G/TBT/N/BRA/1614 01/12/2025	Brazil <i>ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES (HS code(s): 85); Telecommunications. Audio and video engineering (ICS code(s): 33)</i> Public Consultation No. 12, 29 October 2025 Contributions for Updating the Operational Procedure for Marking the Anatel Homologation Identification on Telecommunications Products, approved by Act No. 4088, 31 July 2020.	04/02/2025
G/TBT/N/CAN/759 01/12/2025	Canada <i>Carisoprodol (HS code: 2924199090)</i> Order Amending Schedule IV to the Controlled Drugs and Substances Act (Carisoprodol) (17 pages in English, 19 pages in French) Regulations Amending the Benzodiazepines and Other Targeted Substances Regulations (Carisoprodol) (3 pages in English and French) The purpose of this notification is to let members know that on November 19, 2025, Canada made permanent controls for carisoprodol (https://www.canada.ca/en/health-canada/news/2025/11/government-of-canada-acts-to-permanently-control-sedative-drug-linked-to-illegal-drug-markets.html) by adding carisoprodol to Schedule IV of the Controlled Drugs and Substances Act and to the Schedules to the Benzodiazepines and Other Targeted Substances Regulations. The permanent controls come into force on December 19, 2025 (carisoprodol is already temporarily controlled in Canada under a Ministerial Order https://gazette.gc.ca/rp-pr/p2/2025/2025-03-12/html/sor-dors64-eng.html). With these amendments, any person not authorized to conduct regulated activities with carisoprodol will be subject to offences and penalties.	
G/TBT/N/CZE/260 01/12/2025	Czech Republic <i>Nuclear materials ICS: 27.120.99 other standards related to nuclear energy</i> Draft decree amending Decree No 374/2016 on the accountancy and control of nuclear materials and reporting of information on them The present amendment to the Decree contains only the necessary individual changes to the original text that refine and simplify selected processes in the field of accountancy and control of nuclear materials on the basis of problems identified in application practice. The essence of regulation in this area is maintained. The main objective of the draft is to respond to the amendment to the Act, which made certain changes in the area of accountancy and control of nuclear materials. At the legislative level, the obligations of persons operating or intending to operate so-called safeguard facilities have also been clarified. The changes concerned requirements for safeguard facility projects, specifically compliance with technical requirements for independent power supply and lighting, and for structures and modifications thereto (see § 166(6) of the Act). These legal requirements are to be specified at the implementation level by the notified draft decree. The new legislation also reflects the planned	30/01/2026

		construction of new nuclear installations and the design or development of small modular reactors (SMRs).

G/TBT/N/CAN/760 02/12/2025	Canada	<p><i>Infant formula for: healthy term infants infants with medical conditions such as: Pre-term infant formulas Metabolic infant formulas Amino acid-based infant formulas Extensively hydrolyzed protein infant formulas Infant formulas with no added carbohydrates Infant formulas intended for infants with failure to thrive Fortified medical foods for infants including: human milk fortifiers fortified modulars semi-solid foods/mixes for ages 6 months and up for the dietary management of medical conditions</i></p> <p>Proposed risk-based approach for the authorization of infant food for a special dietary purpose, (25 pages in English and 27 pages in French)</p> <p>Health Canada is moving forward with efforts to modernize its regulations for foods for a special dietary use and infant foods. As part of this process, on November 26, 2025, the Department launched a 60-day pre-consultation about a proposed risk-based approach to authorizing infant formula and fortified medical foods for infants. This consultation is a follow up to two previous pre-consultations on: Regulatory Modernization of Foods for Special Dietary Use and Infant Foods: Divisions 24 and 25 of the Food and Drug Regulations, held from November 28, 2023, to February 26, 2024. Compositional requirements for infant foods and foods currently regulated as foods for special dietary use from October 23, 2024, to January 22, 2025. The proposed approach would introduce a three-tiered authorization framework, scaling regulatory oversight according to risk. Tier 1: Post-market notification for lower-risk products Tier 2: Pre-market authorization with expedited review for moderate-risk products Tier 3: Pre-market authorization with comprehensive review for higher-risk products To make its reviews more efficient, Health Canada would also leverage information and decisions from comparable foreign regulatory authorities. The consultation will close to new input on January 25, 2026.</p>	25/01/2025
G/TBT/N/JPN/888 02/12/2025	Japan	<p><i>Radio equipment of radio station for a non-geostationary satellite communication system in the Ka-band, which operates in orbit at an altitude of approximately 600 km.</i></p> <p>Partial Amendment of the Ordinance for Enforcement of the Radio Act, etc.</p> <p>Japan will amend the Ordinance for Enforcement of the Radio Act, etc. to introduce technical requirements for radio equipment used in user terminals that are part of a non-geostationary satellite communication system in the Ka-band, operating in orbit at an altitude of approximately 600 km.</p>	30/01/2026
G/TBT/N/RUS/178 02/12/2025	Russian Federation	<p><i>3003, 3004 (Pharmaceuticals)</i></p> <p>Draft amendments to the Decision of the Board of the Eurasian Economic Commission No. 100 of August 11, 2020</p> <p>It is proposed to amend the Pharmacopoeia of the Eurasian Economic Union: to supplement it with general pharmacopoeial monographs on herbal medicinal products and biological medicinal products, and to adopt new versions of a number of general pharmacopoeial monographs harmonized with the texts of the Pharmacopoeial Discussion Group (PDG).</p>	07/12/2025

