

Predpisy notifikované v Dohode o technických prekážkach obchodu (TBT WTO)
51. týždeň roku 2021

Číslo/Dátum	Notifikujúca strana	Charakteristika notifikácie	Pripomienková doba
G/TBT/N/CHN/1640 20/12/21	China	<i>Frozen bovine semen</i> ICS codes: 65.020.30 (<i>Animal husbandry and breeding</i>); National Standard of the P.R.C., Frozen Bovine Semen G/TBT/N/CHN/1640 This document specifies the technical requirements, sampling, test methods, inspection rules, judgment rules, signs, labelling and accompanying documents, packaging, storage and transportation of frozen bovine semen. This document applies to frozen bovine semen products.	18/02/22
G/TBT/N/CHN/1641 20/12/21	China	<i>Chemical and microbial protective gloves</i> ICS codes: 13.340.40 (<i>Hand and arm protection</i>); National Standard of the P.R.C., Hand Protection—Protective Gloves Against Chemicals and Micro-organisms G/TBT/N/CHN/1641 This document specifies the terms, definitions, technical requirements, test methods, labelling and information of chemical and microbial protective gloves. This document applies to gloves for protection against chemical and microbial hazards.	18/02/22
G/TBT/N/CHN/1642 20/12/21	China	<i>Gas driven fixed water supply equipment used for fire-protection</i> ICS codes: 13.220.10 (<i>Fire-fighting</i>); National Standard of the P.R.C., Fixed Water Supply Equipment Used for Fire-protection Part 4: Gas Driven Fixed Water Supply Equipment Used for Fire-protection G/TBT/N/CHN/1642 This document stipulates terms and definitions, classification, requirements, test methods, inspection rules, labelling and operating instructions, packaging, transportation and storage of gas driven fixed water supply equipment used for fire-protection. This document applies to gas driven fixed water supply equipment used for fire-protection.	18/02/22
G/TBT/N/CHN/1643 20/12/21	China	<i>Dry pipe valves and accelerator of automatic sprinkler system</i> ICS codes: 13.220.10 (<i>Fire-fighting</i>); National Standard of the P.R.C., Automatic Sprinkler System-Part 4: Dry Pipe Valves and Accelerator G/TBT/N/CHN/1643 This document specifies the classification and code, model preparation, requirements, test methods, inspection rules, labelling and operation instructions, packaging, transportation and storage of dry pipe valves and accelerators for an automatic sprinkler system. This document applies to dry pipe valves and accelerators.	18/02/22
G/TBT/N/CHN/1644 20/12/21	China	<i>Helmets for motorcyclists and electric bicyclists</i> ICS codes: 13.340.20 (<i>Head protective equipment</i>); National Standard of the P.R.C., Helmets for motorcyclists and electric bicyclists G/TBT/N/CHN/1644 This document specifies terms and definitions, types, shape and dimensions, technical requirements, test methods, inspection rules, markings, packaging, transportation and storage of the helmets for motorcyclists and electric bicyclists. This document applies to the helmets for motorcyclists and electric bicyclists (including drivers and passengers).	18/02/22
G/TBT/N/CHN/1645 20/12/21	China	<i>Guided type fall arrester including a rigid anchor line</i> ICS codes: 13.340.99 (<i>Other protective equipment</i>);	18/02/22

