Guidelines Prescribing the Principle of Reliance for Regulatory Decisions of the Food and Drug Administration;

The FDA, in cognizance of reliance application, shall leverage its review process to accelerate its regulatory decisions of FDA to provide coherence in the FDA's regulatory system for establishments and products under its jurisdiction. Effective implementation of reliance will benefit not only the Agency but also the patients/clients, healthcare providers, Marketing Authorization Holders (MAH) and other stakeholders. This will consequently strengthen post-marketing surveillance and promote continuous improvement in building FDA's institutional capacity towards effectively safeguarding public health.

Turkish Food Codex -Regulation on Contaminants;

This Regulation covers maximum levels for certain contaminants in food and the responsibilities for the identification, prevention, reduction or elimination of the source of the risk associated with the contaminants.

The Regulation consists of nitrates, mycotoxins, heavy metals, 3-monochloropropanediol (3-MCPD), 3-MCPD fatty acid esters and glycidyl fatty acid esters, dioxins and dioxin-like polychlorinated biphenyls (PCB), polycyclic aromatic hydrocarbons (PAH), melamine and their structural analogues, natural plant toxins, perchlorate and other contaminants.

With the enactment of the new Regulation, The Turkish Food Codex Regulation on Contaminants published in the Official Gazette dated 29/12/2011 and numbered 28157 shall be repealed.

Draft Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Technical Regulation on Ecodesign Requirements for Household Dishwashers";

The draft Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Technical Regulation on Ecodesign Requirements for Household Dishwashers" is developed to improve energy and environmental characteristics of household dishwashers and to ensure the implementation of eco-design requirements in accordance with the updated EU legislation.

The Technical Regulation corresponds to Commission Regulation (EU) 2019/2022 of 1 October 2019 laying down eco-design requirements for household dishwashers pursuant to Directive 2009/125/EC of the European Parliament and of the Council amending Commission Regulation (EC) No 1275/2008 and repealing Commission Regulation (EU) No 1016/2010.

As of today, in Ukraine operates the Technical regulation on ecodesign requirements for household dishwashers, approved by the Resolution of the Cabinet of Ministers of Ukraine of August 14, 2019 No. 736 that was developed pursuant to Commission Regulation (EU) No 1016/2010 of 10 November 2010 implementing Directive 2009/125/EC of the European Parliament and of the Council with regard to ecodesign requirements for household dishwashers. After this Resolution enters into force, the Technical regulation on ecodesign requirements for household dishwashers, approved by the Resolution of the Cabinet of Ministers of Ukraine of August 14, 2019 No. 736, will be canceled..

Investigational new drug applications; Pharmaceuticals (ICS code(s): 11.120); Domestic safety (ICS code(s): 13.120)

Investigational New Drug Applications; Exemptions for Clinical Investigations To Evaluate a Drug Use of a Product Lawfully Marketed as a Conventional Food, Dietary Supplement, or Cosmetic;

Proposed rule -The Food and Drug Administration (FDA, the Agency, or we) is proposing to amend its regulations on [investigational new drug applications \(INDs\)](#) to exempt from the IND requirements certain clinical investigations of lawfully marketed foods for human consumption (including both conventional foods and dietary supplements) and cosmetics when the product is to be studied to evaluate its use as a drug. Under the proposal, clinical studies to evaluate a drug use of such products would not have to be conducted under an IND when, among other things, the study is not intended to support a drug development plan or a labeling change that would cause the lawfully marketed product to become an unlawfully marketed drug, and the study does not present a potential for significant risk to the health, safety, or welfare of subjects. Though exempt from the IND requirements, such investigations would still be subject to other regulations designed to protect the rights and safety of subjects, including requirements for informed consent and review by institutional review boards (IRBs). By exempting from the IND requirements certain clinical investigations of products lawfully marketed as a food or cosmetic, the proposed provisions are intended to reduce the regulatory burden of conducting such studies while retaining protections for human subjects.

The Regulations Amending Certain Regulations Made Under the Transportation of Dangerous Goods Act, 1992 (Part 12 and International Harmonization Update) [the proposed Regulations] would incorporate changes and new

09/02/2023

requirements adopted in the 22nd edition of the United Nations Model Regulations on the Transport of Dangerous Goods (UN Recommendations) and the 2020 edition of the International Maritime Dangerous Goods Code (IMDG Code). Associated changes to the proposed Regulations would include amendments to dangerous goods safety marks, classification information, shipping names, and packaging requirements. The proposed Regulations would include updates to Canadian standards that are incorporated by reference, to better align with the UN Recommendations for the design, manufacture, and use of means of containment. The proposed Regulations would also allow the use of dangerous goods safety marks prescribed under Title 49 of the United States (U.S.) Code of Federal Regulations (U.S. 49 CFR) and special permits issued in the United States for the transportation of dangerous goods across North America by road and railway vehicles. Finally, the proposed Regulations would rewrite Part 12 of the TDGR to clarify air transportation requirements and update provisions for transport to remote locations and exemptions for medical, scientific, industrial, aerial and enforcement activities to reflect current domestic needs.

