G/TBT/N/BHR/711 21/10/2024	Bahrain, Kingdom of	<i>Fruits. Vegetables (ICS code(s): 67.080)</i> Bananas This standard applies to varieties of Bananas, to be supplied fresh to consumer, after preparation and packaging. Bananas intended for cooking only (plantains) or industrial processing are excluded.	20/12/2024
G/TBT/N/HND/103 21/10/2024	Honduras	<i>Energía solar (Código(s) de la ICS: 27.160)</i> RTH 27.03.03:24 INSTALACIONES SOLARES TÉRMICAS DE BAJA TEMPERATURA. REQUISITOS BÁSICOS DE INSTALACIÓN Este Reglamento Técnico Hondureño (RTH) establece los estándares en materia de seguridad, eficiencia, calidad, así como las condiciones técnicas básicas para garantizar el funcionamiento óptimo y extender la durabilidad de las instalaciones solares térmicas de baja temperatura. Con este enfoque se busca beneficiar a los usuarios de esta tecnología, al mismo tiempo que, contribuye a elevar el prestigio de las aplicaciones de sistemas de calentamiento solar de agua y otros fluidos. Este RTH aplica a los sistemas de calentamiento solar de circulación forzada y circulación natural o termosifón que se instalan en el territorio nacional, abarcando todos los componentes que lo conforman: hidráulicos, mecánicos, eléctricos o electrónicos.	20/12/2024
G/TBT/N/HND/104 21/10/2024	Honduras	<i>Motores eléctricos (Código(s) de la ICS: 29.160.30)</i> RTH 29.04.04.24: EFICIENCIA ENERGÉTICA. MOTORES DE CORRIENTE ALTERNA, TRIFÁSICOS, DE INDUCCIÓN, TIPO JAULA DE ARDILLA, EN POTENCIA NOMINAL DE 0,746 A 373 kW. LÍMITES, MÉTODO DE PRUEBA Y ETIQUETADO Este RTCA establece los valores de eficiencia nominal y mínima asociada, el método de prueba para su evaluación, los criterios de aceptación y las especificaciones de información mínima a marcar en la placa de datos de los motores eléctricos de corriente alterna, trifásicos, de inducción, tipo jaula de ardilla, en potencia nominal de 0.746 kW hasta 373 kW, abiertos y cerrados; que se importen a Honduras. Están cubiertos por esta reglamentación los ítems a seguir: <ul style="list-style-type: none"> • Motores eléctricos de corriente alterna, trifásica, de inducción, tipo jaula de ardilla, en potencia nominal de 0.746 kW hasta 373 kW; • Para operación en tensiones de corriente alterna trifásica 60 Hz, y tensión nominal de hasta 600 V, individualmente o en cualquier combinación de tensiones; • Frecuencia nominal de 60 Hz o 50 Hz para funcionamiento a 60 Hz; • Operación a frecuencia nominal de 60 Hz abierto o cerrado, de posición de montaje horizontal o vertical y régimen continuo. 	20/12/2024

20/12/2024

Draft Order of the Ministry of Agrarian Policy and Food of Ukraine "On Amendments to the Order of the Ministry of Agrarian Policy and Food of Ukraine No. 330 of 19 June 2019"

The draft Order of the Ministry of Agrarian Policy and Food of Ukraine proposes amendments to the Requirements for Honey, approved by the Order of the Ministry of Agrarian Policy and Food No. 330 of 19 June 2019 in terms of establishing requirements for indicating product name on bulk containers, packaging, and trade documents, as well as provisions regarding the composition, labelling, and origin of honey. The updated Requirements for Honey will be presented in a revised version. These amendments aim to align the Requirements for honey with the provisions of Council Directive 2001/110/EC of 20 December 2001 relating to honey, while also incorporating amendments introduced by Directive (EU) 2024/1438 of the European Parliament and of the Council of 14 May 2024 amending Council Directives 2001/110/EC relating to honey, 2001/112/EC relating to fruit juices and certain similar products intended for human consumption, 2001/113/EC relating to fruit jams, jellies and marmalades and sweetened chestnut purée intended for human consumption, and 2001/114/EC relating to certain partly or wholly dehydrated preserved milk for human consumption. It is also established that honey that meets the requirements in effect prior to the entry into force of this Order, but does not comply with the provisions of the Requirements for Honey approved by this Order, may be produced and/or placed on the market for three years from the date of entry into force of this Order. Such honey may remain in circulation until its consumption date or the expiration of its minimum shelf life.