This standard covers the types, materials, construction, test methods and other requirements of laying battery cages..</p>	30/01/2026
G/TBT/N/AUS/194 03/12/2025	Australia	<p><i>Motor vehicles for the transport of >= 10 persons, incl. driver (HS code(s): 8702); Road vehicles in general (ICS code(s): 43.020)</i></p> <p>Exposure Draft—Vehicle Standard (Australian Design Rule 114/00 - Carbon Dioxide Emissions Measurement)Draft Explanatory Statement for the Vehicle Standard (Australian Design Rule 114/00 - Carbon Dioxide Emissions Measurement)Methods of converting the type</p> <p>The Australian Government is proposing a new vehicle standard to enable the application of the New Vehicle Efficiency Standard Act to specified vehicles with a gross vehicle mass over 3,500kg and less than 3,855kg.This notification outlines the Australian Government’s intention to adopt a new Vehicle Standard (Australian Design Rule (ADR) 114/00 - Carbon Dioxide Emissions Measurement) to mandate carbon dioxide (CO2) emissions testing requirements for specified vehicles with a gross vehicle mass (GVM or maximum laden vehicle mass) between 3,500kg and 3,855kg from 1 January 2027. This proposed rulemaking will align Australia’s CO2 testing requirements with equivalent US standards for light duty vehicles, which apply to vehicles with a gross vehicle weight rating up to 8,500 pounds.This new vehicle standard is proposed as an initial step to enable vehicles with a GVM up to 4,500kg that are marketed to be driven by consumers (such as full-sized sport utility vehicles and pick-ups) to be subject to the requirements of the New Vehicle Efficiency Standard Act 2024 (the NVES Act). This was foreshadowed by the Australian Government in the 'Cleaner, Cheaper to Run Cars: The Australian New Vehicle Efficiency Standard' Impact Analysis', which was notified in March 2024 (G/TBT/N/AUS/166 refers).The NVES Act sets sales weighted average carbon dioxide emissions targets for vehicle manufacturers supplying vehicles covered by the NVES Act with a GVM rating up to 4,500kg to Australia from 2025. The NVES Act commenced on 1 January 2025, with assessment of compliance commencing for all NVES Act covered vehicles supplied from 1 July 2025.The NVES Act uses the carbon dioxide numbers entered for each covered vehicle on the Australian Government's Register of Approved Vehicles (RAV) to determine whether a manufacturer complies with the NVES. The carbon dioxide emissions number reported on the RAV is determined in accordance with the relevant Australian Design Rule for measuring carbon dioxide emissions.The Australian Government adopted the New Vehicle Efficiency Standard Determination 2024 on 27 November 2024 to exempt vehicles that do not have a CO2 test procedure mandated by an ADR (such as vehicles with a GVM above 3,500kg) from assessment of compliance under the NVES Act, until the calendar year after a CO2 emissions test has been mandated by an ADR.Now that an appropriate test has been</p>	12/01/2025

identified, the Australian Government proposes that vehicles with a GVM over 3,500kg and less than 3,855kg be required to obtain a CO2 emissions test from 1 January 2027. A further rulemaking is proposed to amend the New Vehicle Efficiency Standard Determination 2024 to include these vehicles in the NVES framework from 1 July 2027. Further consultation will be undertaken in 2026-2027 to determine a CO2 test procedure for specified vehicles between 3,855kg and 4,500kg, to enable their inclusion in the NVES from 2030. The proposed standard adopts a conversion procedure to enable vehicles tested to WLTP or US test procedures to comply with the NVES Act. As the CO2 emissions targets mandated by the New Vehicle Efficiency Act 2024 (the NVES Act) are based on the test adopted in UN Regulation No. 101 (commonly known as the New European Driving Cycle or NEDC), Appendix B of the draft ADR 114/00 specifies a procedure to enable vehicles tested to the WLTP or 40 CFR 600 to calculate an equivalent carbon dioxide emissions value for reporting on the Register of Approved Vehicles (RAV) for the purposes of the New Vehicle Efficiency Standard. This conversion procedure was developed by the Australian Government with the assistance of the International Council on Clean Transportation in consultation with an 'Emissions Testing Technical Working Group' comprising representatives from vehicle manufacturers and other stakeholders with an interest in the New Vehicle Efficiency Standard. A copy of the supporting analysis for this conversion procedure is attached to this notification. If a manufacturer does not wish to use this procedure, the proposed ADR 114/00 will also allow vehicles to be tested in accordance with UN Regulation No. 101 to determine the CO2 emission number reported on the RAV to comply with the NVES Act.

