Chemical substances; Environmental protection (ICS code(s): 13.020); Production in the chemical industry (ICS code(s): 71.020); Products of the chemical industry (ICS code(s): 71.100)

03/01/2023

Significant New Use Rules on Certain Chemical Substances (22-1.5e);

Proposed rule -EPA is proposing significant new use rules (SNURs) under the [Toxic Substances Control Act \(TSCA\)](#) for chemical substances that were the subject of [premanufacture notices \(PMNs\)](#) and are also subject to Orders issued by EPA pursuant to TSCA. The SNURs would require persons who intend to manufacture (defined by statute to include import) or process any of these chemical substances for an activity that is proposed as a significant new use by this rule to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA's evaluation of the use, under the conditions of use for that chemical substance, within the applicable review period. Persons may not commence manufacture or processing for the significant new use until EPA has conducted a review of the notice, made an appropriate determination on the notice, and has taken such actions as are required in association with that determination.

Per-and polyfluoroalkyl substances (PFAS); Environmental protection (ICS code(s): 13.020); Production in the chemical industry (ICS code(s): 71.020); Products of the chemical industry (ICS code(s): 71.100)

03/02/2023

Changes to Reporting Requirements for Per-and Polyfluoroalkyl Substances and to Supplier Notifications for Chemicals of Special Concern; Community Right-to-Know Toxic Chemical Release Reporting;

Proposed rule -The Environmental Protection Agency (EPA) is proposing to add per-and polyfluoroalkyl substances (PFAS) subject to reporting under the Emergency Planning and Community Right-to-Know Act (EPCRA) and the Pollution Prevention Act (PPA) pursuant to the National Defense Authorization Act for Fiscal Year 2020 (NDAA) to the list of Lower Thresholds for Chemicals of Special Concern (chemicals of special concern). These PFAS already have a lower reporting threshold of 100 pounds. The addition of these PFAS to the list of chemicals of special concern will cause such PFAS to be subject to the same reporting requirements as other chemicals of special concern (i.e., it would eliminate the use of the de minimis exemption and the option to use Form A and would limit the use of range reporting for PFAS). Removing the availability of these burden-reduction reporting options will result in a more complete picture of the releases and waste management quantities for these PFAS. In addition, EPA is proposing to remove the availability of the de minimis exemption for purposes of the Supplier Notification Requirements for all chemicals on the list of chemicals of special concern. This change will help ensure that purchasers of mixtures and trade name products containing such chemicals are informed of their presence in mixtures and products they purchase.

G/TBT/N/YEM/235 06/12/2022	Yemen	67.060 Fermented Soybean Paste; This technical regulation applies to the product defined in Clause 3 of the document, offered for direct consumption including for catering purposes or for repacking if required. G/TBT/N/UGA/1712 07/12/2022	Tanzania	<p><i>Physicochemical methods of analysis (ICS code(s): 71.040.50)</i></p> <p>DUS 2665: 2022, Standard Test Method for pH of Aqueous Solutions with the Glass Electrode, First Edition;</p> <p>This Draft Uganda Standard specifies the apparatus and procedures for the electrometric measurement of pH values of aqueous solutions with the glass electrode. It does not deal with the manner in which the solutions are prepared. pH measurements of good precision can be made in aqueous solutions containing high concentrations of electrolytes or water-soluble organic compounds, or both. It should be understood, however, that pH measurements in such solutions are only a semiquantitative indication of hydrogen ion concentration or activity. The measured pH will yield an accurate result for these quantities only when the composition of the medium matches approximately that of the standard reference solutions. In general, this test method will not give an accurate measure of hydrogen ion activity unless the pH lies between 2 and 12 and the concentration of neither electrolytes nor nonelectrolytes exceeds 0.1 mol/L (M).</p>	05/02/2023
G/TBT/N/UKR/241 07/12/2022	Ukraine	<p><i>Plant protection products and agrochemicals</i></p> <p>Draft Law of Ukraine "On Placing of Plant Protection Products and Agrochemicals on the Market";</p> <p>The draft Law aims to establish the procedures for placing of plant protection products and agrochemicals on the market in accordance with the EU regulations in force. Its purpose is to define the terminology and basic concepts on the approval of active substances, antidotes and synergists contained in the preparative forms of plant protection products, to define unacceptable coformulants that cannot</p>	05/02/2023

be contained in plant protection products, to harmonize the procedures for placing on the market of agrochemicals and to determine the procedure for handling hazardous substances.

