This document applies to the AC or DC-powered flat-panel and curved displays that mainly serve to display video, image or text information, including general-purpose displays and commercial displays working with liquid crystal (LCD) and organic light emitting diode (OLED) respectively.

This document applies to AC-powered LED display terminals working with LED, with the pixel spacing not exceeding (including) 2.5 mm, and the maximum brightness not exceeding 3,000 cd/m<sup>2</sup>.

This document does not apply to the display devices with the screen size less than 11.6 inches, monitors dedicated to image evaluation in TV program shooting, production and broadcasting, dual-screen displays, special-purpose displays for virtual reality (AR/VR/MR), industrial equipment, medical equipment and LCD console (KVM/KMM), microcomputers, mobile phones and tablets, TV products with radio frequency interfaces or displays mainly dedicated to radio and TV display, and the displays that only support battery power supply.

New  
Zealand

Notification covers the following products, classified in various HS codes under 8415, 8418, 8479, 8609, 8704, and 8902:

- Household refrigerators
- Dehumidifiers
- Household and small commercial air-conditioning & heat pumps
- Vehicle air-conditioning (excluding trains and buses)
- Passenger vehicle air-conditioning (e.g., trains and buses)
- Heavy commercial and industrial air-conditioning
- Commercial refrigeration (e.g., food retail, supermarkets & self-contained cabinets)
- Commercial refrigeration (e.g., <40kW rated capacity excluding food retail and applications below -50°C)
- Transport refrigeration (e.g., refrigerated trucks, shipping containers, fishing boats and reefer vessels)
- Industrial refrigeration (e.g., stationary refrigerant systems with rated capacity >40kW excluding applications below -50°C)

**Proposed measures to reduce the environmental impact of fluorinated gases consultation document:**

<https://environment.govt.nz/publications/proposed-measures-to-reduce-the-environmental-impact-of-fluorinated-gases-consultation-document/>

The attached consultation document outlines New Zealand's proposals to reduce emissions from Fluorinated gases and refrigerants. This includes proposals for a mandatory product stewardship scheme for refrigerants, and stepped prohibitions on both the import and sale of goods containing hydrofluorocarbon (HFC) refrigerants (referred to as pre-charged equipment). A proposed prohibition on the import and sale of pre-charged equipment would ensure that the use of refrigerants with high global warming potentials (GWPs) would not continue once alternatives are available, while a phased approach would also avoid the need to immediately transition to lower-GWP alternatives and address the financial burden associated with transitioning equipment. These proposed prohibitions would work by imposing a GWP limit on specific classes of goods after specific dates. After these dates, the described goods would not be able to be imported or sold if they contained a HFC refrigerant with a GWP at or above the specified level. The current proposed timeline would impose prohibitions in three tranches: 1 January 2025, 1 January 2028, and 1 January 2032. The prohibition timeline proposed in the consultation document was formed based on external expertise, advice from industry groups, and other government policies.

- Gas meters (HS code(s): 902810)

**Draft Amendments to Technical Specification for Type Approval of Diaphragm Gas Meters;**

The Technical Specification for Type Approval of Diaphragm Gas Meters was promulgated and implemented on November 19, 2003, and the latest revision date was October 27, 2017. As gas meters with electronic indicating devices were recently introduced in the domestic market, the BSMI proposes to amend The Technical Specification for Type Approval of Diaphragm Gas Meters in accordance with

14/01/2023

		OIML R 137:2012 to ensure the accuracy of diaphragm gas meters.

<a href="#">G/TBT/N/USA/1942</a> 15/11/2022	United States of America	<i>Survival craft equipment; Other protective equipment (ICS code(s): 13.340.99); Shipbuilding and marine structures in general (ICS code(s): 47.020); Seagoing vessels (ICS code(s): 47.040)</i> <b>Survival Craft Equipment--Update to Type Approval Requirements;</b> Final rule -The Coast Guard is updating the type approval requirements for certain types of equipment that survival craft are required to carry on U.S.-flagged vessels. This rule will remove Coast Guard type approval requirements for nine of these types of survival craft equipment and replace them with the requirement that the manufacturer self-certify that the equipment complies with a consensus standard. Type approval is the primary process for equipment and materials to receive Coast Guard approval. Updating type approval requirements for survival craft equipment will result in cost savings to equipment manufacturers, vessel owners and operators, and the Coast Guard.