G/TBT/N/CHN/1646 20/12/21	China	<p>National Standard of the P.R.C., Personal Fall Protection Equipment — Guided Type Fall Arrester Including a Rigid Anchor Line</p> <p>G/TBT/N/CHN/1645 This document specifies the technical requirements, test methods, inspection rules, permanent marking, the information supplied by the manufacturers for the guided type fall arrester including a rigid anchor line. This document applies to the guided type fall arrester including a rigid anchor line which is installed at an angle of 15° with the vertical direction.</p>	18/02/22
G/TBT/N/CHN/1647 20/12/21	China	<p><i>Retractable type fall arrester</i></p> <p>ICS codes: 13.340.99 (Other protective equipment);</p> <p>National Standard of the P.R.C., Personal Fall Protection Equipment — Retractable Type Fall Arrester</p> <p>G/TBT/N/CHN/1646 This document includes technical requirements, test methods, inspection rules, marking and information supplied by the manufacturer of the retractable type fall arrester. This document applies to the retractable type fall arrester used when the sum of the user's weight and load is no more than 100kg during working at height.</p> <p><i>Submersible motor-pumps</i></p> <p>ICS codes: 27.010 (Energy and heat transfer engineering in general);</p> <p>National Standards of the P.R.C., Minimum Allowable Values of Energy Efficiency and Energy Efficiency Grades for Submersible Motor-pumps</p> <p>G/TBT/N/CHN/1647 This document specifies the energy efficiency grades, energy efficiency limits and test methods of submersible motor-pumps. This document applies to: a. single-phase or three-phase, single-stage or multi-stage small-size submersible motor-pumps with power less than or equal to 22 kW; b. the submersible pumps for deep well that are integrated with a pump and a submersible motor for deep well submerged into the water to extract clean water; c. single-phase or three-phase waste submersible motor-pumps that transport all kinds of sewage or mixed liquids containing insoluble solid phases such as silt, fiber, manure, river mud and fertilizer; d. mixed flow submersible motor-pumps that transport clear water or other liquids similar to clear water; large and medium-sized submersible motor-pumps with power larger than 22 kW.</p>	18/02/22
G/TBT/N/GBR/45 20/12/21	United Kingdom	<p><i>Construction products as defined in regulation 3 of the draft regulations, i.e. any product or kit which is placed on the market for permanent incorporation in any construction works.</i></p> <p>ICS codes: 91 (CONSTRUCTION MATERIALS AND BUILDING);</p> <p>The Construction Products Regulations 2022</p> <p>G/TBT/N/GBR/45 These regulations will be made under the Building Safety Bill (once it has received Royal Assent) and will extend the existing regulatory framework to cover all construction products placed on the market in the UK. The existing regulatory framework for construction products, which derives from EU law, will remain in place for Great Britain (the EU regulatory regime for construction products will continue to apply in Northern Ireland as per the Northern Ireland Protocol). The regulation of safety critical products and the requirement for construction products to be safe will be extended to Northern Ireland. The intention of these regulations is to require that construction products placed on the UK market are safe, and can be used safely. It will do this by placing obligations on economic operators in the supply chain, including to carry out a risk assessment, provide customer information and to take</p>	18/02/22

corrective measures where necessary. The Bill includes a power to create a statutory list of ‘safety critical’ construction product standards (where their failure would risk causing serious injury or death). The regulations set out that manufacturers will be required to complete a declaration of performance, put in place factory production controls and follow the specified system of assessment and verification of constancy of performance to ensure that the claimed performance is consistently met. This will bring the regulation of these products in line with arrangements for products covered by the existing regulatory framework, including the affixation of a UKCA mark. Other economic operators in the supply chain will have obligations placed on them to support compliance with these requirements. These regulations will strengthen the market surveillance and enforcement regime for construction products so that safety concerns can be identified and dealt with, and action can be taken against those who do not comply with the regulations. This includes powers to investigate, take civil action or prosecute economic operators for breaches in construction products regulations.

<u>G/TBT/N/BRA/1287</u> 21/12/21	Brazil	<p><i>ICS codes: 43.020 (Road vehicles in general);</i> Inmetro Ordinance N° 496, 13 December 2021. G/TBT/N/BRA/1287 Inmetro Ordinance No. 496 consolidates technical quality regulation and conformity assessment requirements for vehicular axis</p>	
<u>G/TBT/N/BDI/198</u> 21/12/21	Burundi	<p><i>ICS codes: 67.220.10 (Spices and condiments);</i> DEAS 1076: 2021, Cinnamon (Cinnamomum zeylanicum Blume) — Specification, First Edition G/TBT/N/BDI/198 This draft East Africa standard specifies the requirements, sampling and test methods for whole or ground (powdered) cinnamon which is the bark of the tree or shrub Cinnamomum zeylanicum Blume intended for human consumption</p>	19/02/22
<u>G/TBT/N/BDI/199</u> 21/12/21	Burundi	<p><i>ICS codes: 67.220.10 (Spices and condiments);</i> DEAS 1077: 2021, Coriander (Coriandrum sativum L.) whole or ground (powdered) — Specification, First Edition G/TBT/N/BDI/199 This draft East African Standard specifies requirements, sampling and test methods for coriander seed (Coriandrum sativum L.), in the whole and ground (powdered) forms intended for human consumption</p>	19/02/22
<u>G/TBT/N/BDI/200</u> 21/12/21	Burundi	<p><i>ICS codes: 67.220.10 (Spices and condiments);</i> DEAS 1078: 2021, Spices — Cumin (Cuminum cyminum L.) — Specification, First Edition G/TBT/N/BDI/200 This draft East African Standard specifies requirements, methods of sampling and tests for cumin (Cuminum cyminum L.) intended for human consumption.</p>	19/02/22
<u>G/TBT/N/BDI/201</u> 21/12/21	Burundi	<p><i>ICS codes: 67.220.20 (Food additives);</i> DEAS 1079: 2021, Mustard seed — Specification, First Edition G/TBT/N/BDI/201 This draft East African Standard specifies requirements, methods of sampling and tests for seeds of white mustard (Sinapis alba or Brassica hirta), brown and yellow mustard (Brassica juncea) or black mustard (Brassica nigra)”.</p>	19/02/22
<u>G/TBT/N/BDI/202</u> 21/12/21	Burundi	<p><i>ICS codes: 67.220.10 (Spices and condiments);</i> DEAS 98: 2021, Curry powder — Specification, Third Edition</p>	19/02/22