United
Kingdom

Products covered fall under the Construction Products (Amendment etc.) (EU Exit) Regulations 2019 and the Construction Products (Amendment etc.) (EU Exit) Regulations 2020. These regulations in Great Britain cover a range of construction products, and routes to achieve CE marking for construction products. The overarching legal framework for CE marking recognition in Great Britain (GB), is the 2011 regulation that can be found here: Regulation (EU) No 305/2011 of the European Parliament and of the Council of 9 March 2011 laying down harmonised conditions for the marketing of construction products and repealing Council Directive 89/106/EEC (Text with EEA relevance) (legislation.gov.uk). The Construction Product

20/12/2024

Regulations will continue to be in force and apply to all products within scope. This extension applies to all products within scope. These are products which are covered by a designated standard. The list of the designated standards can be found here: Designated standards: construction products -GOV.UK (www.gov.uk)) or subject to a technical assessment, please see a list here: 'Pre-Exit' European Assessment Documents: construction products -GOV.UK (www.gov.uk).

Extension of CE ('Conformité Européenne') marking for construction products in Great Britain

The United Kingdom (UK) Government has announced that the recognition of Conformité Européenne' (CE) marking for a subset of construction products placed on the market in Great Britain will continue beyond the previously stated deadline of the 30 June 2025. This legislation applies to Great Britain (England, Scotland and Wales). The longer-term future of CE marking (and the UK's 'United Kingdom Conformity Assessed' (UKCA) marking) in Great Britain will be considered as part of the system wide reform of the construction products regulatory regime. Any subsequent changes to the recognition of CE marking would be subject to a minimum 2-year transitional period.

Roof waterproofing PVC sheets (HS code(s): 391990; 3920; 3921); (ICS code(s): 01.040.91; 91.100.50)

21/12/2024

SI 1430 part 1 -Roof waterproofing sheets: Poly(Vinyl Chloride) sheets;

Revision of the Mandatory Standard SI 1430 part 1, dealing with Roof waterproofing PVC sheets. This proposed standard revision adopts both the European Standard EN 13956: December 2012 and the American Standard ASTM D4434/D4434M –21 and allows compliance with either. The major differences between the old version and this new revised draft standard are as follows:

1. In the European route of compliance:
 - o Changes the mandatory requirements based on the German Standard DIN V 20000-201: 2006-11, to be voluntary recommendations;
 - o In Section 5.2.5 -Deletes the option for the sheets to comply with Israel Standard SI 921.
2. In the American route of compliance:

o Omits the requirement to classify the sheets according to fire resistance according to the Israeli standard TI 921.
o Adopts an updated version of the American Standard.
Both the old and the new revised standards will apply from entry into force of this revision for a transition period of six months. During this time, products may be tested according to the old or the new revised standards.

Electric cables marked with CENELEC codes H07V2-U - H07V2-R, H07V2-K (HS code(s): 854420; 854430); (ICS code(s): 29.060.20) 21/12/2024

SI 50525 part 2.31 -Electric cables –Low voltage energy cables of rated voltage 450/750 V (U0/U): Cables for general applications –Single core non-sheathed heat resistant cables with thermoplastic PVC insulation

Revision of the Mandatory Standard SI 60227 part 3 to be partially replaced with SI 50525 part 2.31, relating only to products with the following characteristics: electric cables marked with CENELEC codes H07V2-U, H07V2-R and H07V2-K with a single core, non-sheathed, with thermoplastic PVC insulation that are intended for permanent fixed wiring :

- The rated voltage is 450/750 V in an alternating current;
- The maximum conductor operating temperature for the cables in this standard is 90 °C
- The conductor shall be in one of the following forms:
 - oFlexible cable conductor for permanent installations (for sign -K);
 - oFixed, round, braided conductor (for sign -R);
 - oFixed, round, solid (for sign -U).

This proposed standard revision adopts the European Standard EN 50525-2-31: May 2011, with a few changes that appear in the standard's Hebrew section. The major change introduced in this revision is the transference of electric cables marked with CENELEC codes H07V2-U, H07V2-R and H07V2-K from SI 60227 part 3 to SI 50525 part 2.31. Both the old and the new revised standards will apply from entry into force of this revision for a transition period of one year. During this time, products may be tested according to the requirements of the old or the new revised standard.

Bandages (HS code(s): 300590); (ICS code(s): 11.120) 21/12/2024

SI 1147 -The elastic properties of flat, non-adhesive, extensible fabric bandages

Revision of the Mandatory Standards SI X 1147, SI 1147 part 1, SI 1147 part 2 and SI 1147 part 3, dealing with bandages, to be replaced with SI 1147. This proposed standard adopts the British Standard BS 7505:1995, including its incorporating Corrigenda 1 and 2. This new standard differs significantly from the previous standards. The Hebrew section of this draft includes the following changes:

- Changes in the labelling requirements included in Section 6;
- Adds a new normative Annex B, with a Hebrew translation of Table 1, "bandages type classification according to their functions".

Both the old and the new revised standards will apply from entry into force of this revision for a transition period of one year. During this time, products may be tested according to the old or the new revised standards.