G/TBT/N/CHL/763 03/12/2025	Chile <i>Productos Farmacéuticos</i> APRUEBA EXIGENCIAS DE MODIFICACIÓN DE RÓTULO Y FOLLETOS DE INFORMACIÓN AL PACIENTE Y AL PROFESIONAL PARA PRODUCTOS FARMACÉUTICOS CON EFECTOS SOBRE LA CAPACIDAD DE CONDUCIR VEHÍCULOS Y OPERAR MAQUINARIAS. Esta resolución responde a un imperativo de salud pública crítico e inmediato. Como es de conocimiento público, la siniestralidad vial en Chile cobra en promedio 2.000 vidas al año. El trabajo técnico realizado junto a la Comisión Nacional de Seguridad de Tránsito (CONASET) evidenció la necesidad perentoria de visibilizar los efectos de ciertos fármacos en la conducción, dado	

que el uso de sustancias y fatiga representa un factor relevante en la mortalidad vial. La normativa se basa estrictamente en la clasificación y listado de principios activos de la Agencia Española de Medicamentos y Productos Sanitarios (AEMPS) y la experiencia del proyecto europeo DRUID. Al homologar un estándar europeo ya validado, la norma busca armonizar nuestras exigencias con regulaciones de alto estándar, reduciendo la incertidumbre técnica para los regulados. Se exigirá a los solicitantes de registros sanitarios de productos farmacéuticos, al momento de ingresar sus requerimientos, a cumplir con los siguientes lineamientos:

a) Revisar, evaluar, informar y declarar si el producto que somete al procedimiento de registro sanitario, cualquiera sea su clase, califica como un producto farmacéutico que puede afectar la capacidad de conducción.

Para ello, deberá usar como comparador el listado de referencia emitido por la Agencia Española de Medicamentos (AEMPS) disponibilizado gratuitamente en su sitio web: <https://www.aemps.gob.es/ciudadania/medicamentos-y-conduccion/>. b) Efectuado lo anterior, si el medicamento que se pretende registrar se encuentra comprendido dentro del listado de referencia, deberá incorporarse en el proyecto de rotulado de los envases secundarios el pictograma que se muestra en la Resolución adjunta.

Los envases secundarios en alguna de sus caras, principales o laterales, deberán incorporar el pictograma de la conducción que consiste en un triángulo equilátero rojo con el vértice hacia arriba y un vehículo negro en el interior sobre fondo blanco, con la leyenda "Atención Conducción: Ver folleto". c) Adicionalmente, si el producto que se pretende registrar es de aquellos comprendidos en el listado de referencia, deberá incluirse información respecto a la capacidad del medicamento de afectar la capacidad de conducción de vehículos y operación de maquinaria en los folletos de información al paciente y al profesional.

		<p>ciclovías, aceras, áreas de estacionamiento, playas de estacionamientos de contenedores, patios industriales, canchas deportivas, ferrovías, áreas destinadas a ganadería, pistas, cabezales, y áreas de estacionamientos de aviones en aeropuertos o helipuertos, entre otros. Esta norma no se aplica a los materiales asfálticos destinados a usos distintos al de pavimentos.</p>	
<p>G/TBT/N/TPKM/584 03/12/2025</p>	<p>Chinese Taipei</p>	<p><i>Changing Units for Domestic Use.</i> (HS code(s): 9403) Proposal for Legal Inspection Requirements for Changing Units for Domestic Use Changing units for domestic use may contain plasticizers, heavy metals, and formamide contamination, which can pose endocrine-disrupting and carcinogenic risks upon exposure. In addition, BSMI's market surveillance has shown that 60% of randomly purchased units failed the physical performance tests. In response to public concerns over the safety risks posed by changing units for domestic use, including the potential for choking and strangulation that may endanger infants and children, the Bureau of Standards, Metrology and Inspection (BSMI) intends to include these products within the scope of mandatory inspection to ensure their safety and quality.</p>	<p>01/02/2026</p>