			G/TBT/N/BDI/202 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.	
G/TBT/N/CHN/1648 21/12/21	China	<i>Large steam sterilizers</i> ICS codes: 11.080.10 (Sterilizing equipment); National Standard of the P.R.C., Technical Requirements for Large Steam Sterilizers G/TBT/N/CHN/1648 This document specifies the types, requirements and test methods for large steam sterilizers. This document applies to steam sterilizers designed to accommodate at least one sterilization module or having a chamber volume of at least 60 l, which are primarily used in health care for the sterilization of medical devices and their accessories.		19/02/22
G/TBT/N/CHN/1649 21/12/21	China	<i>Specialized cybersecurity products</i> ICS codes: 35.040 (Character sets and information coding); National Standard of the P.R.C., Information Security Technology - Security Technical Requirements of Specialized Cybersecurity Products G/TBT/N/CHN/1649 This document specifies the security function requirements, self-security requirements and security assurance requirements of specialized cybersecurity products. This document applies to the research and development, testing, production, service and market access inspection and supervision of specialized cybersecurity products sold or provided within the territory of the people's Republic of China.		19/02/22
G/TBT/N/CHN/1650 21/12/21	China	<i>Medical Devices</i> ICS codes: 11.080.01 (Sterilization and disinfection in general); National Standard of the P.R.C., Sterilization of Health-Care Products — Ethylene Oxide - Requirements for the Development, Validation and Routine Control of a Sterilization Process for Medical Devices G/TBT/N/CHN/1650 This document specifies requirements for the development, validation and routine control of the ethylene oxide sterilization process for medical devices in both the industrial and health care facility settings, and it acknowledges the similarities and differences between the two applications. This document applies to the ethylene oxide sterilization process during the production of medical devices.		19/02/22
G/TBT/N/KEN/1189 21/12/21	Kenya	ICS codes: 67.220.10 (Spices and condiments); DEAS 1076: 2021, Cinnamon (Cinnamomum zeylanicum Blume) — Specification, First Edition G/TBT/N/KEN/1189 This draft East Africa standard specifies the requirements, sampling and test methods for whole or ground (powdered) cinnamon which is the bark of the tree or shrub Cinnamomum zeylanicum Blume intended for human consumption		19/02/22
G/TBT/N/KEN/1190 21/12/21	Kenya	ICS codes: 67.220.10 (Spices and condiments); DEAS 1077: 2021, Coriander (Coriandrum sativum L.) whole or ground (powdered) — Specification, First Edition G/TBT/N/KEN/1190 This draft East African Standard specifies requirements, sampling and test methods for coriander seed (Coriandrum sativum L.), in the whole and ground (powdered) forms intended for human consumption		19/02/22
G/TBT/N/KEN/1191 21/12/21	Kenya	ICS codes: 67.220.10 (Spices and condiments);		19/02/22