Egypt

*Domestic safety (ICS code(s): 13.120); Dishwashers (ICS code(s): 97.040.40)*

16/01/2023

**Draft of Egyptian standard "ES 6575" Safety requirements of Household and similar electrical appliances -Particular requirements for dishwashers";**

This draft of Egyptian standard concerned with the safety of electric dishwashers for household and similar purposes that are intended for domestic use designed for washing and rinsing dishes, cutting tools and other containers, and its rated voltage is not more than 250 volts for single-sided appliances and 480 volts for other appliances. Appliances intended for normal household and similar use which can also be used by private persons in shops, light industry and farms fall within the scope of this standard. However, if the appliance is intended for professional use for washing and rinsing dishes, cutlery and other utensils used for commercial purposes, the appliance is not considered for home use. This standard is concerned, whenever practical, with the common hazards resulting from appliances, which all persons face in and around the home. In general, this standard does not take into account the following cases: Unsupervised use of devices by young children or people with special needs. Young children playing with devices.

Worth mentioning is that this draft standard is technically identical with modification with IEC 60335-2-5:2012+AMD1:2018

*Solar energy engineering (ICS code(s): 27.160); Cables (ICS code(s): 29.060.20)*

16/01/2023

**Draft of Egyptian standard "Electric cables for photovoltaic systems with a voltage rating of 1,5 kV DC";**

This draft of Egyptian standard applies to single-core cross-linked insulated power cables with cross-linked sheath. These cables are for use at the direct current (DC) side of photovoltaic systems, with a rated DC voltage up to and including 1,5 kV between conductors and between conductor and earth. This document includes halogen free low smoke cables and cables that can contain halogens. The cables are suitable to be used with Class II equipment as defined in IEC 61140. The cables are designed to operate at a normal continuous maximum conductor temperature of 90 °C. The permissible period of use at a maximum conductor temperature of 120 °C is limited to 20 000 h. NOTE The expected period of use under normal usage conditions as specified in this document is at least 25 years. Worth mentioning is that this draft standard is technically identical with IEC 62930/2017

<a href="#">G/TBT/N/EGY/336</a> 17/11/2022	Egypt	<p><i>Cables (ICS code(s): 29.060.20); Electric road vehicles (ICS code(s): 43.120)</i></p> <p><b>Draft of Egyptian standard "Charging cables for electric vehicles of rated voltages up to and including 0,6/1 kV –Part 1: General requirements";</b></p> <p>This draft of Egyptian standard specifies construction, dimensions and test requirements for cables with extruded insulation and sheath having a voltage rating of up to and including 0,6/1 kV AC or up to and including 1 500 V DC for flexible applications under harsh conditions for the power supply between the electricity supply point of the charging station and the electric vehicle (EV).The EV charging cable is intended to supply power and, if needed, communication (for details see the IEC 62196 series and IEC 61851-1) to an EV or plug-in hybrid vehicle (PHEV). The charging cables are applicable for charging modes 1 to 4 of IEC 61851-1. Ordinary duty cables with rated voltage 300/500 V are only permitted for charging mode 1 of IEC 61851-1. Maximum conductor temperature for the cables in this part of IEC 62893 is 90 °C.The particular types of cables are specified in IEC 62893-3 (modes 1 to 3 for AC charging) and in the future IEC 62893-4 (mode 4 for DC charging).These parts are collectively referred to hereafteras "the particular specifications".The test methods specified are given in IEC 62893-2, IEC 60245-2, IEC 60332-1-2, IEC 62821-1:2015, Annex B, and in the relevant parts of IEC 60811, as listed in the normative references.</p> <p>Worth mentioning is that this draft standard is technically identical with IEC 60702-1:2002/AMD1:2015</p>	16/01/2023

1. Clause 3 A seller of Kratom leaves or food containing kratom leaves as raw materials or ingredients shall have a duty to post a notice or to give information at the selling place about rules of prohibition to sell to the person under the first paragraph of Section 24 as the following:

(a) to be posted at a conspicuous location, with appropriately size to the selling place.

