Parliament and of the Council; This draft Commission Implementing Decision does not approve d-Allethrin as an active substance for use in biocidal products of product-type 18. According to the opinion of the Agency, biocidal products of product-type 18 containing d-Allethrin cannot be expected to meet the criteria laid down in Article 19(1), points (b)(iii), and (iv), of Regulation (EU) No 528/2012. In its opinion, the Agency noted that the proposed reference specifications, established on the basis of data provided by one of the applicants, are not in line with the composition of the material that was used for testing to generate the toxicological data provided by the applicants. As a result, on the basis of the data provided in the applications, it could not be established whether the representative biocidal products could fulfil the criteria referred to in Article 19(1), point (b) of Regulation (EU) No 528/2012. According to the opinion of the Agency, based</p>	26/12/2022

on the available toxicological data, an unacceptable risk has been identified for the general public due to secondary exposure to genotoxic photometabolites formed after the application of the representative products. In addition, according to the opinion of the Agency, an unacceptable risk to the environment has been identified for the aquatic compartment (surface water and sediment) and for soil. In conclusion, no safe use could be identified when considering the risks to human health and the environment for each of the representative biocidal products submitted in the applications.

G/TBT/N/MYS/114 27/10/2022	Malaysia	<i>HS Code 2203: Beer made from malt</i> <i>HS Code 2204: Wine of fresh grapes, including fortified wines; grape must other than that of heading 20.09</i> <i>HS Code 2205: Vermouth and other wine of fresh grapes flavoured with plants or aromatic substances</i> <i>HS Code 2206: Other fermented beverages (for example, cider, perry, mead, saké); mixtures of fermented beverages and mixtures of fermented beverages and non-alcoholic beverages, not elsewhere specified or included</i> <i>HS Code 2207: Undenatured ethyl alcohol of an alcoholic strength by volume of 80 % vol. or higher; ethyl alcohol and other spirits, denatured, of any strength</i> <i>HS Code 2208: Undenatured ethyl alcohol of an alcoholic strength by volume of less than 80 % vol.; spirits, liqueurs and other spirituous beverages</i> Amendments to regulations 361 to 386A and 387 and insertion of a new regulation, i.e. regulation 384A to the Food Regulations 1985 [P.U.(A) 437/1985];	26/12/2022

The proposed amendments to the Food Regulations 1985 [P.U.(A) 437/1985] involve the following:

1. Amendments to regulation 361 on general standard for alcoholic beverage.
2. Amendments to regulations 362 to 386A and 387 on specific requirements of alcoholic beverages in relation to the alcohol content, the addition of other ingredients, the use of food additives and labelling requirements. The purpose of the amendments on all provisions of food additives for alcoholic beverages is to harmonise the food additive requirements with the Codex Alimentarius, i.e., Codex General Standard for Food Additives (GSFA, Codex STAN 192-1995), in line with subregulation 19(2) of the Food Regulations 1985 [P.U.(A) 437/1985]. The conditions under which food additives may be used in alcoholic beverages can be directly referred to GSFA, Codex STAN 192-1995; and
3. Insertion of a new regulation, regulation 384A which prescribes the standard and labelling requirements for tequila and mezcal.

Liquefied gas for road transport, household and industrial use

Resolution of the Cabinet of Ministers of Ukraine of October 21, 2022 No. 1197 "On Amendments to Paragraph 4 of the Resolution of the Cabinet of Ministers of Ukraine of July 29, 2020 No. 667";

The Resolution of the Cabinet of Ministers of Ukraine of 29 July 2020 No. 667 (as amended) approved the Technical regulation on the requirements for liquefied gas for road transport, household and industrial use. This Technical regulation establishes requirements for liquefied gas used in vehicles with engines specially designed or converted to run on liquefied gas, and liquefied gas used as fuel for domestic and industrial purposes, which are placed on the market of Ukraine. The date of entry into force of the Resolution was determined as November 5, 2022. The Resolution of the Cabinet of Ministers of Ukraine of October 21, 2022 No. 1197 has amended the date of entry into force of the Resolution of the Cabinet of Ministers of Ukraine of July 29, 2020 No. 667, which approved the Technical regulation. Thus, the Resolution on approval of the Technical regulation (No. 667) will enter into force from the date of termination or cancellation of martial law in Ukraine. Liquefied gas that was put into circulation before the entry into force of the Resolution No. 667 and the quality indicators of which do not meet all or some requirements of the Technical regulation approved by the said Resolution, may be placed on the market within six months from the date of entry into force of the Resolution No. 667.

Energy Labeling Rule;

Advance notice of proposed rulemaking (ANPR) -The Federal Trade Commission (FTC or Commission) seeks public comment on potential amendments to the Energy Labeling Rule (Rule), including energy labels for several new consumer product categories, and other possible amendments to improve the Rule's effectiveness and reduce unnecessary burdens. The Commission seeks comment on amendments to its existing Energy Labeling Rule at 16 CFR part 305; specifically, on whether it should add new consumer product categories to the labeling program, increase the availability of online labels and other energy information, and streamline existing requirements. The Commission also seeks comment on whether any Rule changes are necessary to ensure the Rule's labeling provisions are consistent with current consumer shopping behavior. Finally, the ANPR seeks comment on whether the Commission should amend the Rule to: (1) modify its label content and format, (2) require links to online Lighting Facts labels consistent with current EnergyGuide requirements, (3) update the electricity cost figure on the Lighting Facts and ceiling fan labels, (4) update the refrigerator and clothes washer labels to remove dated information about test procedures, and (5) ensure the Rule's consistency with Department of Energy (DOE) requirements.