		DEAS 1078: 2021,Spices — Cumin (Cuminum cyminum L.) — Specification,First Edition G/TBT/N/KEN/1191 This draft East African Standard specifies requirements, methods of sampling and tests for cumin (Cuminum cyminum L.) intended for human consumption.	
G/TBT/N/KEN/1192 21/12/21	Kenya	ICS codes: 67.220.20 (Food additives); DEAS 1079: 2021, Mustard seed — Specification, First Edition G/TBT/N/KEN/1192 This draft East African Standard specifies requirements, methods of sampling and tests for seeds of white mustard (Sinapis alba or Brassica hirta), brown and yellow mustard (Brassica juncea) or black mustard (Brassica nigra)”. DEAS 98: 2021, Curry powder — Specification, Third Edition G/TBT/N/KEN/1193 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.	19/02/22
G/TBT/N/KEN/1193 21/12/21	Kenya	ICS codes: 67.220.10 (Spices and condiments); DEAS 98: 2021, Curry powder — Specification, Third Edition G/TBT/N/KEN/1193 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.	19/02/22
G/TBT/N/RWA/589 21/12/21	Rwanda	ICS codes: 67.220.10 (Spices and condiments); DEAS 1076: 2021,Cinnamon (Cinnamomum zeylanicum Blume) — Specification,First Edition G/TBT/N/RWA/589 This draft East Africa standard specifies the requirements, sampling and test methods for whole or ground (powdered) cinnamon which is the bark of the tree or shrub Cinnamomum zeylanicum Blume intended for human consumption	19/02/22
G/TBT/N/RWA/590 21/12/21	Rwanda	ICS codes: 67.220.10 (Spices and condiments); DEAS 1077: 2021, Coriander (Coriandrum sativum L.) whole or ground (powdered) —Specification,First Edition G/TBT/N/RWA/590 This draft East African Standard specifies requirements, sampling and test methods for coriander seed (Coriandrum sativum L.), in the whole and ground (powdered) forms intended for human consumption	19/02/22
G/TBT/N/RWA/591 21/12/21	Rwanda	ICS codes: 67.220.10 (Spices and condiments); DEAS 1078: 2021,Spices — Cumin (Cuminum cyminum L.) — Specification,First Edition G/TBT/N/RWA/591 This draft East African Standard specifies requirements, methods of sampling and tests for cumin (Cuminum cyminum L.) intended for human consumption.	19/02/22
G/TBT/N/RWA/592 21/12/21	Rwanda	ICS codes: 67.220.20 (Food additives); DEAS 1079: 2021, Mustard seed — Specification, First Edition G/TBT/N/RWA/592 This draft East African Standard specifies requirements, methods of sampling and tests for seeds of white mustard (Sinapis alba or Brassica hirta), brown and yellow mustard (Brassica juncea) or black mustard (Brassica nigra)”. DEAS 98: 2021, Curry powder — Specification, Third Edition G/TBT/N/RWA/593 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.	19/02/22
G/TBT/N/RWA/593 21/12/21	Rwanda	ICS codes: 67.220.10 (Spices and condiments); DEAS 98: 2021, Curry powder — Specification, Third Edition G/TBT/N/RWA/593 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.	19/02/22
G/TBT/N/TZA/686 21/12/21	Tanzania	ICS codes: 67.220.10 (Spices and condiments); DEAS 1076: 2021,Cinnamon (Cinnamomum zeylanicum Blume) — Specification,First Edition G/TBT/N/TZA/686 This draft East Africa standard specifies the requirements, sampling and test methods for whole or ground	19/02/22

