three-phase, variable refrigerant flow air conditioners and heat pumps with a cooling capacity of less than 65,000 Btu/h to incorporate by reference the latest version of the relevant industry test standard. DOE also proposes to adopt the seasonal energy efficiency ratio 2 ("SEER2") and heating seasonal performance factor 2 ("HSPF2") metrics specified by that industry test standard in the DOE test procedures for the three-phase equipment that is the subject of this notice of proposed rulemaking ("NOPR"). Additionally, DOE proposes to amend certain provisions for representations and enforcement to harmonize with single-phase products.

This standard does not cover animal shampoo, soap based hair shampoo and shampoo with medicinal/therapeutic claims.</p>	12/02/22
<a href="#">G/TBT/N/CAN/657</a> 14/12/21	Canada	<p><i>Apples, fresh (HS 080810400100); apples, fresh, organic (080810400000); apricots, fresh (HS 080910402000); apricots, fresh, organic (HS 080910402002); asparagus, fresh (HS 070920000000); asparagus, fresh, organic (HS 070920000200); grapes, fresh (HS 080610000000); grapes, fresh, organic (HS 080610405000); peaches, fresh (HS 080930000000); pears, fresh (HS 080830400300); pears, fresh, organic (HS 080830400400); plums, fresh (HS 080940400700); plums, fresh, organic (HS 080940400702); nectarine, fresh (HS 080930400600); nectarine, fresh, organic (HS 080930400602)</i> <b>ICS codes:</b> 67.080 (<i>Fruits. Vegetables</i>);</p>	11/02/22

**Proposed Amendment to the Canadian Grade Compendium: Volume 2 - Fresh Fruit or Vegetables. - Standard for apples (9 and 11 pages, available in English and French); - Standard for apricots (3 pages, available in English and French); - Standard for asparagus (2 pages, available in English and French); - Standard for grapes (2 pages, available in English and French); - Standard for peaches (2 pages, available in English and French); - Standard for pears (5 pages, available in English and French); - Standard for plums and prunes (4 and 3 pages, available in English and French); and - Standard for nectarines (2 pages, available in English and French).**

G/TBT/N/CAN/657 Certain fresh fruit or vegetables (FFV) must be graded in order to be marketed in import or interprovincial trade in Canada. FFV grades and requirements are maintained and enforced by Canadian Food Inspection Agency (CFIA) in an incorporated by reference (IbR) document titled “Canadian Grade Compendium: Volume 2 - Fresh Fruit or Vegetables”, incorporated into the Safe Food for Canadians Regulations (SFCR). CFIA is proposing to modernize and harmonize existing grade requirements related to the quality of FFV and introduce new grade standards to certain commodities. This consultation is being conducted in phases to solicit feedback on proposed changes to the grades and requirements for FFV. Each phase will focus on a different group of commodities. A notification will be sent for each phase of the consultation. This phase focuses on the proposed changes to grades and requirements for apples, apricots, asparagus, grapes, peaches, pears, plums and prunes, including a new standard for nectarines. The Proposed Amendment to the Canadian Grade Compendium: Volume 2 - Fresh Fruit or Vegetables include: changes to size requirements, clarifications to terminology for defects and tolerances, and the introduction of new standard for nectarines.

G/TBT/N/USA/1812 Notice of proposed rulemaking and request for comment - The U.S. Department of Energy ("DOE") proposes to amend the test procedure for variable refrigerant flow multi-split air conditioners and heat pumps ("VRF multi-split systems") to incorporate by reference the latest version of the industry test standard. DOE also proposes to adopt the integrated energy efficiency ratio metric in its test procedures for VRF multi-split systems. Additionally, DOE proposes to adopt provisions in the updated industry test procedure relevant to certification and enforcement, including a controls verification procedure. DOE welcomes written comment from the public on any subject within the scope of this document (including topics not specifically raised in this proposal), as well as the submission of data and other relevant information.

**Special Conditions: The Boeing Company, Model 737-10 Airplane; Dynamic Test Requirements for Single-Occupant, Oblique (Side-Facing) Seats Installed at a 49-Degrees With Airbag Devices and 3-Point Restraints**

G/TBT/N/USA/1814 Notice of proposed special conditions - This action proposes special conditions for The Boeing Company (Boeing) Model 737-10 airplane. This airplane will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport-category airplanes. This design feature is single-occupant, passenger oblique seats, with airbag devices and 3-point restraints, installed at 49 degrees relative to the airplane cabin bow-to-stern centerline. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

**Draft Commission Regulation on recycled plastic materials and articles intended to come into contact with foods, and repealing Regulation (EC) No 282/2008**

G/TBT/N/EU/860 This draft Commission Regulation concerns the placing on the market of plastic materials and articles with recycled/secondary plastic content intended for use in contact with food. It sets out rules for the manufacture thereof, suitable recycling technologies, recycling processes, recycling installations, plastic waste, collection and sorting of plastic input and the decontamination thereof, and the use of the plastic output, quality control, registration of business operators and enforcement, with the purpose to ensure that the recycled content in the final plastic materials and articles intended for contact with food do not cause harm to the consumers of those foods, or change their quality or organoleptic properties. The Regulation repeals

		Regulation (EC) No 282/2008, which it will replace.
