		This Draft East African Standard specifies requirements, sampling and test methods for NPK fertilizer (compound).	
<a href="#">G/TBT/N/SWZ/25</a> 11/12/2023	Eswatini	<i>(HS code(s): 23); (ICS code(s): 65.120)</i> <b>SZNS 031:2013 Animal feeding stuff - Cattle feeds-Specifications</b> This Swaziland National Standard specifies requirements for cattle feeds.	
<a href="#">G/TBT/N/SWZ/26</a> 11/12/2023	Eswatini	<i>(HS code(s): 04); (ICS code(s): 67.100)</i> <b>SZNS 034:2014 Raw cow milk - Specification</b> This Swaziland national standard specifies requirements, methods of sampling and tests for raw cow milk.	04/02/2024
<a href="#">G/TBT/N/SWZ/27</a> 11/12/2023	Eswatini	<i>(HS code(s): 31); (ICS code(s): 65)</i> <b>SZNS 011:2012 Compound fertilizers - Specifications</b> This national standard specifies the requirements for nutrient contents in compound fertilizers.	
<a href="#">G/TBT/N/SWZ/28</a> 11/12/2023	Eswatini	<i>(HS code(s): 84); (ICS code(s): 67)</i> <b>SZNS 025:2014 Poultry abattoirs- Hygiene requirements</b> This standard specifies requirements for hygiene in poultry abattoirs. The standard does not cover quality requirements for poultry carcasses, poultry parts and the poultry products.	
<a href="#">G/TBT/N/SWZ/29</a> 11/12/2023	Eswatini	<i>(HS code(s): 17); (ICS code(s): 67)</i> <b>SZNS 063:2018 Fortified sugar — Specification</b> This Standard specifies the requirements and methods of sampling and test for fortified brown sugars and fortified refined sugar intended for direct human consumption.	
<a href="#">G/TBT/N/SWZ/30</a> 11/12/2023	Eswatini	<i>(HS code(s): 70); (ICS code(s): 01.080.10)</i> <b>SZNS 044-1:2015 Symbolic safety signs Part 1: Standard signs and general requirements</b> This part of SZNS 044 specifies requirements for standard ordinary (non-reflective) symbolic safety signs, including signs applied on mirrors or on vinyl sheets (decals). This part of SZNS 044 also specifies general requirements applicable to self-luminous (radioluminescent), internally illuminated, retro-reflective and photoluminescent symbolic safety signs (complete with their backing sheets, where applicable).	
<a href="#">G/TBT/N/SWZ/31</a> 11/12/2023	Eswatini	<i>(HS code(s): 38); (ICS code(s): 13.030)</i> <b>SZNS 032;2014 Solid waste disposal sites, guidelines for safe management – Code of practice</b> The standard prescribes guidelines for safe management of solid waste disposal sites in the form of landfills, land treatment facility and incinerators.	
<a href="#">G/TBT/N/SWZ/32</a> 11/12/2023	Eswatini	<i>(HS code(s): 27); (ICS code(s): 75)</i> <b>SZNS 012:2012 Appliances operating on liquefied Petroleum gas – safety aspects</b> This specification covers the safety aspects of appliances that operate on liquefied petroleum gas at a consumption rate not exceeding 10 kg/h and used in conjunction with refillable petroleum gas (LPG) cylinders. It also covers the safety aspects where applicable of appliances that operate on natural gas.	