(b) Declaration of the post with statement of "Do not sell Kratom leaves or food containing Kratom leaves as raw materials or ingredients to; (1) A person under eighteen years old; (2) A pregnant woman; (3) A lactating woman which evidence shall be checked before purchase"

2. Clause 4 A seller of kratom leaves or food containing kratom leaves as raw materials or ingredients to be sold via electronic commerce or internet marketing shall display or inform a purchaser about rules of prohibition to sell to the person under the first paragraph Section 24 in the first phrase shall follow, mutatis mutandis as stated in Clause 3

3. Clause 5 In case of sale of kratom leaves or food containing kratom leaves as raw materials or ingredients by methods or manners other than Clause 3 and Clause 4, a seller shall have a duty to inform a purchaser in by verbal or writing manners that the seller does not sell kratom leaves or food containing kratom leaves as raw materials or ingredients to a person under 18 years old, a pregnant woman and a lactating woman.

4. This notification shall come into force as from the day following the date of its publication in the Thai Royal Gazette.

<a href="#">G/TBT/N/UKR/236</a> 17/11/2022	Ukraine	<p><i>Light sources and separate control gears</i></p> <p><b>The draft Resolution of the Cabinet of Ministers of Ukraine "On approval of the Technical Regulation establishing ecodesign requirements for light sources and separate control gears";</b></p> <p>This Technical Regulation will establish ecodesign requirements for placing on the market of light sources and separate control gears. The requirements will also apply to light sources and separate control gears placed on the market as part of a product. The Technical Regulation is based on Commission Regulation (EU) 2019/2020 of 1 October 2019 laying down ecodesign requirements for light sources and separate control gears pursuant to Directive 2009/125/EC of the European Parliament and of the Council and repealing Commission Regulations (EC) No 244/2009, (EC) No 245/2009 and (EU) No 1194/2012. The adoption of the Technical Regulation is aimed at ensuring the improvement of energy and environmental characteristics for light sources and separate control gears, which as a result will allow gradually displace from the market the most energy-intensive products and products with the greatest negative impact on the environment, in accordance with the updated EU legislation. After the adoption of the draft Resolution, the following Resolutions will be repealed: Resolution of the Cabinet of Ministers of Ukraine No. 734 " On Approval of the Technical Regulation on Ecodesign Requirements for Non-directional Household Lamps " of August 14, 2019, Resolution of the Cabinet of Ministers of Ukraine No. 264 " On Approval of the Technical Regulation on Ecodesign Requirements for Directional Lamps, Light Emitting Diode Lamps and Related Equipment" of March 27, 2019 (G/TBT/N/UKR/123) ,Resolution of the Cabinet of Ministers of Ukraine No. 741 " On Approval of the Technical Regulation on Ecodesign Requirements for Fluorescent Lamps without Integrated Ballast, for High Intensity Discharge Lamps, and for Ballasts and Luminaires Able to Operate Such Lamps" of August 14, 2019.</p>	16/01/2023

**Fees for the Administration of the Toxic Substances Control Act (TSCA);**

Supplemental notice of proposed rulemaking -The Environmental Protection Agency (EPA) is issuing this document to modify and supplement its proposed rule issued on 11 January 2021, in which the Agency proposed updates and adjustments to the 2018 Fee Rule established under the Toxic Substances Control Act (TSCA). With over five years of experience administering the TSCA amendments of 2016, EPA is publishing this document to ensure that the fees charged accurately reflect the level of effort and resources needed to implement TSCA in the manner envisioned by Congress when it reformed the law. Additionally, the purpose of this document is to propose narrowing certain proposed exemptions for entities subject to the EPA-initiated risk evaluation fees and propose exemptions for the test rule fee activities; to propose modifications to the self-identification and reporting requirements for EPA-initiated risk evaluation and test rule fees; to propose a partial refund of fees for premanufacture notices withdrawn at any time after the first 10 business days during the assessment period of the chemical; to propose modifications to EPA's proposed methodology for the production volume-based fee allocation for EPA-initiated risk evaluation fees in any scenario where a consortium is not formed; to propose expanding the fee requirements to companies required to submit information for test orders; to propose modifying the fee payment obligations to require payment by processors subject to test orders and enforceable consent agreements (ECA); to propose extending the timeframe for test order and test rule payments; as well as to propose changes to the fee amounts and the estimate of EPA's total costs for administering TSCA.