		(powdered) cinnamon which is the bark of the tree or shrub <i>Cinnamomum zeylanicum</i> Blume intended for human consumption	
G/TBT/N/TZA/687 21/12/21	Tanzania	ICS codes: 67.220.10 (<i>Spices and condiments</i>); DEAS 1077: 2021, Coriander (<i>Coriandrum sativum</i> L.) whole or ground (powdered) — Specification, First Edition G/TBT/N/TZA/687 This draft East African Standard specifies requirements, sampling and test methods for coriander seed (<i>Coriandrum sativum</i> L.), in the whole and ground (powdered) forms intended for human consumption	19/02/22
G/TBT/N/TZA/688 21/12/21	Tanzania	ICS codes: 67.220.10 (<i>Spices and condiments</i>); DEAS 1078: 2021, Spices — Cumin (<i>Cuminum cyminum</i> L.) — Specification, First Edition G/TBT/N/TZA/688 This draft East African Standard specifies requirements, methods of sampling and tests for cumin (<i>Cuminum cyminum</i> L.) intended for human consumption.	19/02/22
G/TBT/N/TZA/689 21/12/21	Tanzania	ICS codes: 67.220.20 (<i>Food additives</i>); DEAS 1079: 2021, Mustard seed — Specification, First Edition G/TBT/N/TZA/689 This draft East African Standard specifies requirements, methods of sampling and tests for seeds of white mustard (<i>Sinapis alba</i> or <i>Brassica hirta</i>), brown and yellow mustard (<i>Brassica juncea</i>) or black mustard (<i>Brassica nigra</i>)”.	19/02/22
G/TBT/N/TZA/690 21/12/21	Tanzania	ICS codes: 67.220.10 (<i>Spices and condiments</i>); DEAS 98: 2021, Curry powder — Specification, Third Edition G/TBT/N/TZA/690 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.	19/02/22
G/TBT/N/UGA/1529 21/12/21	Uganda	ICS codes: 67.220.10 (<i>Spices and condiments</i>); DEAS 1076: 2021, Cinnamon (<i>Cinnamomum zeylanicum</i> Blume) — Specification, First Edition G/TBT/N/UGA/1529 This draft East Africa standard specifies the requirements, sampling and test methods for whole or ground (powdered) cinnamon which is the bark of the tree or shrub <i>Cinnamomum zeylanicum</i> Blume intended for human consumption	19/02/22
G/TBT/N/UGA/1530 21/12/21	Uganda	ICS codes: 67.220.10 (<i>Spices and condiments</i>); DEAS 1077: 2021, Coriander (<i>Coriandrum sativum</i> L.) whole or ground (powdered) — Specification, First Edition G/TBT/N/UGA/1530 This draft East African Standard specifies requirements, sampling and test methods for coriander seed (<i>Coriandrum sativum</i> L.), in the whole and ground (powdered) forms intended for human consumption	19/02/22
G/TBT/N/UGA/1531 21/12/21	Uganda	ICS codes: 67.220.10 (<i>Spices and condiments</i>); DEAS 1078: 2021, Spices — Cumin (<i>Cuminum cyminum</i> L.) — Specification, First Edition G/TBT/N/UGA/1531 This draft East African Standard specifies requirements, methods of sampling and tests for cumin (<i>Cuminum cyminum</i> L.) intended for human consumption.	19/02/22
G/TBT/N/UGA/1532 21/12/21	Uganda	ICS codes: 67.220.20 (<i>Food additives</i>); DEAS 1079: 2021, Mustard seed — Specification, First Edition G/TBT/N/UGA/1532 This draft East African Standard specifies requirements, methods of sampling and tests for seeds of white mustard (<i>Sinapis alba</i> or <i>Brassica hirta</i>), brown and yellow mustard (<i>Brassica juncea</i>) or black mustard (<i>Brassica nigra</i>)”.	19/02/22