<a href="#">G/TBT/N/SWZ/33</a> 11/12/2023	Eswatini	(HS code(s): 83); (ICS code(s): 01.080.10) <b>SZNS 044-2:2014 Symbolic safety signs Part 2: Self-luminous (radioluminescent) signs</b> This part of SZNS 044 specifies requirements for a type of safety sign that is self-energized in respect of luminosity and that requires no external source of power. It is not intended to apply to small signs that might be used in aircraft.	
<a href="#">G/TBT/N/SWZ/34</a> 11/12/2023	Eswatini	(HS code(s): 83; 94); (ICS code(s): 01.080.10) <b>SZNS 044-5:2014 Symbolic safety signs Part 5: Photoluminescent signs</b> This part of SZNS 044 specifies the particular requirements for photoluminescent safety signs.	
<a href="#">G/TBT/N/SWZ/35</a> 11/12/2023	Eswatini	(HS code(s): 83; 94); (ICS code(s): 01.080.10) <b>SZNS 044-4:2014 Symbolic safety signs Part 4: Retro-reflective signs</b> This part of SZNS 044 specifies the particular requirements for retro-reflective safety signs.	
<a href="#">G/TBT/N/IND/325</a> 11/12/2023	India	<i>Telescopic Ball Bearing Drawer Slide.</i> <b>Telescopic Ball Bearing Drawer Slide (Quality Control) Order, 2023</b> Telescopic Ball Bearings Drawer Slides (Quality Control) Order, 2023A telescopic slide is an assembly of metal profiles sliding on ball bearings held in ball cages. It is equipped with stops on opening and closing and ensures the sliding of loads up to several tons. The drawers are given a pair of ball slides so that they can easily slide in and out of the furniture they are placed in. Instead of rollers for moving, the ball bearings slides use ball bearings.	09/02/2024

*Dispositivos, equipos o productos de radiocomunicaciones de baja potencia que puedan hacer uso de bandas de frecuencias del espectro radioeléctrico dentro del intervalo de 30 MHz a 3 GHz.*

**Anteproyecto de Disposición Técnica IFT-016-2023. Dispositivos de Radiocomunicación de Baja Potencia: Dispositivos que hacen uso de bandas de frecuencias del espectro radioeléctrico en el intervalo de 30 MHz a 3 GHz - Especificaciones, límites y métodos d**

Objetivo El presente anteproyecto de Disposición Técnica tiene como objetivo establecer las especificaciones técnicas para los dispositivos, equipos o productos de radiocomunicación de baja potencia que puedan hacer uso de bandas de frecuencias del espectro radioeléctrico dentro del intervalo de 30 MHz a 3 GHz, así como los métodos de prueba para comprobar el cumplimiento de dichas especificaciones. Campo de aplicación El presente anteproyecto de Disposición Técnica es aplicable a todos aquellos dispositivos, equipos o productos de radiocomunicaciones de baja potencia que puedan hacer uso de bandas de frecuencias del espectro radioeléctrico dentro del intervalo de 30 MHz a 3 GHz, excepto en: Las bandas de frecuencias del espectro radioeléctrico identificadas para comunicaciones de socorro, seguridad, búsqueda o salvamento de conformidad con lo establecido en el Cuadro Nacional de Atribución de Frecuencias. Las bandas de frecuencias clasificadas como espectro protegido de conformidad con lo establecido en el Cuadro Nacional de Atribución de Frecuencias. Previéndose que, cuando operen los referidos dispositivos, no causen interferencias perjudiciales a otros equipos de operación autorizada, ni a las redes y servicios de telecomunicaciones autorizados por el Instituto Federal de Telecomunicaciones. Sin embargo, deberán aceptar interferencias perjudiciales que puedan ser causadas por el funcionamiento de otros dispositivos, equipos o productos. Lo anterior sin perjuicio del cumplimiento con otras disposiciones legales y administrativas aplicables. Las condiciones de operación de estos dispositivos, equipos o productos de radiocomunicación de baja potencia son: No deberán causar interferencias perjudiciales a estaciones, cuyo titular cuente con una autorización o concesión, a otros equipos de operación autorizada, ni a las redes y servicios de telecomunicaciones autorizados por el Instituto, equipos

12/02/2024

industriales, científicos y médicos o a servicios en bandas de espectro protegido, ni podrán reclamar protección contra interferencias provenientes de dichas estaciones, redes, servicios o equipos; incluidos otros dispositivos, equipos o productos de radiocomunicación de baja potencia. Aun cuando el dispositivo, equipo o producto de radiocomunicación de baja potencia cuente con un Certificado de Homologación vigente, y en caso de que éste genere interferencias perjudiciales a estaciones cuyo titular cuente con permiso, autorización, concesión o a bandas de espectro protegido, deberá cesar de inmediato la operación del dispositivo, equipo o producto de radiocomunicación de baja potencia a fin de que se elimine la interferencia perjudicial. La emisión del Certificado de Homologación por el Instituto Federal de Telecomunicaciones no genera un derecho adquirido o reconocible a ninguna persona física o moral sobre el uso de las bandas de frecuencias en las que transmite el dispositivo, equipo o producto de radiocomunicación de baja potencia.