South Africa *Liquor products*

21/12/2024

Amendments to the Regulations of the Liquor Products Act, Act 60 of 1989 and the Wine of Origin Scheme;

REGULATIONS: AMENDMENT

Provision for agave classes, beer classes, traditional African beer classes, other fermented beverages, dairy free liqueur and flavoured spirits in the regulations. Make provision for mead, rice fermented beverage, grain fermented beverage, sugar fermented beverage, sacramental beverage, orange juice and sugar fermented beverage and kombucha and sugar fermented alcoholic beverage under the other fermented beverages category of liquor. Provide for a definition for "prepackaged". Lower the maximum alcohol content of all spirit classes. Make provision for an Absinthe class, amend the definition of Gin, make provision for distilled gin, London dry gin and flavoured gin. Make provision for the labelling of Rose wine aged in red wine casks under specific conditions and MCC sparkling wines. Provide guidelines for lower in alcohol and comparative labelling claims. Make provision for best before date and production date in addition to filling date on the labelling of a liquor product. Allow for some flexibility with regards to the indication of Lot numbers.

Make provision for the indication of drinking messages under the regulations of the Liquor Products Act, as currently required by the Foodstuffs, Cosmetics and Disinfectants Act, Act 54 of 1972, administered by the South African Department of Health. Amendment of regulation 58 to provide for guidelines during the appeal process. Update regulation 59 concerning offences and penalties. Amendment of Table 1 by addition of new grape cultivars for the production of wine. Amendment of Table 6 and 7, substances which may be added and removed from liquor products to list additives for all the new categories of liquor products and allowed practices.

WINE OF ORIGIN AMENDMENT

Provision for single vineyard wine, skin fermented white, moscato and amendment of section 23, 24 and 27. Provision for older white and red wine to be excluded from sampling under certain conditions. Table 1 and 22, addition of vine cultivars and synonyms to which the Scheme applies and for the production of Blanc de Noir wine. Revision and update of Table 4 regarding unacceptable quality characteristics of wine intended for certification under the scheme. Substitution of the word "board" in the scheme with the expression "WCA".

Draft Order of the Ministry of Health of Ukraine "On Approval of Amendments to the Procedure for Confirmation of Compliance of Manufacturing Conditions of Medicines with the Requirements of Good Manufacturing Practice"

The draft Order of the Ministry of Health of Ukraine "On Approval of Amendments to the Procedure for Confirmation of Compliance of Manufacturing Conditions of Medicines with the Requirements of Good Manufacturing Practice" has been developed pursuant to Article 9-1 "Peculiarities of state registration of medicines that may be procured by a person authorised to conduct

procurement in the healthcare sector" of the Law of Ukraine "On Medicines", as well as to confirm compliance of manufacturing conditions with the requirements of good manufacturing practice for those medicines procured by a person authorized to conduct procurement in the healthcare sector. The draft Order provides for the regulation of the procedure for confirming the compliance of the manufacturing conditions of medicines registered by the competent authority of the United States of America, the Swiss Confederation, Japan, Australia, Canada, a Member State of European Union, or registered by the competent authority of European Union under a centralised procedure. This is intended for the purposes of procurement conducted by a person authorised to carry out procurement in the healthcare sector, in accordance with the requirements of Good Manufacturing Practice (GMP) issued by the competent authority of the USA, Switzerland, Japan, Australia, Canada, and EU Member State, based on the results of an inspection for compliance with GMP requirements.

Medicines

21/12/2024

Draft Resolution of the Cabinet of Ministers of Ukraine "On Amendments to Clause 6 of the Procedure for State Quality Control of Medicines Imported into Ukraine"

The draft Resolution of the Cabinet of Ministers of Ukraine "On Amendments to Clause 6 of the Procedure for State Quality Control of Medicines Imported into Ukraine" has been developed to deregulate the process of state control of radioactive and radiopharmaceutical medicines imported into Ukraine, as well as and to facilitate open electronic interaction between executive authorities and business entities. Radioactive and radiopharmaceutical medicines are specific sources of ionizing radiation, the active ingredient of which is a radioactive isotope (radionuclide). They are widely used worldwide and in Ukraine for the diagnosis and treatment of oncological diseases. Manufacturers of radioactive and radiopharmaceutical medicines release new batches on a weekly basis, which is related to the unique physical characteristic of these drugs -the half-life of the radionuclide (the time it takes for half of the atoms of a given radionuclide to decay). For example, the half-life of Iodine-131 (I-131) is 8 days. Additionally, radioactive and radiopharmaceutical medicines have a short shelf life, ranging from 21 to 28 days from the date of production. The draft Resolution aims to resolve discrepancies between the requirements of the Procedure for State Quality Control of Medicines Imported into Ukraine, approved by the Resolution of the Cabinet of Ministers of Ukraine on 14 September 2005 No. 902, and the physical properties of radioactive and radiopharmaceuticals in order to prevent delays or rescheduling of diagnostics and treatment for cancer patients, thereby reducing significant risks to their health and life. The proposed amendments comply with the requirements of Directive 2001/83/EC of the European Parliament and of the Council of 6 November 2001 on the Community code relating to medicinal products for human use in terms of the wholesale trade in medicines (distribution) and imports, including radiopharmaceuticals. In addition, to ensure efficient,