G/TBT/N/UGA/1533 21/12/21	Uganda	<p><i>ICS codes: 67.220.10 (Spices and condiments);</i></p> <p>DEAS 98: 2021, Curry powder — Specification, Third Edition</p> <p>G/TBT/N/UGA/1533 This draft East African Standard specifies the requirements, sampling and test methods for curry powder, which is used as a flavouring material in the preparation of food.</p>	19/02/22
G/TBT/N/UKR/211 21/12/21	Ukraine	<p><i>Toys</i></p> <p><i>ICS codes: 97.200.50 (Toys);</i></p> <p>Draft of the Resolution of the Cabinet of Ministers of Ukraine "On Amending Annex 2 of the Technical Regulation on the safety of toys"</p> <p>G/TBT/N/UKR/211 Draft Resolution provides for enhancing level of toys safety, in particular those containing allergic aromatic substances that may pose a threat to children's health</p>	31/01/22
G/TBT/N/UKR/212 21/12/21	Ukraine	<p><i>Energy consumer products, small, medium and large power transformers</i></p> <p>Draft Resolution of the Cabinet of Ministers of Ukraine “On Amendments to Certain Resolutions of the Cabinet of Ministers of Ukraine”</p> <p>G/TBT/N/UKR/212 The draft Resolution amends the current regulations of Ukraine on the requirements of ecodesign for energy-consuming products, small, medium and large power transformers. The main purpose of the draft Resolution is to regulate ecodesign requirements for energy consumer products, small, medium and large power transformers. The adoption of the Resolution regulates the legal opportunities of energy producers, which facilitates the business environment in Ukraine and allows equal competitive opportunities among producers of energy efficient products, increases the requirements for technical staff.</p>	19/02/22
G/TBT/N/AUS/136 22/12/21	Australia	<p><i>Medicinal cannabis products (being therapeutic goods that contain, or are manufactured from, any part of the cannabis plant) and any ingredients used in the manufacture of those products (including, but not limited to, the cannabis plant). For the purposes of this notification, ‘cannabis plant’ means any plant, or part of a plant, of the genus Cannabis, including, but not limited to, the flowers, fruiting tops, seeds, stems and leaves of the plant.</i></p> <p>Reforms to medicinal cannabis manufacturing, labelling and packaging requirements.</p> <p>G/TBT/N/AUS/136 The Therapeutic Goods Administration (TGA) is seeking comment on a package of reforms in relation to the manufacturing, labelling and packaging requirements for Medicinal Cannabis Products made available in Australia or supplied to Australians. Background In recent years, Australian Governments at Commonwealth, State and Territory levels have implemented legislative and policy changes to allow the cultivation, manufacture and supply of medicinal cannabis for patients in Australia. The TGA administers Australia’s national system of controls for the quality, safety, efficacy and timely availability of therapeutic goods in Australia. Typically, therapeutic goods must be included in the Australian Register of Therapeutic Goods (ARTG). If they are not included in the ARTG, these goods can only be lawfully supplied in, imported into, or exported from Australia if they are subject to an exemption, approval or authority. Therapeutic goods not on the ARTG are referred to as ‘unapproved products’. Currently, most medicinal cannabis products are unapproved products. Unapproved medicinal cannabis products can be accessed via the Authorised Prescriber Scheme (AP), Special Access Scheme (SAS) or clinical</p>	20/02/22

trials. The TGA requires certain standards for medicinal cannabis products accessed in Australia, as set out principally in TGO 93. At present, Australian manufacturers must comply with Good Manufacturing Practice (GMP) standards, whereas a similar requirement does not apply to product imported into Australia. Reform proposal There has been a significant increase in the supply and use of medicinal cannabis products in Australia. In light of this, the TGA recently undertook a review of the regulation of medicinal cannabis products manufacturing, labelling and packaging, which included a public consultation held between December 2020 and January 2021. The TGA has subsequently developed a package of reforms, described below. TGO 93 and the Regulations are proposed to be amended to require the following: Imported medicinal cannabis products will be required to be manufactured on sites with acceptable GMP standards. Sponsors (the companies importing the goods) must maintain evidence to show compliance for each batch of medicinal cannabis products. The TGA will provide sponsors with clear guidance on the GMP practices and evidence required, which will be in accordance with existing recognised global standards and/or accreditation. This measure provides greater certainty on the quality and safety of products available to Australian patients. It extends broadly the same standards to offshore manufacturers currently required of Australian manufacturers. For the avoidance of doubt, the TGA will not be requiring sponsors of offshore manufacturers to comply with a unique Australian manufacturing standard. Sponsors will be able to rely on a manufacturer’s adherence to an internationally accepted GMP standard (of a type acceptable to the TGA) that may be specific to that manufacturer’s country. Extemporaneous compounding by medical practitioners and pharmacists will require approval from the TGA under the Special Access Scheme (SAS). Medicinal cannabis manufactured outside of Australia can still be used in extemporaneous compounding. TGO 93 will be amended to include requirements for (a) a child resistant closure on high risk goods, which is normal practice for medicines that present a poisoning risk (b) labelling that better identifies the active ingredients and (c) clarity on microbiological testing requirements. Clear guidance on the requirements – and a reasonable transition period – will be provided.

G/TBT/N/BRA/1288 22/12/21	Brazil	ICS codes: 43.040 (Road vehicle systems); Inmetro Ordinance No. 497, 13 December 2021 G/TBT/N/BRA/1288 Inmetro Ordinance No. 497 consolidates technical regulation for low Voltage electrical devices	
G/TBT/N/JAM/104 22/12/21	Jamaica	ICS codes: 85.080.20 (Tissue paper); Standard Specification for Paper: Toilet Tissue G/TBT/N/JAM/104 This standard applies to toilet tissue in single-ply and two-ply roll form, made of virgin or recycled fibre or any mixture of the two. It does not cover facial tissue or paper towels.	21/02/22
G/TBT/N/JAM/105 22/12/21	Jamaica	ICS codes: 23.020.20 (Vessels and containers mounted on vehicles); Standard Specification for The Repair and Rebuilding of Low-pressure Welded Steel Transportable Gas Containers. G/TBT/N/JAM/105 This Jamaican Standard specifies requirements for the repair and rebuilding of low-pressure transportable gas containers and the subsequent testing of these transportable gas containers before re-use.	21/02/22
G/TBT/N/JAM/106 22/12/21	Jamaica	ICS codes: 91.100.10 (Cement. Gypsum. Lime. Mortar);	21/02/22