*Productos para los sistemas de radiocomunicación que emplean el acceso inalámbrico, en redes radioeléctricas de área local y que operan en cualquiera de las bandas clasificadas como espectro libre 5150 MHz-5250 MHz, 5250 MHz-5350 MHz, 5470 MHz-5600 MHz, 5*

12/02/2024

**Anteproyecto de Disposición Técnica IFT-017-2023: Sistemas de radiocomunicación que emplean el acceso inalámbrico - Redes radioeléctricas de área local-Equipos de radiocomunicación que utilizan la técnica de modulación digital y que operan en las bandas 5**

Objetivo La presente Disposición Técnica (DT) tiene por objeto establecer las especificaciones técnicas para los productos de los sistemas de radiocomunicación que emplean el acceso inalámbrico, en redes radioeléctricas de área local y/o equipos de radiocomunicación que utilizan la técnica de modulación digital y que operan en cualquiera de las bandas clasificadas como espectro libre 5150 MHz-5250 MHz, 5250 MHz-5350 MHz, 5470 MHz-5600 MHz, 5650 MHz-5725 MHz, 5725 MHz-5850 MHz y 5925 MHz-6425 MHz o en su conjunto; así como los métodos de prueba para comprobar el cumplimiento de dichas especificaciones y el procedimiento de evaluación de la conformidad específico. Campo de aplicación La presente DT es aplicable a todos aquellos productos para los sistemas de radiocomunicación que emplean el acceso inalámbrico, en redes radioeléctricas de área local y que operan en cualquiera de las bandas clasificadas como espectro libre 5150 MHz-5250 MHz, 5250 MHz-5350 MHz, 5470 MHz-5600 MHz, 5650 MHz-5725 MHz, 5725 MHz-5850 MHz y 5925 MHz-6425 MHz o en su conjunto. Para el caso particular de la banda 5725 MHz-5850 MHz la presente DT también es aplicable a todos aquellos productos de radiocomunicación que utilizan la técnica de modulación digital, así como aquellos del tipo híbrido, que para su operación utilizan la técnica de modulación digital, así como la modulación de salto en frecuencia. En este caso, los requisitos únicamente son aplicables para la parte de modulación digital con la modulación de salto en frecuencia apagada, por lo que la parte correspondiente a salto en frecuencia debe evaluarse de conformidad con la "Disposición Técnica IFT-008-2015: Sistemas de

radiocomunicación que emplean la técnica de espectro disperso-Equipos de radiocomunicación por salto de frecuencia y por modulación digital a operar en las bandas 902-928 MHz, 2400-2483.5 MHz y 5725-5850 MHz-Especificaciones, límites y métodos de prueba.", así como aquellas disposiciones que la modifiquen o sustituyan.La interpretación de la presente DT, así como la atención y resolución de los casos no previstos en la misma corresponderán al Instituto Federal de Telecomunicaciones.

*Dimethomorph (pesticide active substance)*

13/02/2024

**Draft Commission Implementing Regulation concerning the non-renewal of the approval of the active substance dimethomorph, in accordance with Regulation (EC) No 1107/2009 of the European Parliament and of the Council, and amending Commission Implementing R**

This draft Commission Implementing Regulation provides that the approval of the active substance dimethomorph is not renewed in accordance with Regulation (EC) No 1107/2009. EU Member States shall withdraw authorisations for plant protection products containing dimethomorph as an active substance. The non-renewal of approval is based on the first evaluation of the substance for use as a pesticide active substance in the EU under Regulation (EC) No 1107/2009. The substance was formerly assessed and approved under Directive 91/414/ EEC. This decision only concerns the placing on the market of this substance and plant protection products containing it. Following non-approval and the expiry of all grace periods for stocks of products containing this substance, separate action may be taken on MRLs and a separate notification will be made in accordance with SPS procedures.

