G/TBT/N/THA/798 27/10/2025	Thailand	<i>Narcotic Drugs</i> Notification of the Ministry of Public Health RE: Classification of Schedule IV Narcotic Drugs (No. 3) B.E. 2568 (2025)	

Piperonal was originally classified as a Schedule IV narcotic drugs under the Narcotics Code, without any specified exemptions. However, in order to facilitate its use for industrial purposes while ensuring appropriate and comprehensive regulatory oversight to prevent diversion for illicit use — an amendment has been made to introduce specific exemption conditions. Under this amendment, piperonal shall not be classified as a Schedule IV narcotic drugs when used as a component in flavouring agents for food products, cosmetics, or hazardous substances intended for household or public health use, provided that the concentration of piperonal does not exceed 10%. In addition, Piperonal used as a component in food products, cosmetics, or hazardous substances intended for household or public health use, at a concentration not exceeding 1%, shall be exempted from classification as a Schedule IV narcotic drugs.

G/TBT/N/UGA/2244 27/10/2025	Uganda	<i>Ball-point pens (HS code(s): 960810); Miscellaneous domestic and commercial equipment (ICS code(s): 97.180); Ballpoint pens</i> DUS 483:2025, Ball pens — Specification, Second Edition This Draft Uganda Standard establishes minimum quality requirements for ballpoint pens for general use. This Draft Standard applies to the following types: a) ballpoint pens with a retractable, non-replaceable refill; b) ballpoint pens with retractable, replaceable refill; c) ballpoint pens with a non-retractable, non-replaceable refill; d) ballpoint pens with a non-retractable, replaceable refill; e) a direct refill.	26/12/2025

Draft Resolution of the Cabinet of Ministers of Ukraine "On Amendments to Resolutions of the Cabinet of Ministers of Ukraine No. 539 of 10 May 2024 and No. 847 of 23 July 2024"

The draft Resolution provides for extending the deadlines for implementing the Technical Regulation on Hazard Classification, Labeling and Packaging of Chemical Products, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 539 of 10 May 2024 (notified in G/TBT/N/UKR/180/Rev.2/Add.1) and the Technical Regulation on Safety of Chemical Products, approved by the Resolution of the Cabinet of Ministers of Ukraine No 847 of 23 July 2024 (notified in G/TBT/N/UKR/179/Rev.2/Add.1). As regards the Technical Regulation on Hazard Classification, Labeling, and Packaging of Chemical Products, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 539 of 10 May 2024, the amendments provide for allowing the continued marketing of chemical products already placed on the market before the entry into force of this Technical Regulation for a period of 18 months instead of one year, as originally specified in Resolution No. 539 (i.e., until 15 May 2026). The amendments also postpone the application of the Regulation until 15 November 2027 for chemical substances and 1 May 2028 for mixtures.

In addition, a provision is introduced stipulating that the placing on the market of chemical products whose labeling and/or packaging does not comply with the requirements of Sections 3 and/or 4 of the Technical Regulation, and which were placed on the market before 1 January 2027, shall not be prohibited or restricted on the grounds of non-compliance with those requirements until 1 July 2028.

Concerning the Technical Regulation on Safety of Chemical Products, approved by the Resolution of the Cabinet of Ministers of Ukraine No 847 of 23 July 2024, the amendments stipulate that chemical products placed on the market before the entry into force of this Technical Regulation and not complying with its requirements may be placed on the market for a period of 18 months instead of one year from the date of its entry into force, as originally specified in Resolution No. 847 (i.e., until 26 July 2026). The amendments also provide that items 17, 18, 20, 21, 67 and 72 of the Technical Regulation shall not apply if an existing chemical substance is manufactured or placed on the market: in quantities of 1,000 tonnes per year or more – until 1 October 2029; in quantities of 100–1,000 tonnes per year – until 1 June 2031; in quantities of 1–100 tonnes per year – until 1 March 2033. Items 17, 18, 20, 21, 67 and 72 of the Technical Regulation shall not apply until 1 October 2028 for existing chemical substances that meet the hazard classification criteria set out in the Technical Regulation on Hazard Classification, Labeling, and Packaging of Chemical Products (Resolution No. 539 of 10 May 2024). The amendments to item 66 of the Technical Regulation provide that other chemical substances that are manufactured or imported as individual substances in quantities of one tonne per year or more, or collectively within any types of chemical products, exclusively for the production of plant protection products (pesticides) or disinfectants (biocides), shall be subject to state registration in accordance with the provisions of Section 2 of this Technical Regulation. The requirement for prior state registration of a chemical substance, as set out in item 142 of the Technical Regulation, is proposed to be extended by one year.