		Standard Specification for Portland cement (ordinary and rapid-hardening) G/TBT/N/JAM/106 This standard specifies the requirements for chemical and physical properties, sampling, labelling and packaging.	
G/TBT/N/JAM/107 22/12/21	Jamaica	ICS codes: 91.100.10 (Cement. Gypsum. Lime. Mortar); Standard Specification for Blended hydraulic cements G/TBT/N/JAM/107 This standard specifies the requirements for two classes of blended hydraulic cements for both general and specific applications.	21/02/22
G/TBT/N/NZL/109 22/12/21	New Zealand	<i>24.01 Unmanufactured tobacco; tobacco refuse: 2401.10 – Tobacco, not stemmed/stripped: 24.02 Cigars, cheroots, cigarillos, and cigarettes, of tobacco or of tobacco substitutes: 24.03 Other manufactured tobacco and manufactured tobacco substitutes; “homogenised” or “reconstituted” tobacco; tobacco extracts and essences: Smoked tobacco products that are combustible and intended to be smoked and inhaled. This includes cigarettes, loose tobacco, pipe tobacco, roll your own tobacco, cigarillos, small cigars, cigars, and any other smoked niche tobacco product.</i> Proposed changes can be found in the following links: Smokefree Aotearoa 2025 Action Plan - Smokefree Aotearoa 2025 Action Plan - Auahi Kore Aotearoa Mahere Rautaki 2025 Ministry of Health NZ; and Cabinet paper- Smokefree Aotearoa 2025 Action Plan approval, pages 5-6 https://www.health.govt.nz/system/files/documents/information-release/cabinet_paper_smokefree_action_plan_2025.pdf G/TBT/N/NZL/109 The Smokefree Aotearoa 2025 Action Plan proposes that the Smokefree Environments and Regulated Products Act 1990 (the Act), be amended to introduce new requirements for smoked tobacco products. The amendments may include: regulatory powers to restrict the design of smoked tobacco products to reduce their appeal and addictiveness, including restricting the levels of nicotine to very low levels. legislation whereby only smoked tobacco products that meet requirements for constituents shall be able to be manufactured, imported, or offered for sale or supply in New Zealand. legislation setting out a pre-market application process requiring manufacturers or importers to seek approval for smoked tobacco products, prior to sale or import. Testing via an approved laboratory may be required, both prior to sale or import, and subsequently on a regular basis.	20/02/22
G/TBT/N/USA/1816 22/12/21	United States of America	<i>Renewable fuel standard program</i> ICS codes: 13.020 (Environmental protection), 75.160 (Fuels); Renewable Fuel Standard (RFS) Program: RFS Annual Rules G/TBT/N/USA/1816 Proposed rule - Under section 211 of the Clean Air Act, the Environmental Protection Agency (EPA) is required to set standards every year to implement nationally applicable renewable fuel volume targets. This action proposes to modify the 2021 and 2022 statutory volume targets for cellulosic biofuel, advanced biofuel, and total renewable fuel, as well as to establish the 2022 volume target for biomass-based diesel. This action also proposes to modify the previously established cellulosic biofuel, advanced biofuel, and total renewable fuel volume requirements for 2020. In addition, this action proposes the 2020, 2021, and 2022 renewable fuel standards for all four of the above biofuel categories. Finally, this action also proposes to address the remand of the 2016 standard-setting rulemaking, as well as several regulatory changes to the Renewable Fuel Standard (RFS) program including regulations	04/02/22

for the use of biointermediates to produce qualifying renewable fuel, flexibilities for regulated parties, and clarifications of existing regulations. EPA announced information regarding the public hearing for this proposal in a Federal Register document published on 10 December 2021, at 86 FR 70426.