Chile

*Madera*

13/02/2024

**Norma Chilena NCh 789/1 Madera – Parte 1:  
Durabilidad de la madera**

Esta norma indica métodos para determinar y clasificar la durabilidad de la madera y la durabilidad de los productos derivados de la madera, frente a la acción de los agentes bióticos de degradación. Los métodos indicados se pueden aplicar a madera, productos derivados de la madera, incluyendo la madera sometida a tratamiento térmico, la madera impregnada, la madera tratada con productos superficiales y las maderas modificadas. Los agentes bióticos de degradación considerados en esta norma son los siguientes:— hongos xilófagos (basidiomicetos y hongos de pudrición blanda);— insectos xilófagos (termitas y coleópteros);— xilófagos marinos. Cuando no se cuente con información de durabilidad de alguna especie, la evaluación final para su uso en alguna aplicación particular, la debe determinar el profesional especialista, considerando la presencia de agentes de biodeterioro, riesgo en servicio, condiciones ambientales y otras que se pudieran presentar. La madera como material de construcción, se debe proteger y mantener con productos que impidan la acción de los agentes de biodeterioro dependiendo de la durabilidad establecida en esta norma; así, las maderas clasificadas como no durables se deben preservar y para durabilidades intermedias se deben tratar con productos protectores según sea la condición de servicio y el agente de biodeterioro específico. Los antecedentes aportados en Anexo A (informativo) tienen origen en la información y experiencia de los miembros del Comité Técnico y, para toda clasificación de la durabilidad de la madera o producto derivado de la madera se debe

		cumplir con los ensayos y otras especificaciones contenidas en esta norma.

The Technical Regulation establishes ecodesign requirements for electric motors and variable speed drives, also if they are integrated in other products, to be placed on the market and/or put into service. The Technical Regulation addresses all environmental impacts throughout the entire life cycle of electric motors and variable speed drives from concept, design, production, use and disposal, which will allow the products that have the greatest negative impact on</p>	13/02/2024

the environment to be gradually removed from the market. The Technical Regulation corresponds to Commission Regulation (EU) 2019/1781 of 01 October 2019 laying down ecodesign requirements for electric motors and variable speed drives pursuant to Directive 2009/125/EC of the European Parliament and of the Council, amending Regulation (EC) No 641/2009 with regard to ecodesign requirements for glandless standalone circulators and glandless circulators integrated in products and repealing Commission Regulation (EC) No 640/2009. Currently, in Ukraine operates the Technical Regulation on Ecodesign Requirements for Electric Motors, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 157 of 27 February 2019 (notified as G/TBT/N/UKR/122, G/TBT/N/UKR/122/Add.1), which was developed on the basis of Commission Regulation (EC) No 640/2009 of 22 July 2009 implementing Directive 2005/32/EC of the European Parliament and of the Council with regard to ecodesign requirements for electric motors (repealed). After this Resolution of the Cabinet of Ministers of Ukraine enters into force, the Technical Regulation on ecodesign requirements for electric motors, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 157 of 27 February 2019, will be canceled.

**draft Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Technical Regulation on Ecodesign Requirements for Welding Equipment"**

the draft Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Technical Regulation on Ecodesign Requirements for Welding Equipment" provides for the approval of the Technical Regulation in order to ensure the improvement of energy and environmental characteristics of welding equipment. This Technical Regulation establishes ecodesign requirements for electrical mains-operated welding equipment to be placed on the market and/or put into service. The Technical Regulation addresses all environmental impacts throughout the entire life cycle of welding equipment from concept, design, production, use and disposal, which will allow the products that have the greatest negative impact on the environment to be gradually removed from the market. The Technical Regulation corresponds to Commission Regulation (EU) 2019/1784 of 01 October 2019 laying down ecodesign requirements for welding equipment pursuant to Directive 2009/125/EC of the European Parliament and of the Council.