UAE Technical Regulations for Requirements for The Nutri-Mark on Front of Pack Labeling

This regulation specifies the general principles and specific requirements for placing front-of-pack (FOP) nutrition labelling on food and beverage products listed in Annex (5) of the regulation, which are presented in their final form to the consumer and printed or affixed on the main display panel or an alternative main display panel. The following categories of food and beverage products are exempt from applying the Nutri-Mark nutrition label: Foods, as defined in clause (5.3) of the regulation, that contain minimal amounts of energy or nutrients and can be considered negligible, such as spices and flavorings. Fresh vegetables and fruits (whole or cut) to which no ingredients or preservatives have been added. Fresh or chilled meat, poultry, and fish that are unseasoned or uncooked. Foods served directly to consumers from preparation sites (except baked goods and pastries). Foods composed of a single ingredient such as rice, tea, coffee, or sugar. Food additives. Foods intended for manufacturing or packaging purposes and not for direct sale. Foods presented in small external packages (area less than 25 cm²). Bottled water and mineral water. Self-service packages if accompanied by a nutrition label on a display board or the original container. Foods and beverages for athletes. Infant foods intended for children aged 0 to 3 years. Infant formula and follow-up formula. Processed cereal-based foods and baby foods. Foods for special medical purposes. Total meal replacements and meal substitutes. Dietary supplements.

Limited review of the mandatory safety standard for Child Restraint Systems for Use in Motor Vehicles; (6 pages, in English) accessed via link below.

The mandatory standard for child restraint systems for use in motor vehicles (the mandatory standard) Competition and Consumer Act 2010 - Consumer Protection Notice No. 3 of 2014 - Safety Standard: Child Restraint Systems for use in Motor Vehicles, came into effect in 1978 and aims to ensure child restraints supplied in Australia have key safety features to reduce the risk of bodily injury to children in the event of a motor vehicle impact. The mandatory standard currently references and allows compliance with any one of the 2004, 2010 or 2013 versions of

the voluntary Australian standard AS/NZS 1754 Child restraint systems for use in motor vehicles with variations set out in the mandatory standard. The ACCC is conducting a limited review of the mandatory standard. The purpose of this limited review is to seek stakeholders' views about: updating the safety standard to reference and allow compliance with the 2024 version of the voluntary Australian standard AS/NZS 1754:2024 Child restraint systems for use in motor vehicles whether adding dynamic references is appropriate - so updates to the referenced voluntary standard flow through to the mandatory standard allowing a transition period to support industry compliance, this is because the safety standard currently references the 2004, 2010 and 2013 versions of the voluntary Australian standard. Significant changes such as altering the scope of the mandatory standard or other major requirements (such as performance measures) are not being considered in this limited review. The safety standard was last reviewed in 2014 and prescribes requirements for the design, construction, performance, testing and informative labelling of child restraints. The safety standard applies to devices that reduce the risk of bodily injury to a child in the event of a motor vehicle impact and includes children's car seats, booster seats components to restrain the child with a harness, and to anchor the child restraint to the vehicle. The safety standard does not apply to motor vehicle child restraints designed for children with a disability or to items that are an integrated feature of a motor vehicle.

Authentication and Traceability Standard (A&T) of Health Products and Technologies (HPTs), Version 0, 2025

This document provides a comprehensive framework for the implementation of Authentication and Traceability (A&T) standards for Health Products and Technologies (HPTs) in Kenya. It aims to safeguard patient safety, ensure product integrity, and secure the medical supply chain from falsified and substandard products. The standard applies to all stakeholders involved in the supply chain of regulated medical products—from manufacturers to pharmacists—including importers, distributors, wholesalers, healthcare providers, and A&T service providers. It covers therapeutic and non-therapeutic products, such as: Oral and non-oral medications, Herbal medicines, Medical devices and diagnostics, Cosmetic products with medical claims.

United Kingdom

Cosmetic products are defined by Article 2(1)(a) of Regulation (EC) No 1223/2009ESSENTIAL OILS AND RESINOIDS; PERFUMERY, COSMETIC OR TOILET PREPARATIONS (HS code(s): 33)

The Cosmetic Products (Restriction of Chemical Substances) Regulations 2026

This measure will amend Regulation (EC) No 1223/2009 (“the Cosmetic Regulation”) as it applies in Great Britain to lower the threshold for labelling requirements for formaldehyde releasing substances and prohibit the use of 3-(4-Methylbenzylidene)-d1 camphor/Enzacamene (4-MBC) in cosmetic products. The measure will also prohibit 16 new substances that have been classified as carcinogenic, mutagenic and reprotoxic (CMR) substances under Regulation (EC) No 1272/2008 (the GB Classification, Labelling and Packaging (CLP) Regulation).