The draft Order is developed to improve the state regulation in the sphere of pesticides and agrochemicals taking into account the Regulation (EC) No 1107/2009 of the European Parliament and of the Council of 21 October 2009 concerning the placing of plant protection products on the market and repealing Council Directives 79/117/EEC and 91/414/EEC, Regulation (EU) 2019/1009 of the European Parliament and of the Council of 5 June 2019 laying down rules on the making available on the market of EU fertilising products and amending Regulations (EC) No 1069/2009 and (EC) No 1107/2009 and repealing Regulation (EC) No 2003/2003.

It is established that all existing registrations of pesticides and agrochemicals in accordance with the Law of Ukraine "On Pesticides and Agrochemicals", which will be valid as of the date of entry into force of this Law, shall remain valid until their completion without the need for approval of the active substance.

The current Law of Ukraine "On Pesticides and Agrochemicals" will become invalid from the date of entry into force of this Law.

The draft Law is also notified in accordance with the provisions of the Agreement on the Application of Sanitary and Phytosanitary Measures.

Energy Conservation Program: Energy Conservation Standards for Circulator Pumps

Notice of proposed rulemaking and announcement of public meeting - The [Energy Policy and Conservation Act, as amended](#) ("EPCA"), prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including circulator pumps. In this notice of proposed rulemaking ("NOPR"), DOE proposes energy conservation standards for circulator pumps, and also announces a public meeting to receive comment on these proposed standards and associated analyses and results. The public meeting will be held via webinar on Thursday, 19 January 2023.

06/02/2023

Proposal for a Regulation of the European Parliament and of the Council on the labelling of organic pet food (COM(2022) 659 final);

The proposal proposes to establish specific rules for the labelling of organic pet food. In order for pet food to be labelled as organic and bear the organic production logo of the European Union, at least 95% in terms of weight of the agricultural ingredients will have to be organic.

Draft Commission Delegated Regulation amending Regulation (EU) 2018/848 of the European Parliament and of the Council as regards detailed production rules

G/TBT/N/SGP/68 08/12/2022	Singapore	<p>for organic sea salt and other organic salts for food and feed;</p> <p>The proposal proposes to establish detailed production rules for organic sea salt and other salts for food and feed. It includes, in particular, detailed requirements for the operators, a list of prohibited practices, processes, treatments and techniques and labelling rules for the organic salt.</p> <p><i>HS Code (29314990; 29309090; 29299090; 292219904(a); 29221800; 29051900; 29202300; 29202400; 29202100; 28121500; 28121600; 29221700; 29221700)</i></p> <p>Draft Fire Safety (Petroleum & Flammable Materials) (Amendment No. 2) Regulations 2022,</p> <p>Singapore Civil Defence Force (SCDF) is proposing to regulate 12 new chemicals and chemical groups (see Section 4 above) as Flammable Materials (FMs) under the Fire Safety (Petroleum & Flammable Materials) Regulations (FS (P&FM) Regs).</p> <p>These 12 chemicals and chemical groups have been identified as chemicals and precursors under the Chemical Weapons Convention (CWC), and are currently regulated by Singapore Customs, as the National Authority for the CWC (NA(CWC)), through the Chemical Weapons (Prohibition) Act (CWPA) and the Chemical Weapons (Prohibition) Regulations. Under the CWPA, depending on the CWC Schedule that the chemicals belong to, companies are required to apply for a NA(CWC) licence from Singapore Customs if they are engaged in activities including the import, export, production, processing, consumption and local sale and distribution of these chemicals.</p> <p>From July 2023, SCDF will also be regulating these 12 chemicals and chemical groups under the FS (P&FM) Regs. Once the regulation takes effect, companies will be required to apply for a P&FM licence from SCDF for the import, storage, transport or conveyance by pipeline of these chemicals. Accordingly, companies engaged in activities involving any of these chemicals would have to comply with the requirements on the import, storage, transport or conveyance by pipeline of these chemicals, that are stipulated in the FS (P&FM) Regs. These include, inter alia, labelling and other requirements for the containers and vehicles that are used to store or transport the chemicals, as well as other specific safety and documentary requirements.</p>	06/02/2023