<p>G/TBT/N/GBR/111 04/12/2025</p>	United Kingdom	<p><i>8418.61 - Heat pumps other than air conditioning machines of heading 84.1585.04 Electrical transformers, static converters (for example, rectifiers) and inductors 85.06 - Primary cells and batteries 85.07 - Electric accumulators, including separators therefor, whether or not rectangular (including square), 8516.10 - Electric instantaneous or storage water heaters and immersion heaters 8516.21 - Storage heating radiators 8516.29 - Electric space heating apparatus and electric soil heating apparatus – Other 87.03 - Motor cars and other motor vehicles principally designed for the transport of</i></p> <p>The Energy Smart Appliances (ESA) Regulations 2026</p> <p>This is a formal notice of the UK’s intention to lay regulations under the Energy Act 2023 (s.239-244). The regulations introduce a smart mandate for relevant electrical heating appliances. The regulations will also revoke The Electric Vehicles (Smart Charge Point) regulations 2021 and incorporate, with some planned amendments, existing electric vehicle smart charge points requirements (including the smart mandate). The regulations also impose minimum functionality, cyber, and grid stability requirements on in-scope energy smart appliances (EVSCPs, electrical heating appliances, and smart battery energy storage systems). This includes complying with all the requirements imposed on Class B active electrical energy meters for use for trade by The Measuring Instrument Regulations 2016 which includes a conformity assessment procedure. The policy objective of mandating MIR Class B compliance is to ensure better value for consumers by ensuring they can use their ESAs to participate in the highest value forms of CLF, increasing the uptake of CLF and thus helping achieve the Government’s clean power by 2030 ambition. The regulations will be laid in Parliament in Q2 2026 and most provisions will enter into force in January 2028 to give industry sufficient time to adapt. Some EVSCP provisions, on incremental technical and functionality changes to The Electric Vehicles (Smart Charge Points) Regulations 2021 requirements, will enter into force after 6 months. The requirements in the regulations will be placed on manufacturers and importers when</p>	02/02/2026

they first place an in-scope ESA on the GB market after 1 January 2028.

G/TBT/N/VNM/383 04/12/2025	Viet Nam	<i>Batteries used for electric motorcycles, mopeds</i> Draft National technical regulation on traction batteries used for electric motorcycles, mopeds This draft National Technical Regulation stipulates the technical requirements for inspection, testing, and certification of technical safety and environmental protection quality applicable to the production, assembly, and import of batteries used for new electric motorcycles and electric mopeds. This draft National Technical Regulation applies to: domestic manufacturing and assembly establishments; organizations and individuals importing batteries; and organizations and individuals involved in the management, inspection, testing, and certification of technical safety and environmental protection quality of batteries.	02/02/2026
G/TBT/N/VNM/384 04/12/2025	Viet Nam	<i>Motor used for electric motorcycles, mopeds</i> Draft National technical regulation on motor used for electric motorcycles, mopeds This draft National Technical Regulation stipulates technical requirements for inspection, testing, and certification of technical safety and environmental protection quality applicable to the production, assembly, and import of new electric motors used for electric motorcycles and electric mopeds. This draft National Technical Regulation applies to: Domestic manufacturing and assembly establishments; Organizations and individuals importing electric motors; Organizations and individuals involved in the management, inspection, testing, and certification of technical safety and environmental protection quality of electric motors.	02/02/2026
G/TBT/N/VNM/385 04/12/2025	Viet Nam	<i>Dairy products - Liquid milk products (HS. 0401.10.10).</i> The draft National Technical Regulation for fluid milk products This draft national technical regulation stipulates the limits of physical and chemical indicators, safety and management requirements for liquid milk products, including: - Pasteurized/sterilized fresh whole milk; - Pasteurized/sterilized fresh milk; - Pasteurized/sterilized partly-skimmed/skimmed milk; - Reconstituted/recombined milk; composite milk; - Evaporated milk; - Sweetened condensed milk;- Blends of evaporated skimmed milk and vegetable fat; - Blends of sweetened condensed skimmed milk and vegetable fat. This draft national technical regulation does not apply to formula milk products for children up to 36 months of age, formula milk for special medical purposes for infants and functional foods. This draft national technical regulation applies to organizations and individuals engaged in production, trading and importation of fluid milk products in Viet Nam, as well as other relevant entities.	03/01/2026
G/TBT/N/VNM/386 04/12/2025	Viet Nam	<i>alcoholic beverages</i> The draft National Technical Regulation for alcoholic beverages This draft national technical regulation provides the maximum level of Food Safety indicators and management requirements for food alcohol used to produce alcoholic beverages and alcoholic beverage products. This draft national technical regulation applies to organizations and individuals engaged in the production,	03/01/2026

trading, and importation of alcoholic beverage products in Viet Nam as well as other relevant organizations and individuals.