G/TBT/N/KWT/625 13/12/2022	Kuwait, the State of	67.100.20 Chili Sauce This Technical regulation applies to chili sauce offered for direct consumption, including for catering purposes or for repacking if required. G/TBT/N/AUS/149 14/12/2022	Australia	<i>Bicycles are vehicles consisting of two wheels held in a frame one behind the other, propelled by pedals and steered with handlebars attached to the front wheel.</i> <i>The mandatory safety standard prescribes requirements for the bicycle's sharp edges, fasteners, projections, control cables, ground clearance, toe clearance, wheels, protective guards, drive chains, pedals, steering systems, seat pillar, braking systems, reflectors, warning device, and lighting equipment (where fitted).</i> Consultation email for new safety standard –Bicycles; The mandatory safety standard for bicycles references certain requirements in the 1998 edition of the voluntary Australian standard. The voluntary Australian standard was updated in 2010. The ACCC is proposing to make a new mandatory safety standard for bicycles to allow suppliers to comply with the most recent edition of the voluntary Australian standard which is the following: • Australian/New Zealand Standard (AS/NZS 1927:2010, Pedal bicycles -Safety requirements) In addition, the ACCC proposes to allow suppliers to comply with any of the following three widely adopted overseas voluntary standards: • American Standard (U.S. Consumer Product Safety Commission (16 CFR Part 1512), Requirements for Bicycles))	12/02/2023

- International Standard (ISO 4210 Cycles —Safety requirements for bicycles)
 - o ISO 4210-1 Terms and definitions
 - o ISO 4210-2 Requirements for city and trekking, young adult, mountain and racing bicycles
 - o ISO 4210-3 Common test methods
 - o ISO 4210-4 Braking test methods
 - o ISO 4210-5 Steering test methods
 - o ISO 4210-6 Frame and fork test methods
 - o ISO 4210-7 Wheels and rims test methods
 - o ISO 4210-8 Pedal and drive system test methods
 - o ISO 4210-9 Saddle and seat-post test methods
 - European Standard (EN ISO 4210 Cycles —Safety requirements for bicycles(which is the adoption of ISO standards 4210 1-9))
 - o EN ISO 4210-1 Terms and definitions
 - o EN ISO 4210-2 Requirements for city and trekking, young adult,mountain and racing bicycles
 - o EN ISO 4210-3 Common test methods
 - o EN ISO 4210-4 Braking test methods
 - o EN ISO 4210-5 Steering test methods
 - o EN ISO 4210-6 Frame and fork test methods
 - o EN ISO 4210-7 Wheels and rims test methods
 - o EN ISO 4210-8 Pedal and drive system test methods
 - o EN ISO 4210-9 Saddles and seat-post test methods
- he new mandatory safety standard would not impose any requirements other than those contained in these voluntary standards. Allowing compliance with these standards would permit supply of bicycles without the need to additionally test to the Australian standard. It is also intended to reduce regulatory complexity and duplication for suppliers, thereby further facilitating trade.

Draft Ordinance amending the Ordinance (2022:1274) on producer responsibility for packaging;

A person established in Sweden acting in a professional capacity as an intermediary for distance sales of packaging to end-users in Sweden may only act as such for sales from producers who have provided or used a producer responsibility organisation. The intermediary must provide to the Swedish Environmental Protection Agency their name, contact details, personal identity or corporate identity number and details of how assurances have been made that the producers selling their products through the intermediary have provided or used a producer responsibility organisation. An intermediary may also be a producer representative, i.e. fulfil producer responsibility, for producers selling through the intermediary.

Bunk beds are those products that are supplied as an item of household furniture or part of an item of household furniture. They do not include portable bunk beds designed for camping or bunk beds that are built-in fitments in caravans, camper trailers, tent trailers, camper vans, motor homes, trains, ships, aircraft and other types of conveyances. More specifically a bunk or elevated bed is currently defined as:

13/02/2023

- 1. A set of components that are assembled or are ready for assembly into single beds or double/single combination beds which will be stacked one over the other; or*
- 2. Any single bed, other than a hospital bed, where the upper surface of the mattress base is at least 800 mm above the floor surface*

The mandatory safety standard for bunk beds (mandatory standard) prescribes the requirements for the construction, design, and labelling requirements of bunk beds.

Consultation email for new safety standard –Bunk beds;

The mandatory standard references certain requirements in the 1994 edition of the voluntary Australian standard. The voluntary Australian standard was updated in 2010.

The ACCC's preliminary position is to reference the most current edition of the Australian voluntary standard in a revised mandatory standard. In addition, consideration will be given to referencing overseas standards.

The ACCC is considering updating the mandatory standard to permit compliance with the following voluntary/mandatory standards:

- AS/NZS 4220:2010 Bunk beds and other elevated beds
- EN 747-1:2012+A1:2015 Furniture. Bunk beds and high beds. Safety strength and durability requirements
- ASTM F1427-21e1 Standard Consumer Safety Specification for Bunk Beds
- U.S. Consumer Product Safety Commission (16 C.F.R Part 1513) Safety Standard for bunk beds (note this is a mandatory standard in the U.S. based on an earlier version of the ASTM standard).

The new mandatory standard would not impose any requirements other than those contained in these voluntary

standards. The bulk of bunk beds are imported, allowing suppliers to source and sell bunk beds that comply with international standards would offer consumers greater choice. This could increase competition in the market, reduce prices and, given there are additional provisions being mandated, improve safety.