		transparent and open electronic interaction between executive authorities and business entities in accordance with the Law of Ukraine "On Electronic Documents and Electronic Document Management", it is proposed to add Clause 6 with a new rule regarding the submission of information on imports and accompanying documents through the e-government web portal for quality control of medicines of the State Service of Ukraine on Medicines and Drugs Control.

- Gluten free foods
- Meal replacements and nutritional supplements

Proposed compositional requirements for infant foods and foods currently regulated as foods for special dietary use

- Health Canada is working to modernize its regulations on infant foods and foods for special dietary use. These foods are regulated under Divisions 24 and 25 of the Food and Drug Regulations. On October 23, 2024, Health Canada launched a 60-day pre-consultation specific to the compositional requirements of these foods.
 - This consultation is a follow up to the pre-consultation on the Regulatory Modernization of Foods for Special Dietary Use and Infant Foods: Divisions 24 and 25 of the Food and Drug Regulations, (<https://www.canada.ca/en/health-canada/programs/consultation-regulatory-modernization-foods-special-dietary-use-infant-foods/document.html>) held from November 28, 2023, to February 26, 2024.
 - The proposed compositional requirements vary by product category and include: energy, macronutrients and micronutrient amounts.
- The consultation will close to new input on December 23, 2024.

Draft Law of Ukraine "On Amendments to Certain Legislative Acts of Ukraine to Harmonize Them with the Legislation of European Union in the Field of Organic Production, Circulation and Labeling of Organic Products"

The draft Law outlines the fundamental principles and requirements for organic production, circulation, and labeling of organic products, as well as establishes the legal and organizational framework for state control intended to verify compliance by operators and groups of operators with the legislation governing organic production, circulation, and labelling, and to oversee authorized certification bodies. It is developed to align the Law of Ukraine "On Basic Principles and Requirements for Organic Production,

Circulation and Labeling of Organic Products" with the provisions of Regulation (EU) 2018/848 of the European Parliament and of the Council of 30 May 2018 on organic production and labelling of organic products and repealing Council Regulation (EC) No 834/2007. The draft Law provides for the following:

- to expand the scope of legislation related to organic production, circulation and labeling of organic products by expanding the types of products that can be certified as organic;
- to extend mandatory certification requirements to businesses that sell organic products and/or products in the transition period directly to the end consumer, except for the sale of packaged organic products, products in the transition period, provided that these businesses do not engage in production, storage (except for storage related to the place of sale) or imports of such products, as well as do not delegate these activities to third parties on a contractual (tolling) basis;
- to increase the number of state registers in the field of organic production, circulation and labeling of organic products, specifically by establishing the State Register of Organic Animals and Aquaculture Young stock;
- to implement a system of state control in organic production, circulation and labeling of organic products, which provides for the authorization of certification bodies to conduct state control measures and supervision by the competent supervisory authority over authorized certification bodies, particularly in the form of annual audits;
- to implement a procedure for authorizing a certification body by the competent authority to conduct certain state control measures and other official activities;
- to authorise the competent authority to approve exceptions to organic production requirements by operators (groups of operators), as well as to approve a retrospective start date for the transition period;
- to introduce the possibility of certifying group of operators;
- to update the requirements to the List of products and substances permitted for use in organic production under certain conditions and the conditions of their use, aligning it with European legislation;
- to define the categories of organic products within which the certification of organic production and circulation of organic products is carried out, and according to which EU organic products are traded with third countries;
- to implement a reporting procedure on the areas of land used for organic production, as well as on the volumes of organic products produced, sold and imported;
- to provide for a clear mechanism for responding to cases of non-compliance or justified suspicion of non-compliance by operators and authorized certification bodies, including conducting an official investigation to determine the source and cause of the ingress of products or substances not permitted for use in organic production into organic products or products in the transition period;
- to align the labeling requirements for organic products and products containing organic ingredients with European legislation, in particular, to establish specific labeling provisions for hunting or fishing products containing organic ingredients.

The draft Law also states that organic products and products in the transition period produced before the enactment of this Law, and labeled according to the legislation on organic production, circulation and labeling that was in effect prior to this Law, may be placed on the market and/or remain in circulation

until consumption end date, expiration date, minimum shelf life, or "use by" date (for food products), as well as until the end of the minimum storage period (for feed).
